

---

*Provisions as to all Grains.*

No grain that is warm, or is in a heating condition, shall be graded.

In the inspection of grain the weight shall not alone determine the grade.

All inspectors shall make their reasons for grading grain, when necessary, fully known by notation on their books.

All good wheat that is slightly damp shall be reported and entered on the inspector's books as "no grade" with the inspector's notations as to quality and conditions.

All wheat that is in a heating condition, or too damp to be considered safe for warehousing or that has any considerable admixture of foreign grain or seeds, or is badly bin-burnt, whatsoever grade it might otherwise be, shall be reported and entered on the inspector's books as "condemned," with the inspector's notations as to quality and conditions.

Any material admixture of "rice wheat," otherwise known as "goose" or "California" wheat, or of red chaff wheat with other descriptions of wheat, shall exclude the parcel from regular inspection.

All wheat shall be weighed, and the weight per bushel entered on the inspection book.
