

# **THE GOUBERT** In its latest construction is the result of the best engineering experience in the utilization of exhaust steam.

## **FEED WATER HEATER.**

It is the only heater in the market meeting the requirements of

**HIGH PRESSURES, FREE EXHAUST,  
HIGH EFFICIENCY, GREAT DURABILITY.**

Brass Tubes free to expand. Pressure being inside, Tubes will never collapse. Heats the water to the highest point.  
No chance for back pressure.

**The only Heater adapted to Condensing Engines.**

Made in all sizes from 50 to 5,000 Horse-Power.

**THE GOUBERT MFG. CO.**

22 Courtlandt St., New York.

**A. HOLDEN & CO., Montreal.** Agents for Canada.

## **TO OBTAIN DRY STEAM**

PLACE A

### **STRATTON SEPARATOR**

**IN YOUR STEAMPIPE.**

This is the only apparatus that automatically separates water from steam, and secures the maximum of Economy, Efficiency and Safety.

### **ABSOLUTELY DRY STEAM**

Through any length of p.pe.

A valuable feature in mining operations where dry steam is often required at a long distance from the boiler.

### **THE STRATTON SEPARATOR CO.**

32 Courtlandt St., New York.

**A. HOLDEN & CO.,**

**MONTREAL,**

**Agents for Canada.**
