EXPORT BUTTER AND CHEESE.

Montreal, Saturday, July 5.—The market for cheese this week opened with an easier feeling, and prices slowly but steadily declined until 12:30 p.m. was paid at the country points. Toward the close of the week there was evidently a decided shortage in the supply of colored cheese, and it is the opinion of those at the other side, and the demand for this class at the country boards was so keen that prices were advanced, and as high as 12 1/2 c. was paid, and 13 1/2 c. as general average, and 13 3/4 c. being paid generally at other points. The market generally, however, is weak, we would not be surprised to see prices somewhat lower next week. Stocks are beginning to accumulate on both shores of the Atlantic, and as the make of English cheese is large, there is not the usual quantity of Canadian cheese going into consumption in cheese at these prices. There is every indication of still lower prices ruling in the near future. The make is keeping up very well, but the dry weather which has prevailed during the past 10 days is reported to be seriously affecting the pasture, and the flow of milk is falling off very rapidly in some sections.

The market for butter is very firm owing to the great demand from the west for the local houses for export as butter, as is usual at this season of the year, when a large quantity of June made creamery butter is put on the water. The price is being held firm by the water trade, and prices have been firmly maintained throughout the season. The market for cheese is also firm, and prices are being held firm by the water trade, and prices have been firmly maintained throughout the season. The market for cheese is also firm, and prices are being held firm by the water trade, and prices have been firmly maintained throughout the season.

CHEESE MARKETS

Campbellford, Ont., July 2.—1,000 offered; 425 at 12 3/8 c.; 500 at 12 9/16 c.; balance unsold.
Stirling, July 2.—1,020 offered; 270 sold at 12 1/2 c.; balance at 12 7/16 c.
Peterboro, July 3.—2,300 offerings booked. Flavels bought 1,500 at 12 5/8 c.; Coak's balance at 12 11/16 c.
Woodstock, July 3.—600 boarded. All sold on board at 12 5/8 c.
Madoc, July 3.—530 boarded. 380 sold at 12 9/16 c.; balance at 12 1/2 c.
Montreal, Friday, July 5.—The Co-operative Society of Quebec has sold 100 lbs. of finest butter at 25 3/4 c.; No. 1, 25 1/4 c.; No. 2, 24 3/4 c.; pasteurized, 25 3/4 c.; white cheese, finest, 85 c.; fine, 12 1/2 c.; No. 2, 12 1/4 c.; colored, finest, 85 c.; fine, 12 9/16 c.; No. 2, 12 7/16 c.

ATTRACTIONS AT OTTAWA FAIR

The Dominion Government has voted \$50,000 for the purpose of making the coming Central Canada Exhibition, in Ottawa, from September 14th to 1912, an event of exceptional value to the great farming and dairying industries of Canada. All cash prizes have been increased 50 per cent, making the total exhibition approximating \$300,000. For instance, Ayrshire cows, four years and upwards, will compete for prizes of \$25, \$30, \$35, \$42, \$9 and \$5. Experts from afar wide have been engaged to deliver lecturing and allied subjects. A fine building is set apart for this special purpose. The manufacturers' displays will occupy four acres of space in splendid pavilions, one of which is just now being completed at a cost of \$100,000. The latest devices and labor-saving machinery will be on view in these great halls. Exhibitors are greatly aided by the Exhibition Association agreeing to pay on shipments which have to come over 100 miles of freight charges, both ways, up to 100 miles of Ottawa.

IS A HIGH TEST DESIRABLE?

Chas. W. Wood, Pres., Holstein Assoc. of America
The Holstein-Friesian cow in America has for 25 years maintained a reputation peculiar to herself; has exhibited traits of character which are responsible for her success. The time never comes when a cow can produce 25,000 pounds of milk per annum, testing 6 per cent, nor will the time ever come when the wise dairyman will seek to change materially the present characteristics of the Holstein-Friesian cow. So far as the generally admitted parts of her constitution are concerned I see no objection to breeding her success. The time never comes when a cow can produce 25,000 pounds of milk per annum, testing 6 per cent, nor will the time ever come when the wise dairyman will seek to change materially the present characteristics of the Holstein-Friesian cow. So far as the generally admitted parts of her constitution are concerned I see no objection to breeding her success. The time never comes when a cow can produce 25,000 pounds of milk per annum, testing 6 per cent, nor will the time ever come when the wise dairyman will seek to change materially the present characteristics of the Holstein-Friesian cow. So far as the generally admitted parts of her constitution are concerned I see no objection to breeding her success.

If it were possible to cause the Holstein-Friesian cow to give milk with a 5 or 6 per cent of butterfat content, and that destroy it. The Holstein-Friesian cow is a great blessing to the world and her success has been brought about by the fact that the natural product of the breed is the vicinity of 45 per cent. Some will go considerably above and some considerably below; the general average has never been changed. I do not think it never will be and never ought to be, and medical men all over the world are coming to this understanding.

3 Per Cent Milk Healthiest
Milk is valuable according to the purpose for which it is intended. For household consumption, milk of 3 per cent butterfat content is better and healthier than that with a 4 per cent or 5 per cent butterfat content. We are too glib to proclaim that our cows are high testers, which is equivalent to saying that we depend more on percentage of fat than on quantity of fat, or quantity of milk. May we not well give more prominence to the quantity produced by our cows, both of fat and of milk? The cow that gives 100 pounds of milk in one day with a 3 per cent content, contributes three pounds of fat and 47 pounds of body-building nutriment. The cow that gives 50 pounds of milk per day with a 4 per cent fat content, contributes two and one-half pounds of fat and 23 pounds of body-building nutriment. Each makes the same amount of butter; one makes twice the amount of by-product. The low-testing cow is far more valuable as a producer. Then why not say so, and help people, producers and consumers alike, to understand it, and not be forever prating about percentages.

MR. HOGATE GOES TO EUROPE

Mr. J. B. Hogate, the well known horse importer, left on Tuesday, 2nd July, on his annual visit to Europe, to purchase horses for the supply of the various districts the ensuing season. Sailing from New York on the Kaiser Wilhelm Der Grosse, he will land at Cherbourg; thence to France, where he intends to purchase a large number of the eagerly sought for Percheron breed, for which his barns have been for some years justly famous. This class of animal has acquired a great reputation in Canada in recent years, and Mr. Hogate has made a special study of the breed, and will exercise the most scrupulous care in the selection of this season's shipment, which he hopes to make the largest of his lengthened career in the business. Visiting to the Canadian National Exhibition will have an opportunity of judging for himself, as Mr. Hogate has made arrangements for an extensive exhibit, so that intending purchasers would do well to bear it in mind and pay the stand a visit before leaving. Barns are situated at Weston, Ont., and Brandon, Man.

A commercial traveller at a railway restaurant in one of our southern towns included, in his order for breakfast, two boiled eggs. The old darkey who served him brought three.

"Uncle," said the travelling man, "why in the world did you bring me three boiled eggs? I only ordered two."
"Yess, sir," said the old darkey, bowing and smiling. "I know you did order two, but I brought three because I thought naturally that dat one of them might fall you, sir."—Harper's Weekly.

A certain young man who prided himself on a brusqueness that he mistook for wit met an eminent but touchy sculptor at a studio in supper.
"Who're the chap," he said on being introduced, "that makes mad heads."
"Not all of them," the sculptor replied quietly.—Youth's Companion.

AYRSHIRES

AYRSHIRES Young Bull and Half-bred of good type and high breeding. Also purebred AYRSHIRES AND YORKSHIRES Cows and Heifers of different ages. Orders booked for Spring Calves. Jan. and Feb., 1913 price of both sexes \$100.00. Write or phone for prices. ALEX. BURNETT, GLENVIEW, ONT. Board's Station, G.T.E.
