The Manufacture of Cream Cheese.

At some time or other during their career, most dairy farmers have experienced difficulty in marketing their produce satisfactorily. The trouble may have been because of a poor demand for the product, or the quality may have been below standard.

The dairy produce from the Experimental Farm, Agassiz, B. C., has been sold in a number of different ways, one of the most satisfactory of which is on the form of cream cheese. The cream cheese appears to be the most popular soft cheese. It is easily made on the farm and requires very little special apparatus. The labor and cost of making and packing are small, so that the manufacture is well suited for any producer within a reasonable distance from a market. It is a suitable and remunerative method of marketing cream. During cool weather we have been able to keep this cheese for a week or ten days without any appreciable deterioration in flavor, but, as evaporation is going on continually, the cheese, unless originally made overweight, will not be up to the standard weight at the end of this time. It is therefore advisable to place it on the market as soon as possible after completion.

The market as yet is limited but the demand appears to be increasing. We have sold during the past twelve months 5,420 of these cheeses in the city of Vancouver. The wholesale price obtained is 15c. each, which amounts to \$813.00 for the product during the past year. Each cheese weighs six ounces and approximately ten dozen are now being manufactured weekly from 170 pounds of twelve per cent. cream. This brings a return of ninety cents per pound butterfat for the cream, with the whey retained for feeding purposes.

The shape of the cheese is cylindrical from one to one and a half inches deep and three inches in diameter. When moulding, the cheese is pressed into a cheesecloth cover and when ready for shipment is incased in a neat cardboard carton. It is a cheap cheese and a convenient size for table use. Picnicers have found it a suitable substitute for meat as a filling for sandwiches. It is also found to be very delicious and palatable when served with lettuce, celery, or any of the various kinds of vegetable salad.

The method of manufacture is concisely described in Exhibition Circular No. 23, which may be obtained for the asking from any of the Experimental Farms.—Experimental Farms Note.

Gossip.

Flintstone Farm Reports Sales.
 The manager of Flintstone Farm, Dalton, Mass., whose advertisement will be found in another column writes:

"We have recently sold an exceptionally nice red-with-little-white bull calf, sired by Flintstone Bell Boy and out of Jewell of Meadowbrook, which has produced, up to April 1st, of this year, in 189 days, 5,938.3 lbs. milk and 263.096 lbs. fat. Jewell of Meadowbrook is of the same family as the top-priced milking Shorthorn heifer in the recent Congress Sale, and also as of Lady of Meadowbrook, which has produced 9,155.8 lbs. milk and 348 lbs. fat in 10 months, and which still is milking over 30 lbs. daily. This calf was born September 20th, and weighed 588 lbs. on April 9th. We also sold to the same purchaser an exceptionally nice heifer, Flintstone Bell Boy, a son of Glenside Lady Doris, and a grandson of Doris Clay. We have sold, at a price comparing very favorably with that obtained for bulls at our large public sales, Flintstone Bell Boy's dam, Glenside Lady Doris, has produced in 9 months, 9,558.2 milk and 374.761 lbs. fat. This bull goes to head what will probably be one of the large herds of the country.

"The demand for Shorthorns has been very brisk, and at very good prices. The demand for females far exceeds the available supply."

The Only Thing I Possess that is always worth a hundred cents on the dollar---

is my Imperial Life Assurance policy. These are the words of a prominent man of affairs—a man who owns large real estate and stock market investments, besides a substantial interest in a business.

Two years ago he was rated at \$50,000. If death came to him today the only thing his widow could turn into ready cash is his \$15,000 life assurance policy. And the interest on this would not be sufficient to provide anything like the comforts to which his family have been accustomed.

Life insurance is the one safe investment—more desirable in a sense than Government Bonds, because Government Bonds can at times be bought at a discount, but an Imperial Life policy is worth one hundred cents on the dollar at any time.

If you haven't as much life insurance as you can afford, take immediate steps to remedy the condition. We can show you how. Write for our booklet "The Creation of an Estate."
