Leicestershire Tick and Vermin Destroyer

It effectually destroys Ticks, Lice, Worms or Grub, to which sheep, horses and cattle are subject, and enables the animals to thrive. It will be found far superior to other preparations used for the similar purpose. The proprietors will guarantee perfect success when used according to directions, as will be found on each box. It prevents scurf and scab, and renders the wool bright and clear. It is put up in tin boxes, price 30 cents each. One box is sufficient for twenty ordinary-sized sheep. It only requires to be tried to prove itself all that is claimed for it. Sold by druggists and grocers. Manufactured by G. C. BRIGGS & SON, 31 King Street West, Hamilton, Ont.

A Chance to Make Money.

I have berries, grapes and peaches a year old, fresh as when picked. I used the California Cold Process. Do not heat or seal the fruit, just put it up cold, keeps perfectly fresh, and costs almost nothing; can put up a bushel in ten minutes. Last year I sold directions to over 120 families in one week; anyone will pay a dollar for directions when they see the beautiful samples of fruit. As there are many people poor like myself, I consider it my duty to give my experience to such and feel confident anyone can make one or two hundred dollars round home in a few days. I will mail sample of fruit and full directions to any of your readers for nineteen (19) two-cent stamps, which is only the actual cost of the samples, postage, etc. Francis Casey, St. Louis, Mo.

IN WRITING
PLEASE MENTION FARMER'S ADVOCATE

GOSSIP.

The seventeenth annual meeting of the Holstein-Friesian Association of America will be held at the Yates Hotel, Syracuse, New York, on Wednesday, June 4, 1902, at 10 o'clock a. m. for the election of officers and the transaction of any other business which may legally come before it.

Prof. C. S. Plumb, Director of the Indiana Agricultural Experiment Station, has issued, in attractive pamphlet form, the able address which he delivered before the Kansas State Board of Agriculture some time ago, on "Breeding Farm Animals," in the course of which a great deal of sound advice was given American stockmen, or, for that matter, stockmen anywhere.

The attention of our readers is especially directed to the poultry advertisement of Mr. John B. Pettit, of Fruitland, Ont., in this issue. Mr. Pettit is a very practical and successful poultry breeder, and has in his pens several of the leading breeds. Persons desirous of improving their flocks should consult him in securing fresh stock.

For seventy-one years the farmers of the world have been familiar with the name McCormick, which has always been identified with the world's best harvesting machines. The favor with which McCormick machines meet is nothing more or less than the deserved recognition of their double excellence. They are doubly superior, and give the best satisfaction wherever they are sold. The maker confidently claims that they last much longer than ordinary machines, and will do fifty per cent. more work, and do the work fifty per cent. better. These machines are fully illustrated and described in the "World-Centre" and "King Corn" books, which will be mailed, free, upon application to the nearest McCormick agent or to the Company's home office at Chicago. See their advertisement.

The International Stock Food Company, Minneapolis, Minn., write, under date of May 17: "We have just been compelled to add factory No. 3. This gives us another building containing four floors 50 by 100 feet each. In our three buildings we now occupy 62,000 feet space, which will give some idea of the magnitude of our business, which increased at an extraordinary rate in 1901, and the increase so far this year has exceeded the increase of last year. When we say that it requires 107 people to attend to our office work alone, you can imagine that we are doing a very large business. At the present rate of increase we will be compelled to build an immense factory next year, and we are now planning for this important event in our history. We will have to build at least twice as large as the three buildings we now occupy. Of course, we are gratified in being able to make such a report, as it is absolute proof of the superior merits of our goods. Our largest growth is in States where farmers and stockmen have been using our goods for the longest time. People will not continue to use anything year after year unless it gives satisfaction."
