Abstainers' Superiority Again Demonstrated

The superiority of Total Abstainers over non-abstainers as Life Insurance risks has again been demonstrated during the past year. The ratio of Death Claims occurring during the year to those expected was:

In the Abstainers' Department 41.8%
In the General Department - 71.6%

In other words, the mortality among abstainers was nearly 80% less than that among non-abstainers.

Why not obtain the special rates and terms which this experience warrants? They may be secured with
