Good progress continues to be made

with the Python tunnel. The new hoisting and pumping engine at the Iron Mask is working like a charm, says the Standard. Yesterday the Hon. Clarke Wallace visited this property in company with Caut. Argall, M. E., the manager, and A. D. Macint fre. The Hon Clarke Wallace was heavily interested in this property before it was sold to the B. C. Exploring Syndicire, and was both greatly surprised and pleased at the transformation that has taken

place in the last three months.

The Copper King at Cherry Creek has been started up under the direction of Messrs. Redman & Outhett, who are forming a limited liability company to take over the property. We understand of the stock has been guaranteed by local people and the com-pany is to be formed immediately, and shares will be put on the market in England and the East, as well as locativ. This prospect is one of the richest in this part of the country, and under wise and able direction by Mr. J. Redman, M. E., of the above firm, it will soon demonstrate its wonderful richness and capabilities. We will give a short history and ties. We will give a short miscory description of this mine in our next all winter.

Last week the Enterprise shipped 20

LARDEAU

Busy Work on Fish Creek-The Iriune

The Harvey boys are pushing development work on their properties.

Contracts are being pushed aheard on the Black Bear and Wide West properties.

J. M. Benedum and C. H. Abercrombie have taken a lease and bond upon the Early Bird. This property is a short distance up Ten Mile creek, and contains

Several tons of Beatrice ore, which had been distributed along the trail last win-ter, is now being rawhided into Comaplex. Foreman Sharpe, who had charge of the work on the Canadian Lardeau up the North Fork during the summer, now has men working on the Eclipse.

The Triune Fraction is located on the Silver Cup hill on the south fork of the Lardeau and is situated on the famous Triune lead, in fact it is the adjoining claim to the famous Triune mine, which is now the talk of the whole district. There are a number of wonderful claims located on this same mineral belt, such as the Nettie L., Brow, Towser, Silver Cup, Triune, Triune No. 2 and Cromwell. owners while doing prospecting work on the property discovered a fine lead four feet in width and well mineralized throughout, and one of the owners chipped a piece from the surface and brought down same to Assayer Shannoin, getting returns of \$14 in gold and \$10.07 in silver, besides copper and

Conversation with people who have seen the Nettie L. lately has a very bracing effect on one's faith in the district. With regard to the amount of one in sight, all who have seen it say that Manager Poole will have no difficulty in makng his 1,100 ton shipment. As he himself says, the amount of ore sent to the smelter this winter will be governed by by the ability of the freighters to take away. Rawhiding is in full swing, but will be some time before the 200.ton start of the miners is materially diminished. It is said, and there is no reason to doubt the accuracy of the statement, that this property could easily turn out ten tons per day with present develop-

EAST KOOTENAY.

Diamond Drill Work-The Estella-Strike on Palmer Mountain.

Al. Jones has a small force at work deeloping the Greenhorn Fraction. Paul Handley, who has the contract for hauling ore for the Sullivan company, s busy building sleighs for that purpose. The Pollard boys, who have claims or Palmer mountain, adjoining the Hamilton boys, are running a 200-foot tunnel this winter on the property.

Work on the Estella is progressing rapidly. Parties from Tracy during the past week say that a high grade of ore is being taken from the shaft. Work commenced on the Golden Fleece mineral claim, situate on Tracy creek, on Wednesday. Mr. Wm. Forsyth

will have charge of the work, which will consist of running a 100-foot tunnel.

The diamond drill is still operating under the management of R. O. Jennings,

which has been driven 125 feet. Its face is still about 100 feet from the ledge. The outcrop is large and the ore of high grade. There has not been enough work done on the surface to determine the width of the ledge.
J. W. Astley and A. J. McMillan, of

the Snowshoe, were in Grand Forks Hon. Clifford Sifton's Proposals as to the last week in conection with the ship ments now being made from that property to the local smelter, but beyond saying that the results were satisfactory, they did not care to talk for publication. The property is now shipping steadily, and will undoubtedly continue to do so for some time.

P. Porter, one of the heavy owners of the Betts and Hesperus group, on Hardy mountain, was in Grand Forks recently,

The properties of the Dominion Copper ompany—the Brooklyn, Stemwinder, Idaho, etc.,—it is now given out are to be in operation on or before January 1st, says the Pioneer. Rumors in regard to these big mines have been current for some time, but little credence has been placed in them, and wisely. But now it really appears that those interested in these mines, which lie in the heart of Phoenix and have been ide since iast March, are determined to resume opera-

The machinery has been installed at the Carmi mine, and is working successfully. It is not yet know how many men will yet in sight. They will keep on drifting to determine definitely the width of the be employed at the property during the winter. This will largely depend upon whether the road is completed in order to admit of ore being hauled to Midway for shipment to the pyritic smelter. The management of the mine has just complet-The Payne Mine-The Bismarck-Other ed a sleigh road from the mine to a point opposite Rendell, and will continue it to meet with the West Fork wagon road should the survey party get within reasonable distance in the near future.

The Bodie mine on Toroda creek is to be worked on an extensive scale during the coming winter. The shaft will be continued down until it intersects the tunnel to ventilate the mine. The main tunnel has been driven 325 feet, and is being pushed about three feet each 24 hours There are some stringers of quartz in the face of the tunnel, and it seems quite probable that the ledge may be A carload of high grade galena is being shipped from the Slocan Chiet. cut at any time, though it may be possi ble that it is yet 30 or 40 feet away. shipped this year from Slocan Lake ports.

Last week the Snowshoe entered the list of the steady shippers from Phoenix camp. On Tuesday the railway gang completed the C. A. R. sidetrack to the ore dumps, and it was at once utilized by the management for sending out ore. Six cars, or an average of two cars daily, were sent out last week, and it is expected that shipments from now on will be continuous. The Snowshoe ore is being the continuous. The Snowshoe ore is being government the names of a certain number of the consideration of the government the names of a certain number of the consideration of the government the names of a certain number of the consideration of the government the names of a certain number of the consideration of the government the names of a certain number of the consideration of the government the names of a certain number of the consideration of the government the names of a certain number of the consideration of the government the names of a certain number of the consideration of the government the names of a certain number of the consideration of the government the names of a certain number of the consideration of the government the names of a certain number of the consideration of the government the names of a certain number of the consideration of the government the names of a certain number of the consideration of the government the names of a certain number of the consideration of the government the names of a certain number of the consideration of the government the names of the consideration of the government the consideration of the consideration of the consideration of the government the consideration of the consideratio Ore is being rawhided from the Hewett to the wagon road. More than 4,000 sacks Ten inches of ore was struck in No. 3 tunnel of the Monitor last week. This mine will ship steadily from Three Forks Forks for treatment. That now being shipped is taken from the drifts and winze in the railway tunnel. The management of the mine is well pleased with our personal contact with and interest in the mining and collateral industries, in the frequent consideration gives tons, and the Arlington 40. For the week ending last Thursday the Whitewater shipped 239 tons.

Work was started Monday on the Early Bird, on Ten Mile, Ed Smith and C.

quired all the properties of the Monreal Boundary Creek Company. The new company will be known as the Montaval and Boston Company, Limited, with a capitalization of \$3,000,000, divided into \$5 shares. The syndicate is putting up the necessary money to place the group on a shipping basis. The people whom Mr. Munroe represents, believing that the Sunset group was too good a property sacrificed because to be sacrificed because of unfavorable conditions in the east, decided to invest sufficient money to place the mine on the list of regular shippers. The force at the Sunset will be increased immedi ately. With a large plant on the ground they hope to make a big showing in a short time.

THE NORTHPORT SMELTER.

Completion of the Great Stack-Works
Waiting for the Machinery.

The great stack of the Northport Reluction works which, together with the dust chamber, has taken up nearly one million bricks, has been completed. It is in the neighborhood of 200 feet high. It is expected that the remainder of the proposed additions to the capacity of the smelter will have been finished by the end of this month. Some delay is being by the non-arrival of machinery country, says the Kootenaian. The net which has been ordered for some time average per ton is about \$65. Some tons out which as yet is not upon the ground

CHALLENGE ACCEPTED.

G. W. Brown Is Ready to Meet Kid Brady of San Francisco

George Washington Brown, the colored champion of British Columbia, yesterday stated that he was willing to accept the challenge of Kid Brady of San Francisco. Mr. Brown will be at the Windsor hotel this afternoon at 2 o'clock for the purpose of arranging the details of the contest wit Mr. Brady. The latter is said to have had some considerable experience in the ring, and looks like a lively and game pugilist. As for Brown, he has won one contest and made a draw in two other fistic encounters. With this experience he wilt doubt-less render a good account of himselt.

Rossland Amateur Operatic Society.

The scores for the opera "Pinafore," which were sent for by the society a fortnight ago, have now arrived, and the first rehearsal is called for Tuesday evening at Bodie on the south, is still driving its 8 o'clock, in the opera house. It is hoped that all those intending to take part in the opera will attend this rehearsal, as a the opera will attend this rehearsal, as a good attendance from the first will very materially save time in getting through necessary work. Copies of the score can be secured at Mr. McNeill's shoe store. It is uncertain how much further it will have to be run to reach the ledge, but it is believed that not more than 50 feet The Oxford is a prospect of merit. It

is bting developed by a crosscut tunnel, SUGGESTED MINING COMMISSION COMMISSI

MEETING OF ASSOCIATED BOARDS OF TRADE AT NELSON.

Smelting and Refining Industries and the Customs Tariff.

There will be a meeting of the executive committee of the Associated Boards of Trade of British Columbia at Nelson on Dec. 12, in the evening at 8 o'clock The executive committee consists of the president, J. Roderick Robertson of Nellooking after some business connected with the letting of a contract for a large amount of work to be done on that property. It is reported that the new work will consist of a long tunnel to tap the lead, but Mr. Porter was unwilling to make any definite announcements until the matter was finally decided.

The properties of the Dominion Corner of the properties of the properties of the Dominion Corner of the properties of the presidents of each of the affiliated boards, who are J. W. H. Smythe, Cranbrook; H. Bentley, Fernie; J. A. Harvey, Fort Steele; J. Gribb, Golden; T. W. Holland, Greand Forks; C. S. Galloway, Greenwood; N. J. Hopkins, Kamloops; G. O. Buchanan, Kaslo; J. C. Drewry, Moyie; G. B. Holt. Nelson: G. W. Rumberger, Phoenix; H. A. Brown, Revelstoke; C. O. Lalonde, Rossland; E. P. Topping, Trail, and G. A. Henderson, Vernon.

The constitution and by-laws of the association say nothing on the subject of proxies, but it is presumed that if the president of any board is unable to attend this meeting that he can be repreented by proxy from his own board.

proposal of the honorable the minister of the interior for the appointment of a special commission to enquire into the re-lations of the public policy of the Do-minion to the mining industry, including the transportation, smelting, refining and let today. It is evident that insiders marketing the ores and their products.

or arguments or specific suggestions. Third. Shall the association ask to be allowed to nominate one or more of the members of the commission?

Fourth. Such other business as may properly come before it. In this connection Mr. Buchanan has suggested a draft of two letters as fol-

Hon Clifford Sifton, Minister of the Interior, Ottawa. Sir: Referring to the published report of your statements made in Vancouver to the effect that you would recommend to the government the appointment of a special commission to report upon the subjects of mining, smelting and refining of ores, and the relations thereto of public policy. Such assets

taken to the Granby smelter at trand ber of gentlemen from amongst whom Forks for treatment. That now being shipped is taken from the drifts and for membership in such commission.

possibilities of more extensive operations being carried out in the near future are en by our association to the problem to be dealt with by such commission, we very strong.

A. A. Munroe, of the firm of Munroe & are, we think, in a position to nominate munroe, is now in the district, says the advance. Mr. Munroe, in company with a number of other capitalists, has act

tention a report published in the Daily Province of Vancouver, of date of Nov. 25, 1900. In the report the Hon. Mr. Sifton is reported as intimating that a Sifton is reported as intimating that figure. Special commission will be appointed by that figure. Four thousand Tamarac were sold. It and report upon the business of mining, smelting and refining ores within Canada, together with all collateral subjects, such is the transportation and marketing of the product and the relations thereto of the customs tariff.

Such commission to sit immediately and report to the coming session of parlia-ment with a view to governmental action upon such report within one year.
There are some features of the tariff affecting the mining industry which our association has desired to have brought association has desired to have brought to your notice before the assembly of the approaching session of parliament. In the event of the adoption by the government of the policy outlined by Mr. Sifton, viz., the creation of a commission to which all such questions would be referred, I beg to enquire if you would be prepared to await the report of the commission and to embody the results of its labors (if the same shall be acceptable to the govern-ment) in the tariff legislation to be recommended to parliament during the session of 1901.

The adoption of that course would afford satisfaction to our association and think, to, of the mining communities which we represent.

A SHOOTING CASE.

Mrs. Margaret Jones Is Accused of Hav-ing Shot a Valuable Collie Dog. James W. Ferrier, who is a rancher out near the Lily May mine and who is a neighbor of Mrs. Margaret Jones, whose husband is running a milk ranch in the same vicinity, came before the police same vicinity, came before the police court yesterday morning charging Mrs. Jones with shooting a valuable collie dog which belonged to him. Mrs. Jones denied the charge. Some evidence was taken in the matter and the case was postponed for Friday next.

The Canadian patent office record for August shows that 306 patents were issued during the month, of which number 29 were assgned to manufacturing firms and others before the grants were made.

British Columbia inventors this month were: C. E. Miller, Nelson, a rubber shoe having a leather sole and heel so attached

> > EUREKA LODE.

Values Are in Tellurides Which Can Be Reduced With Cyanide.

The rush into the Kettle river country last spring was caused by the re-ports of remarkably large assays from specimens taken from properties on the Eureka lode. The values were found in tellurides and the returns from the first assays were so large that it was believed the district would prove a bonanza camp. This did not turn out to be case by any means, and many of the locations made under the excitement have not had a hole drilled in them and will lapse next a hole drilled in them and will lapse next year unless the assessment is paid in cash. Apparently the first shot or two on the Eureka lode were in a pocket which car-ried high value, for since that time, so far as the Tribune is aware, no big strikes have been made. The vein known as the Eureka lode is a remarkable formation. At the only point where development has At the only point where development has been done a crosscut was was driven 41 feet through ore without encountering footwall and at many other points it can be seen that the width quite equals this for a long distance. Naturally the ore is low grade, \$5 being probably a fair average for the big vein, and the tellurides are not amenable to free milling treatment. Mr. Brock, the official of the treatment. Mr. Brock, the official of the Dominion government who spent the summer in the country as mineralogist with the topographical survey, examined the ore carefully and expressed the opinion that it could be easily and economically reduced by cyaniding. The cvanide system can be carried on at a low cost and it is therefore not at all unlikely that it is, therefore, not at all unlikely that the big ledge of telluride ore may yet be worked at good profit. When the first reports of the country arrived a number of prospectors made haste to get in on the ground floor and the ledge was staked for two and a half miles.

The diamond drill is gradually become ing appreciated in this camp. It is be-in used by many mines and its successes have made it more popular than before. The Green Mountain mine is now using it at depth for exploration for veins which are suspected to exist near the present workings.
