THE DENMARK Retort Soft Coal Burner

OR SELF FEEDER. I HAVE much pleasure in calling the attention of the public to this most remarkable STOVE, which by its extraordinary QUALITIES effects a complete REVOLUTION in the method of burning SOFT COAL—a matter of great consideration in this country, where we have abundance of soft coal, at our very doors, The perfection of COMBUSTION and ILLUMINATION far surpasses any stove ever before invented. There is no possible escape of gas into the room as it is completely consumed while passing through the flame. It is also a

Most Powerful Heater and can be readily controlled. The lack of this feature has been one of the chief faults with all Soft Coal Stoves, and is completely overcome in the DENMARK. A fire can be kept in it for TWENTY-FOUR HOURS without replenishing. I have now one in operation in my shop, and ask for it a thorough inspection. I am satisfied it only requires to be seen to be admired by all.

I have arranged with E. Cooswell & Co., the Manufacturers in the Maritime Provinces, for the exclusive sale of this Stove (in two sizes) for the Parjahes on Sackville, Derchester, Westmorland and Botsford. I have also a full line of

"I am not a millwright, never was, nor ever inside a grict mill in my life before I put up the portable grist mill I purchased from you. I put up your portable mill myself, and am now turning out first class flour. I believe it to be the best flour mill on the Island of Cape Breton, and I feel that I can recommend it to any one in want of a first class flour mill, as it is simple, efficient, and easily managed by a novice.
