SUMMER CATARRH SO LITTLE MONTEREY WRECK

Claims Many Thousands-- A Great Tragedian's Thanks to Pe-ru-na.

MONG the greatest, if not the greatest, of American tragedians, is Robert Downing. For years he has held American audiences spellbound with his thrilling interpretation of tragedy. Few people realize what exhaustless energy it requires of a man to keep up this terrible drain of nervous force. If the truth were known it would be found without doubt that few, if any, of the leading stage artists are without some tonic or nerve invigorator to enable them to keep themselves in a state of absolute health. Robert Downing, the subject of our sketch, was recently interviewed by the press on this subject. Mr. Downing promptly and emphatically gave the whole credit of his splendid physical condition to Peruna, saying:

"I find it a preventative against all sudden summer ills that swoop upon one in changing climates and water. It is the finest traveling

companion and safeguard against malarial influences. "You may notice that persons in poor health always find the heat most intolerable. This I avoid by using Peruna. I know by the thermometer that the weather is hot, yet I have felt the heat less

this summer than ever. "The cooling action of Peruna on the mucous membrane makes it invaluable to actors and singers, as it does away with that tendency to sudden hoarseness so apt to overtake one on emerging from a hot dressing-room to the draughty stage. "To sum it up, Peruna has done me more good than any tonic I have ever taken."-Robert Downing.
