It is necessary to have special the 48 lads present. advantage to the country, as well ash until combustion ceases. as affording fair returns to the investors. Many private companies and individuals have attempted the production of peat on a paying basis, great sums of money have been expended, and much experimental work has been done, but the varied success with which these attempts have met, has tended to

With a view to the preventing of any expenditure on the part of private investigators, the dominion lepartment of mines some years ago appointed an engineer to investigate dustry had already been placed on a

Need Machine Production.

The subsequent report which was submitted showed that for the economic production of fuel from peat, machinery production of fuel from peat, machinery driven by power should be substituted as far as possible for manual labor, and that processes which had been invented for removing the water content of the peat by pressure and artificial heat had

not led to commercial results.
"The endeavor," stated Dr. Mc-William, in following up this point, "to accomplish economically, by artificial means, and in a short time, that which has been accomplished by nature in exceedingly long periods of time, namely, the change of peat into a substance similar to coal, has thus far met with

only partial success.
"Although the outlook has certainly been discouraging during the past few years." he continued, "the possibility of its development at the present time of its development at the present time is most roseate. The necessity for its development alone, owing to the pending coal shortages and famines which at the temperature of the ash and clinkers at the temperature of the combustion seem to exist each year, will assure the success of the industry."

W. J. Chapman of this city, who has

assisted Dr. McWilliam in the developnent of the Dorchester bog, gives a rery interesting version of the existing reasons, peat with its low and nonment of the Dorchester bog, gives a very interesting version of the existing situation in relation to peat.

"If Canada desires to establish a peat industry and render itself, at least to some extent, independent of outside sources for fuel, the only feasible plan for her to follow is to adopt such processes and machinery as have proved essees and machinery as have proved successful, and are now in actual com-

successful, and are now in actual com mercial operation in Europe. Dominion Bought Bog. "It was with the view of introducing these methods in Canada, and of showing that they were adaptable to Canadian conditions, that the government some years ago purchased a bog of 300 acres at Alfred, Ont., and began the manufacture of peat by methods which

had been found to operate successfully There are two methods of produc tion," continued Mr. Chapman, "namely the wet and the dry processes. finished peat product shows distinct ad

"The purposition of the show, ably assisted by Sam Menco Joe C

daugh, who died Wednesday, was held this afternoon from the family residence, 352 Forbes street, to Woodland cemetery. The pallbearers were Martin Andrews, Percy Williams, James Dutton and Albert Jones. The services were conducted by Rev. Bruce Hunter.

Utilities Revenues Exceed Expenditure

Creditable surpluses in both waterworks and electrical departments are omised for the current year in the eleven months' financial statements tabled. Manager E. V. Buchanan at the regular meeting of the public utilities com-

y Manager E. V. Buchanar at the regular vision yesterday afternoon.

The commission thus far has an operating surplus of \$15,310 in the water—

The commission thus far has an operating surplus of \$15,310 in the water—

The commission thus far has an operating surplus of \$15,310 in the water works system, but out of this provision must be made for about \$6,000 of capital expenditures for which no debentures were issued and for the \$16,000 deficit which the commission met last year by reason of changing to a metered system without an immediate revision of the water rates.

The surplus in the electrical department stands at \$27,822 to date, as com-

pared with \$12,222 for the same period last year.

The detailed statements, with comparative figures for last year, are as

Envoy and Mrs. A. Islies Get London Salvation Army

TALBOT L. A.

The Christmas meeting of the Talbot street Baptist ladies' aid was held yesterday, with the president, Mrs. M. Dale in the chair. Mrs. F. Smith took the devotional period, and Mrs. Hazelgrove and Mrs. McFadden led in prayer. Mrs. Schott contributed a delightful solo. It was decided to send Christmas cheer to the shut-ins of the church.

KNOX W. M. S. Word was received this morning from Montreal headquarters of the immigration department of the Salvation cheer to the shut-ins of the church.

KNOX W. M. S.

The regular monthly meeting of the W. M. S., of Knox United church, held yesterday afternoon, was largely attended. Mrs. W. W. Cooper presided, and Miss M. Dewar read the Scripture lesson. Mrs. W. Blakeley led in prayer, and after a short business meeting, at which the officers of the society gave very gratifying reports of the year's work, prayers were offered by Mrs. J. M. MacEvoy.

Miss Snider, candidate for the foreign field, delivered a very impressive Christmas message, emphasizing God's great gift to the world, after which Master Ross McKay sang a beautiful Christmas carol. A box, valued at \$50, was sent to Victoria Mines recently by the society. Army of the appointment of Envoy and

ESSEX TO PROBE HOME CONDITIONS

Members of Council Visit Leamington to Interview Inmates of Institution.

Canadian Press Despatch. Windsor, Dec. 17 .- Indications at noon today were that a complete investigation of conditions at the Essex county home for the aged of Leamington will be held. Such a step was seen as kely following an informal visit of ne county council to the institution esterday. Daniel Kennedy, superinendent of the institution, is likely to sign, it is understood, unless a formal nd complete probe is undertaken, and nembers of the standing committee of the Essex county council who were accused of laxity in the recent report of the grand jury on the Leanington nome are equally anxious to have their dministration thoroughly investigated.

Members of the council committee and an informal visit to the instituion vesterday and interviewed severa of the inmates. The committee also nspected the place. While no formal report was drawn up, it is stated that inditions were found to be satisfactory as far as the individual merabers of the committee were concerned.

Instead of tabling a formal report, the members waited on County Judge Coughlin at Sandwich today and re-quested his advice in the matter. The judge advised them to consult county's legal adviser as to what steps should be taken.

advance of all other phonographs. When down-

town this week, drop in for a hearing-demon-

cipal of the school, many of whose pupils have achieved success, not only locally, but some of them in the far corners of the world. On his graduation from the Union school, Mr. Cowley took a year's course in what was then known as the old commercial form, to better prepare himself for a life in

the business world.

At 15 years of age, he went into the employment of the Hobbs Hardware company. He was an employee of this firm for some fifteen years, during which time he became thoroughly acquainted with the hardware and paint business. He later became associated with the Sherwin-Williams Paint company, and since that time has been a continuous and valued member of this firm. For twenty years he covered the Western Ontario district, with his neadquarters in Toronto.

His departure from this city was looked upon with regret by the host of friends which he had made. Not only did the citizens of London regret his leaving, but he was equally missed by every businessman and storekeeper in the district, where he was known to all, with his never-failing smile and his congenial disposition, as "Pat" Cowley.

Mr. Cowley is interested in every activity which deals with commerc

travellers. He is especially interested in the extension course in salesmanship and marketing, which is being conducted by the association through the university of Western Ontario.

An Athlete. The greatest hobby which Mr. Cowley enjoyed was an active participation in athletics. As a young man he was most proficient in baseball, rugby and other sports, and on many occasions ipheld local colors in various intercity clashes. In 1903 he was a member of the old Tecumseh baseball team, at that time amateur champions of the city. Even at this stage, Mr. Cowley is Outstanding among the members of able to get out on the field and show some of the youngsters who claim
