

LANCASTER, ONT.
CARRIED BY
"FRUIT-A-TIVES"

These Wonderful Fruit Juice Tablets Are Winning Friends on Every Side.

Lancaster, Ont., Sept. 16, 1938
I was a martyr for many years to that distressing complaint, chronic Constipation. I tried many kinds of pills and medicines without benefit, and consulted physicians, but nothing did me any real good. Then I began to take "Fruit-A-Tives", and these wonderful little fruit tablets entirely cured me.

At first, I took five tablets a day, but now I take only one tablet every two days. I am now entirely well, and thank you "Fruit-A-Tives". I give you permission to publish this testimonial.

(Madame) Zenophile Bonnevillie.

This is only one more link in the chain of proof that "Fruit-A-Tives" does not cure Constipation or non-action of the bowels. The box for \$2.50, or trial box 50c. At dealers or sent on receipt of price by Fruit-A-Tives Limited, Ottawa.

THREE MEN MAY DIE OF INJURIES
Laborers Working on Transcontinental Near Winnipeg—The Victims.

WENT UNDER CARS.

WINNIPEG, July 14—A terrible accident, which may cause the death of three men, occurred on the National Transcontinental, just east of Winnipeg, last evening. A thunderstorm broke suddenly with a number of laborers were at work in the yards and one of the men, sought shelter under a standing train of freight cars. While they were crowded there a yard engine came along and moved the train. The men all made a dash to escape, but only one was so fortunate as to get out unharmed. The other three, Constantine Stengel, German; Michael Omelchuk, Pole; and Jas. McLeod were caught under the wheels and all perished. The bodies of the three men were cut out and probably will die. McLeod had the fingers of one hand crushed and the foot cut. Omelchuk also will lose a foot. McLeod was a sister residing in Port Arthur.

PAIN
Pain in the head—pain anywhere, has its cause in impure blood. Pain is blood poisoning. At least in some cases, it is. It is caused by a little pink tablet, "Fruit-A-Tives". It is a wonderful medicine. It cures blood poisoning away from pain centers. It effects a thorough cleansing of the blood. It is a wonderful medicine. It is a wonderful medicine. It is a wonderful medicine.

Dr. Shoop's Headache Tablets "ALL HEADACHES"

It is not safe to slip in seed corn from a distance. Corn is very sensitive to changes in climate and soil. To obtain the best results the work of breeding must be done for each locality and to some extent for each year. A method of improving seed corn that will surely result in some improvement and one that is simple to recommend is that of selecting a number of the best ears from the best field some improvement can be effected. The work of this plan, however, is that the greatest power of an ear cannot be lost from its appearance. Neither is it possible to prevent inbreeding by such a method.

To avoid these difficulties the "individual ear" plot has been devised. This should preferably be at least forty rods from the nearest seed field. When this is impossible, a strip from the south side of a field of the same variety may be used. As the prevailing July and August winds are from the south, very little pollen from the main field will blow over on the breeding plot.

Each row in the individual ear plot is to be planted with the kernels from a single ear. As any fair sized ear will plant a row forty rods long, this is a convenient length for the plot. Select from 50 to 100 of the best ears you can find among your seed corn and plant them in as many rows across the plot. The work can be done with a planter if care is taken to clean the seed boxes out thoroughly by each time across. The cultivation to the plot should be the same

Quick Results
May be depended upon from the use of our "Wanted Ads." The Births, deaths, marriages and the other Classified Columns are usually included in a very perfunctory perusal of the paper. They are as good for general business as they are for "Help Wanted," etc.

Home Course In Modern Agriculture

VIII.—Corn Growing
By C. V. GREGORY,
Agricultural Division, Iowa State College

SINCE corn is the principal crop grown over so large a section of the United States it is important that we learn as much as possible regarding the best methods of producing it. The average yield of corn in the United States in 1937 was only 27 bushels per acre. Many of the best farmers are able to obtain an average yield of sixty to seventy bushels per acre year after year. There is no secret in their methods. They are simple enough to be applied to every farm in the corn belt. There is no reason why the average yield per acre should not be fifty bushels or more instead of less than half that, as at present.

In preparing to raise a maximum crop of corn there are two main factors to be considered—the soil and the seed. Of these two the first is probably the more important. We have already learned how the plant obtains food and water from the soil. The first step in preparing the soil for a corn crop, then, is to see that there is a plentiful supply of plant food on hand. This we can do by using barnyard manure liberally and by following a consistent system of rotation that will equalize the demands made on the soil and keep up the supply of nitrogen and humus.

The next point is to see that the soil will have little difficulty in branching out to secure the needed plant food and water. Thorough plowing, disk and harrowing will make the soil fine and mellow, so that the roots will have little trouble in obtaining all the plant food they can use. Avoid it is there at all.

The water supply can be regulated to a considerable extent by drainage and by keeping the surface loose to check evaporation. The temperature of the soil is also an important factor in hastening germination and early growth. Drainage, cultivation and the maintenance of a plentiful supply of humus will greatly assist in securing a warm seed bed by planting time.

With a warm, well prepared soil containing sufficient quantities of plant food and water the next question that comes up is regarding the kind of seed to get into that soil. The most any kind of seed will grow and produce a fair crop under favorable conditions. What we are after, however, is not a fair crop, but an extra good one.

The seed of different strains of corn varies greatly in its ability to produce yields. In the spring of 1936 the Iowa experiment station gathered seed from nearly a hundred different sources and planted it on the station grounds under conditions that were as nearly alike as it was possible to make them. The yields from the different strains varied from thirty-one to eighty bushels per acre. This variation shows that a large share of the improvement in crop production must come through the breeding of high yielding strains.

It is not safe to slip in seed corn from a distance. Corn is very sensitive to changes in climate and soil. To obtain the best results the work of breeding must be done for each locality and to some extent for each year. A method of improving seed corn that will surely result in some improvement and one that is simple to recommend is that of selecting a number of the best ears from the best field some improvement can be effected. The work of this plan, however, is that the greatest power of an ear cannot be lost from its appearance. Neither is it possible to prevent inbreeding by such a method.

To avoid these difficulties the "individual ear" plot has been devised. This should preferably be at least forty rods from the nearest seed field. When this is impossible, a strip from the south side of a field of the same variety may be used. As the prevailing July and August winds are from the south, very little pollen from the main field will blow over on the breeding plot.

Each row in the individual ear plot is to be planted with the kernels from a single ear. As any fair sized ear will plant a row forty rods long, this is a convenient length for the plot. Select from 50 to 100 of the best ears you can find among your seed corn and plant them in as many rows across the plot. The work can be done with a planter if care is taken to clean the seed boxes out thoroughly by each time across. The cultivation to the plot should be the same

than an inch or two, so much the better. Since the plant cannot begin to digest and use the plant food of the soil and air until it has unfolded its leaves it is plain that the less soil it has to push through before it can spread out its leaves and get to work the sooner it will commence to grow. Deep planted seeds often so nearly exhaust the plant food in the endosperm and other parts that they are never able to develop into strong, healthy plants.

After planting the plan should be to keep the soil in the same fine tith it was in at planting time in order to provide large feeding ground for the roots and prevent the escape of capillary moisture.

LOOK AHEAD FOR ILLNESS
Sudden illness and pains come in every family—to parents and children alike. But if you have looked ahead, and have right in your home, ready for immediate use, a bottle of Poison's Nerviline—there isn't much to worry over. If it's a sore throat or contracted chest, a cold, a headache and you apply Poison's Nerviline. It is only, cramps or any stomach disorder, just administer ten drops of Nerviline.

Standard Callouses Quickly Cured
Sore feet in hot water and then apply Putnam's Painless Corn Extractor—removes the calous quickly. Be sure you get Putnam's only.

MORE DEADLY THAN CANCER.

It is said on high authority, that cancer causes only 30 deaths in every thousand people. The fact is, however, that cancer is the most deadly disease in the world. It is a disease that attacks the blood and its vessels, and it is a disease that attacks the life-power and vigor in the veins. You must not get into a habit of taking after meals a dose of the famous digestive tonic, Mother Sigel's Syrup. It is made from the most potent natural ingredients and it is a tonic that is sold everywhere. A. J. White & Co., Ltd., Montreal.

BIG CRANE WORKS AT THE NEW SHOPS

Lifted a Sixty Ton Engine From One Pit to Another.

SAVING IN TIME.

MONCTON, July 13—Sixty tons is the lifting capacity of the two large cranes in the erecting department at the I. C. R. new shops and yesterday afternoon a locomotive weighing sixty tons was lifted by each crane. It was a trial test which proved very successful.

The locomotive was lifted by the crane from the main pit in the erecting shop to the repair pit in twenty minutes time, thus showing how much quicker and more effective work can be accomplished at the new and modern plant. The train was in charge of electricians J. T. McConnell and H. G. Rolfe and the placing of the engine was in charge of Mr. J. A. Graham.

This is the first locomotive that has been placed in the new shops. The cranes so far in the future are of the most modern type and have been furnished by the Babcock and Wilcox Company.

MATAPEDIA
Matapedia is on a base of excitement in expectation of a good time on the 15th and judging from the programme the people will not be disappointed.

Mrs. Matthews of Montreal is visiting her daughter, Mrs. Dr. Gillis for a few days enroute to the Alaska-Yukon Exposition in Seattle.

Miss MacDonald who is a nurse-in-training in Montreal is visiting her sister, Mrs. John Ryan.

Miss M. Sutcliffe is spending her vacation with her parents.

Walter Gillis of Ottawa is spending a couple of weeks at his home here.

Bel. Mr. McKay has gone to New Glasgow, N. S. for a short vacation.

Messrs. Firth and Appleton of Campbellton are spending the Sunday School of Matapedia and Malpas's Mountain on Sunday last.

Miss Kate Ferguson is visiting her friends in Matapedia.

Charlie Adams has returned from Paboo.

Mrs. James MacDonald and family of Campbellton are summering at their cottage here.

Bell Art Pianos

JUDGMENT RESERVED IN DIVORCE COURT

Ferguson Case Concluded Before Divorce Court at Fredericton.

A NEWCASTLE GIRL.

FREDERICTON, July 13—The case of Dr. William A. Ferguson of Moncton, against his wife, Bertha Ferguson, was heard in the Divorce Court this afternoon. The application is made on the usual grounds. Mr. J. D. Phinney, M. C. appeared for the plaintiff and R. Albert Bailey and M. G. Treadwell, C. L., for the defendant. It was claimed in the libel that Dr. Ferguson and Miss Bertha Sinclair were married in the vicinity of Newcastle in May, 1899, by the Rev. Wm. Aitken. That they lived together as man and wife in Moncton and Moncton until March, 1934, when Mrs. Ferguson went to the United States and in 1937 obtained absolute divorce from her husband. In August, 1937, she was married to Geo. Henderson and since then the two have lived together as husband and wife. The libel claimed that the divorce granted in California could not be recognized in by this province and that the defendant was living in adultery with Henderson. The defendant by her answer claimed that the divorce was good. Judgment reserved.

Was Taken Very Ill with DIARRHOEA.

DR. FOWLER'S EXTRACT OF WILD STRAWBERRY CURED HIM.

Mr. T. W. Robertson, Elm Valley, Man., writes: "I was taken very ill with diarrhoea, and tried everything I had ever heard of, but to no avail. I was without success until I was finally advised to try Dr. Fowler's Extract of Wild Strawberry. I was so weak and discouraged that I didn't expect to derive much benefit from it, but I am happy to say that, after I had taken two doses I was greatly relieved, and a few more entirely cured me. I shall always be pleased to recommend your medicine to all sufferers and I consider myself fortunate to get such a marvellous relief after expecting to die."

We wish to warn the public against being imposed on by unscrupulous dealers who substitute the so-called "Strawberry Compound" for Dr. Fowler's.

If you want to be on the safe side, ask for Dr. Fowler's Extract of Wild Strawberry and insist on getting what you ask for.

The original is manufactured only by The T. Millburn Co., Limited, Toronto, Ont. Price 30c.

When You Feel Played Out

There comes a time when your grip on things weakens. Your nerves are unstrung, the vital forces low, the stomach is weak and the blood impoverished. You feel old age creeping over you. Be careful of yourself. Take

BEECHAM'S PILLS

at once; there is need to renew the life forces. Weak nerves, wearied brains, sick stomach, feeble blood, torpid liver, sluggish bowels—all feel the quickening effects of Beecham's Pills. Their use makes all the difference. The tonic action of these pills upon the vital organs is immediate, thorough and lasting. They are Nature's own remedy

For Run-down Conditions

Prepared only by Thomas Beecham, St. Helens, Lancashire, England. Sold by all Druggists in Canada and U. S. America. In boxes 25 cents.

Weak Throat—Weak Lungs

Cold after cold; cough after cough! Tired with this taking-cold habit? Better break it up. We have great confidence in Ayer's Cherry Pectoral for this work. No medicine like it for weak throats and weak lungs. Ask your doctor for his opinion. He knows all about it. His approval is valuable. Follow his advice at all times. No alcohol in this cough medicine. J. C. Ayer & Co., Lowell, Mass.

Always keep a good supply on hand. Take along when you go to first comes on. What is the best laxative for the Ayer's Pills. Ask your doctor for his opinion. Let him decide.

HYSLOP BICYCLES

Bicycles are rapidly coming back into popular favor, the demand this year being five times what it was five years ago. We have planned for it in two ways—by getting the very best English wheels we can for popular selling, and by offering our customers all intermediate products by filling orders direct by mail instead of through agents. In this way we can offer

\$50 Wheels for \$25

and give better satisfaction all round. The quality of the wheels is all right—only the best materials used and only skilled mechanics employed in construction. The equipment is right up-to-date and the machines throughout are such as we can thoroughly recommend. We sell automobiles as well as bicycles and our plan is to make wheels as good as a good advertisement to the entire business. Send for illustrated folder.

HYSLOP BROS., Limited
High-Class Automobiles and Bicycles
TORONTO, ONT.

ASK FOR

Labatt's
(LONDON)

Undoubtedly the best brewed on the continent. Proved to be so by analysis of four chemists, and by awards of the world's great Exhibitions, especially Chicago, 1893, where it received ninety-six points out of a possible hundred, much higher than any other Porter in the United States or Canada.

"Griffon" Cutlery

We have been appointed agents for the celebrated "CARBO MAGNETIC" Razors and Griffon Cutlery. We have in stock a full line of this brand, and quote a few of the leaders as follows:

GRIFFON "BARBERS FAVORITE," . . . 1.25
GRIFFON "OUR KING," . . . 1.50
