NO. 48

### YOUNG MEN'S CLUB

Association Formed of Bridgetown Young Men Having for its Aim Sports and Recreation Combined with Clean Living and Christian Influences

As noted in last issue of the Monitor-Sentinel a club is being organized by the young men and older boys of the town. This organization is somewhat in the line of the Y. M. C. A. and is intended to encourage clean living, good character and healthy amusement and to promote a feeling of fellowship and common interest.

A meeting was held on Friday night last at the home of Mr. J. M. Fulmer, who has been chosen as leader. The club will be self-governing under the supervision of an executive and an advisory body of older citizens. Elections resulted as follows: President—Harlan Phinney. Vice Pres.—Elton Burns.

Secy.—Kenneth Dodge. Treas.—Forest Connell.

Executive Com.—J. Harry Hicks, Henry B. Hicks, Dr. M. E. Armstrong. Advisory Com.—A. F. Hiltz, H. M. Chute.

The objective features of the club were stated to be:—Development of character and promotion of clean living. The departments include: Religion, educational, physical and social. Clean healthy sports will be given their due amount of attention.

Bridgetown has reason to be proud of the spirit thus in evidence in her coming generation and should lend them all the encouragement possible.

### Well Known Commercial Traveller Drowned

L. R. McLaren, traveller for the Canadian Drug Company, and Angus Martin, his driver, were drowned in the Murray River, P. E. I., on the 8th. They left Murray Harbor North, at 10 o'clock at night to drive to Murray River on the ice. They broke through the ice and were drowned.

Mr. McLaren belonged to Moncton, where his family resides. He had been in the employ of the Canadian Drug Co. as a traveller, since 1907, and was recognized as a very good man on the road. He made many friends and was well known. He at one time carried on a drug business in Digby also in Kentville.

### THOROUGHbred ANIMALS AND PLANTS.

"There is as much difference between thoroughbred and ordinary plants as between thoroughbred and ordinary animals." This statement is made by D. M. Ferry & Co., of Detroit, the greatest flower and vegetable breeders in the world, and appears in their 1910 Annual Catalogue just issued. They argue for the great value and economy of thoroughbred seeds. "Any fundamental natural law which applies to animals applies equally to plants," a good cow (i.e. a thoroughbred) eats no more than a poor one, but may give twice as much butter-fat. "Good blood" makes as much difference with corn as with cows. But thoroughbred plants, like thoroughbred animals, are not produced in one or two generations, for no matter how superior an individual of common origin may be, its progeny are as a rule like the general run of its antecedents. Hence the need for seedsmen like D. M. Ferry & Co. They have experience, the best plant breeding equipment in the United States, and the choicest stocks for many generations. D. M. Ferry & Co's Seed Annual for 1910 may be had free of charge by writing to them at Windsor, Ontario. It contains much of interest for those who think.

### Men Refuse the Coal Company's Offer

Glouce Bay, March 13.—The result of the conference between General Manager Butler, Assistant General Manager McLoughlin, representatives of the citizens, and the men out of work, by the Coal Company, The Morning Chronicle correspondent was informed that the liberal offer made the men out of work that they would be taken back at the collieries and given good places has not been accepted by the representatives of the men out of work, and the negotiations for settlement are now finally off as far as the Company is concerned.

The men, it is learned, were desirous of getting back as members of the Union, which the Company would not consider for a moment. The only thing left for the men to do is to seek employment individually, as the Company will not agree to take the men back in a body.

### C. P. R. Main Line Blocked

Numerous Snow Slides Near Glacier Forty Bodies Have Been Discovered.

Nelson, March 10.—The main line of the C. P. R. is now completely blocked by numerous snow slides and all trains now go around by the Crow's Nest Pass. This morning a slide occurred at Glacier, seven telegraph poles in length, or over 1,000 feet, and thirty feet deep and so filled with rocks and trees that removal is difficult. General Manager Daris' special train is now somewhere in the mountains, but it is entirely cut off by slides. At Rogers Pass forty-four bodies in all have been recovered. Among those taken out was one Japanese, in whose hands was a plug of tobacco and an open knife, showing the suddenness of the avalanche.

### Find Refuge in the Children's Hospital

Wednesday Mrs. Egan, of the S.P.C. was called to Africville, save the Herald, where it was reported two small children had been burned and were not being properly attended to. On investigation the facts proved only too true. The two little ones were the children of Mabel Howe, a colored woman, who has left the house and the children locked in it. It is alleged that they fell on the stove. Mrs. Egan found that the right arm of one little girl was badly burned and blistered, and the cloth was sticking to its arm, causing the child a great amount of pain. The other little girl, who was about a year old, had the side of her face burned, and it was raw. It had nothing on its face for protection consequently they were in agony when Mrs. Egan found them. They were at once taken to the Children's hospital treatment.

The agent of the society speaks in glowing terms of the way in which the hospital is filling the long needed want. This case points to two evils, first, that there should be some police control or some like authority exercised over such delinquents as this How woman, and, secondly, that the city should take immediate steps to move that blot on the city of Halifax—Africville—a place which at once strikes the eye and nose of the visitor on reaching Halifax. Mrs. Egan states that the place is in a terrible condition and there are other small children there which need the attention of human workers. The children's hospital had been doing splendid work. There are already seventeen children in the different cottages. Several little ones with club feet and deformed hands are being operated upon and will be made as good as new.

### Advertise Your Products.

"Growers of fruit and vegetables for local markets should advertise their goods," says the Canadian Horticulturalist. "It is thought by most market gardeners, if they think about it at all, that advertising is an unnecessary and expensive luxury. This is not the case. Advertising means salesmanship and, as a result, increased business.

There is no reason why men who have fruits and vegetables for sale in a local market should not call people about them through the home newspapers. The man who does this will step in advance of his neighbor. His produce will become better known and customers will look for it and ask for it. Advertising is being done more and more each year by the leading growers in the United States, and they are unanimous in its favor. It can be made equally successful in Canada. Further suggestions will appear in our next issue. In the meantime, gardeners and fruit growers that have tried advertising through the press or otherwise, are asked to tell others through the Canadian Horticulturalist what they think of it. Advertising news in all other lines of business. Why should it not pay in gardening?"

Are you frequently harassed? Do you have that annoying tickling in your throat? Does your cough annoy you at night, and do you raise mucus in the morning? Do you want relief? If so, take Chamberlain's Cough Remedy and you will be pleased. Sold by all dealers.

### LAW THAT NEEDS AMENDMENT.

The bastard laws of the Province are not Christian. They should be amended so as to give an illegitimate child a claim on its father for support until it is of age. As the law now stands, at the instance of the overseers of the poor the father of such a child gets scot-free by paying from \$50 to \$150, and when that is spent the innocent child is on the poor. If a man causes a child to come into the world should he not support it until able to look after itself?—Eastern Chronicle.

Chamberlain's Stomach and Liver Tablets are safe, sure and reliable and have been ordered by thousands of women who have been restored to health through their gentle and curative properties. Sold by all dealers.

### Annapolis County Temperance Alliance

The Annual Meeting Held at Middleton Passes Many Resolutions.

The annual meeting of the Annapolis County Temperance Alliance was held in Morrison's Hall, Middleton on March 8th.

In the absence of the president, Dr. M. E. Armstrong, Fred E. Cox, occupied the chair. After prayer by Rev. Wm. Phillips the reports of the secretary and treasurer were submitted by Rev. G. L. McCain and adopted. A balance of \$7.35 was reported in the treasury.

The officers were elected as follows: Pres.—Dr. M. E. Armstrong, Bridgetown. Vice Pres.—A. M. King, Annapolis. Secy. Treas.—Rev. Dr. Jost, Bridgetown.

Executive.—Col. S. Spurr, J. P. Stronach, Jos. Hines, Capt. G. A. Morris, A. O. Price, H. S. Parker, Chas. Withers, Fred Parker, Walter Purdy, Rev. I. A. Corbett, Rufus Whitman, T. A. Chipman, Ed. Rice, C. F. Armstrong, Fred Morse, J. F. Bent, A. D. Thomas, Jas. Jackson, A. M. Spinner.

Annapolis Royal.—Jas. Carder, F. W. Pickles. Bridgetown.—Harry Hicks, J. W. Peters. Middleton.—I. Young, Fred E. Cox. Moved by Rev. Wm. Phillips, seconded by Col. Spurr that the secretary be instructed to write to Hon. O. T. Daniels and Jos. Bancroft, M. P. P. asking on behalf of the Alliance that they support the resolution in favor of Provincial Prohibition to be introduced in the legislature about March 22nd.

Pastors of the county were requested to have petitions to the same effect sent to Daniels and Bancroft, circulated among the voters of their congregations. Rev. G. L. McCain and Fred E. Cox were appointed a committee to prepare the petitions.

The Secretary was instructed to write the presidents of the Liberal and Liberal Conservative associations asking that the provincial conventions name candidates for the House of Assembly who are consistent temperance men and supporters of provincial prohibition.

A plan of organization recommended by Secretary McCain in his report was adopted. It was that for carrying out the work of the Alliance the county be divided into three divisions, Annapolis Royal being the center, Bridgetown for the second and Middleton for the third, and that one of the three officers of the alliance be chosen from each district or the chairman of the members of the executive in his district. As there is no officer this year from the Middleton district Mr. McCain was chosen as chairman.

A resolution was passed in favor of a campaign of pledge signing in the county. The district chairmen and members of the executive were requested to carry on the campaign in their respective districts.—Outlook.

### Obituary.

#### MRS. ELWOOD MILBERY.

On March 1st, at her home of Hampton, Mrs. Jerusha Milbery, wife of Mr. Elwood Milbery, passed away, aged 64 years. Mrs. Milbery was a daughter of Mr. John Taylor of South Berwick. In early life she united with the Methodist church of Berwick, of which she was a consistent member till her death. For many years she was confined to her home by poor health. After a few days illness from pneumonia the end came very peacefully. She is survived by her husband and son, Lewis, who will deeply miss a loving wife and mother. She also leaves three sisters and one brother. The funeral was conducted by Rev. W. S. Smith. The interment was at Hampton.—Com.

#### ACCIDENT AT HECTANOGA.

A fatal gunning accident occurred at Hectanoga a few days ago, save the Courier, whereby Mr. Monde Saulnier, formerly employed as a steamer by Mr. George Cook of Yarmouth, has since died. Mr. Saulnier with a young man named Babine, went into the woods gunning, when the latter was stricken with epilepsy and fell discharging his gun. The contents entered Mr. Saulnier's feet, followed by blood poisoning, which resulted in his death on Wednesday night of last week. He was forty-two years of age and was a bachelor. He leaves his mother, two brothers and one sister living in Yarmouth.

### Missionary in St. James' Church Tonight

An unusually interesting missionary meeting is promised in St. James' school room this Wednesday evening. The speaker will be the Rev. B. H. A. Haslam, who has been working in India for some years. Of Mr. Haslam and his address the Rural Dean of Shelburne writes: "He will probably give you an hour's address full of information of all kinds, instructive and very fine. Interest never flags. Every member of your congregation should bear this talk, and as many others as you can get to attend. He describes several staves in a missionary's life and work and leaves the audience with prejudices removed and a very good conception of work in that part of India where he is sole missionary. He has a large number of curious illustrative of domestic life."

This conception has since been confirmed by the people of Annapolis where Mr. Haslam gave addresses on Sunday last.

The meeting will commence at 7.30 and the public are cordially invited. A silver collection will be asked to be devoted to missions.

### Rev. A. J. MacDonald Leaves For New Pastorate in Picton County

Rev. A. J. MacDonald, wife and child left on Monday for Little Harbor, Picton county, where they will in future reside. Gordon Memorial Presbyterian church was filled on Sunday morning last, many outside the regular congregation being present, showing the esteem in which the reverend gentleman is held by our citizens. On Thursday evening a farewell reception was held at the residence of W. R. Calder, being largely attended, at which a purse of \$75 was presented Mr. and Mrs. MacDonald. The reverend gentleman spoke feelingly of his regret that circumstances occasioned, his departure and of his deep attachment for the members of the church and his interest in the town in general.

Not only does Gordon Memorial church lose a scholarly preacher and spiritual guide but the town also loses a public-spirited citizen, who has devoted much time and attention to matters of civic importance, while Mrs. MacDonald's place in social and musical circles is one not easily filled. The people of Bridgetown will unite with the Monitor-Sentinel in all good wishes for Mr. and Mrs. MacDonald and the hope that Mr. MacDonald's restoration to health may be speedy.

### Fish Scarce

Dealers Say "Cods" Have Not Been So Marked in a Long Time.

Local fish dealers are still complaining of the scarcity of fish, says the St. John Times. A wholesale merchant said this morning that it was a long time since he had known conditions in the fish market to be the same as at the present time. The price, especially for wholesalers, was very high, and fish were scarce. He attributed the latter fact, he said, to bait not being plentiful, and to the weather along the coast of late being inclement, high winds, and storms serving as an obstacle to the fishermen. Not only was it becoming very difficult to supply the wholesale market in the States, but it was also being felt that the quantity of fish on hand for home consumption was none too plentiful. On account of the season of Lent, the demand at present is very great.

"Now old boy make yourself comfortable, and let's talk over old times. Haven't seen each other since we were schoolboys together. I told you I had married. Well, this is my house, and my wife will be in presently. By the way you once lived in this district, didn't you?" Returned Traveller: "Yes, lived here some years." "Then you may have met Miss Brabazon?" "Met her? I was engaged to her. But so were all the other fellows, one at a time. What has become of her?" "Was—er—I was just going to tell you that Miss Brabazon has become my wife!"

### MANUAL TRAINING

The Subject of Manual Training for Schools Discussed by Prof. Winfield S. Tucker in an Interview With a Montana City Paper.—Suggestions for Our School Board

"The main purpose of manual training is to furnish not alone a training of hand and eye, but a wide familiarity with industrial activity and to give something of a direct fitting for occupations, calling for skilled handwork, to create habits of attention and exactness, to encourage industry, perseverance and self reliance; to give to each individual pupil an opportunity to display his originality and inventive ability either in the making of a variation of the prescribed class models, or in the construction of articles of their own selection," said Winfield S. Tucker, who has charge of the manual training department of the Great Falls school in an interview with the Tribune.

"To meet this aim, the interest first, last, and all the time, must be voluntarily and enthusiastically manifested on the part of the boy. He should be permitted to construct such articles as he is most interested in within reason."

Mr. Tucker recently visited a manual training school in the vicinity of Boston, where class work was carried on by exercises. This school was equipped with every modern appliance in fact with everything a teacher's heart could wish for. The class was composed of boys from the sixth grade. An air of indifference pervaded the room. The visitor made his way among the pupils, noticing a boy perhaps fifteen or sixteen years old, who manifested a degree of disinterest in his work. He stopped and asked him what he was making.

"Oh, I'm making a worsted box," said the boy.

"Don't you care for it?"

"No."

"Do you have to make it?"

"Yes," said the boy. "I have to make it because it is the sixth article in the course."

"Well, what are you going to do with it?" inquired the visitor.

"Oh, I'm going to throw it on the floor and jump on it."

Now supposing that boy's mother said to him, "John, will you please make a box to keep my thread and worsted in," said Mr. Tucker, the boy would have replied, "Of course I will."

"The boy goes to his teacher and says, 'My mother wants me to make her a box to keep her work in. May I make it?'"

"The teacher says, 'Certainly, and you may begin it as soon as you have finished the work you are doing.' Now this boy has work which he is interested in. He is interested first because he is making it for his mother, whom he loves and whom he wishes to please, and that boy will make the best box he is able to make. He will continue to be interested in the making of that box to the day it is finished. He will give the teacher no cause to complain for lack of interest in his work, or inferior workmanship, or otherwise would be.

(page 5, second column.)

For making fine, rich, or plain food, equally valuable and saving.

# ROYAL BAKING POWDER

Indispensable For Home Baking
