The Spramotor

The only way to prevent what's past is to put a stop to it before it happens, as

Mrs. Partington would say. Many fruit-growers and farmers are induced to buy cheap sprayers, for one reason and another, and they always regret it.

Cheap sprayers are always in need of repairs, cheap sprayers are always made of iron or mostly iron, and iron sprayers are useless in copper mixtures. You would not use a cast-iron carving-knife, because it's unsuitable.

The only way to prevent this trouble is to put a stop to it before it happens, or at least before it happens again.

The **SPRAMOTORS** are the result of the best efforts of the brainiest manufacturers alive.

The **SPRAMOTORS** embody more good features than all others combined, and that is the reason of the great demand. It is not only necessary to have one good feature, but one to be in the front rank must have all the good features.

The **SPRAMOTORS** shoot mixtures stronger and evenier than any, which fact has greatly increased their sales.

The **SPRAMOTOR** will last longer than any other, and is therefore economical to buy.

The **SPRAMOTOR** is made of brass, is the result of THREE PATENTS and others pending, is carefully made and less liable to need repairs.

Many times more **SPRAMOTORS** are used today in Canada than all others combined, which is one of the best arguments why you should buy one and be up with the procession. Nearly every first-class store in this country carry **SPRAMOTORS** in stock.

All the first-class brewers in Canada are using the **SPRAMOTORS** for whitewashing and disinfecting work.

SPRAMOTORS are recognized as being the standard of the world, and they have proven it by EVERY TEST that a machine can be put to.

They cost from \$5.00 upward, and a catalogue will be mailed you on application.
