

The Canadian Horticulturist

FOR 1884.

With the January Number the CANADIAN HORTICULTURIST enters its seventh volume. The kind reception enjoyed since its commencement, seven years ago, has been very gratifying to the Directors, who began its publication with great hesitation. Its circulation has steadily increased until now we print an edition of three thousand copies. Yet this is not as large as the Magazine ought to have in this splendid fruit-growing Province. The Directors will spare no pains nor expense, that the means at their command will warrant, to make the forthcoming volume interesting and attractive. The *Colored Plates* in each number will be continued during the year, and other *Illustrations* used as freely as possible; while gentlemen of experience will contribute frequently of their stores of knowledge, so that each number shall be well filled with valuable information.

If our readers would take the trouble to call the attention of their friends to this publication and endeavour to *increase the Subscription List*, we surely might commence the seventh volume with an edition of four thousand copies. Will you not make an effort to secure this result? The Directors will be able to use any increase of means that may be secured thereby in adding to its *attractiveness* and usefulness. Your attention is called to the *premiums* offered for Clubs, and to the distribution of plants and seeds *given to all subscribers* in addition to the bound volume of the Reports of the Fruit Growers' Association and Entomological Society. These Reports are most valuable to every cultivator of even the smallest garden, whether of fruit, flowers or vegetables, and are alone well worth the subscription price.

In order to keep down expenses, the January number will be sent on the first of the month *only to those* whose subscription has been received on or before the 31st December next; but the number can be supplied from the stereotype plates to those who subscribe after that date, though there will necessarily be some delay. Please then to do all in your power to extend the circulation of our CANADIAN HORTICULTURIST, and to swell the mailing list to *four thousand* by the beginning of the new year, and send your remittances promptly so that new subscribers may receive the journal regularly from the beginning of the year.

All Subscriptions and Communications relating thereto should be sent to the Editor, D. W. BEADLE, St. Catharines, Ontario.

WM. SAUNDERS,

PRESIDENT.
