Special Notice.

Hashish, opium, alcohol, and tobacco are popular poisons which appear to concentrate their action upon the brain, and are powerful causes of disease in the perversion of the blood. An individual habituated in the use of any of these, is a machine set in destructive motion, which, if not already too much destroyed, may be repaired under the potent influence of Felt's Compound Syrup of Hypophosphites, since the disturbances disappear as the condition of the blood improves.

REPRESENTATIVE AND CHAMPION OF AMERICAN ART.

THE ALDINE:

AN ILLUSTRATED MONTHLY JOURNAL

claimed to be the

HANDSOMEST PAPER IN THE WORLD.

"Give my love to the artist workmen of THE ALDINE who are striving to make their profession worthy of admiration for beauty, as it has always been for usefulness."—Henry Ward Beecher.

THE ALDINE, while issued with all the regularity, has none of the temporary or timely interest characteristic of ordinary periodicals. It is an elegant miscellany of pure, light, and graceful literature and a collection of pictures, the rarest specimens of artistic skill, in black and white. Although each succeeding number affords a fresh pleasure to its friends, the real value and beauty of THE ALDINE will be most appreciated after it has been bound up at the close of the year. While other publications may claim superior cheapness as compared with a similar class, THE ALDINE is a unique and original conception—alone and unapproached—absolutely without competition or in the success of THE ALDINE from the start is direct proof of the currency. With a population so vast and of such varied taste, a publisher can choose his patrons, and his paper is rather indicative of his own than of the taste of the country. As a guarantee of the excellence of this department, the publishers would like to announce that the content has just completed cannot duplicate the quantity of fine paper and engravings in any other shape or number of volumes for ten times its cost.

The labor of getting THE ALDINE ready on the press is so great that reprinting is out of the question. With the exception of a small number specially reserved for binding, the edition of 1871 is nearly exhausted and it is now a scarce as well as valuable book.

The enthusiastic support so readily accorded to this enterprise, which has been introduced into the country, has convinced the publishers of the American public would recognize and heartily support any effort to elevate the tone and standing of illustrated publications. That so many weekly wicked sheets exist and thrive is no evidence that there is no market for anything better. The success of THE ALDINE from the start is direct proof of the currency.
