

"One thing is certain—in order to enable Ireland to maintain her population her agriculture must be greatly improved. Cattle, corn, poultry, pigs, eggs, butter, and salt provisions, have been, and will, probably, continue to be her chief articles of export. But beyond the food exchanged for clothing and colonial products, she will require in future a large supply of food for her own growth or produce, which the labourer should be able to buy with his wages. In effecting this great change, much good may ultimately be done. But, unless all classes co-operate, and meet the infliction of Providence with fortitude and energy, the loss of the potato will only aggravate the woes and sufferings of Ireland.

"Such, then, is the great lesson which, by the influence of the higher classes, and of such good landlords as yourself, may be taught to the Irish people."

MALIBOU FOR SHIP-BUILDING.—Lloyd's have lately made important concessions with respect to this wood, and they now allow it for every part of a ten-year's ship; and, as regards a twelve-year's ship, it may be used for the whole of the inside planking, for all the outside planking, with the exception of the wales and back-stakes, sheetrocks and plank-shear, and in the finishing, for the third futlocks and top timbers, main bolson, beams, books, and knees. As this wood is one of the best and cheapest that can be used for ship-building, it is surely the interest of the shipbuilder to avail himself of the extraordinary low price of the article. There has lately been a considerable demand for it for this purpose, and as it is daily increasing in estimation with Lloyd's, as well as in her Majesty's Dockyards; it is strongly recommended to the notice of the various private builders throughout the country.

FRENCH NAVY.—The French Government is actively employed in improving the state of its navy, and accumulating naval stores at its different dockyards. Last week, a contract was concluded by the minister of the marine for oak timber for ship-building to the amount of upwards of one million sterling. Contracts have also been taken for a large supply of coals, to be delivered both in France and in the French colonies. A French company has just concluded a contract to deliver 4,000 tons of coals in Madagascar, where it is rumored the French Government intends to send another expedition, if the disturbed state of their relations with the other states of Europe should not prove an obstacle. By the terms of the different contracts both the coals and the timber must be carried in French bottoms.—Wilder & Smith.

ALBANY, Nov. 25.—We published yesterday a brief account of the effects of the late terrible gale on Lakes Erie and Ontario. This stated that sixteen bodies floated ashore at Barcelona. The disasters and loss of life are severe; but far less than the first exaggerated account represented them. The total loss of life is six, at most, as far as heard. Ten or eleven schooners, manned with seven men each, from Marblehead, are supposed to have been lost off Newfoundland during the September gales. Two of this number are known to be wrecked, by identified fragments picked up on the water, and by one surviving man. The number of lives lost on board these vessels is 65—men and boys.—The number made widows by the calamity, 43, and 151 orphans.

The Editor of the *Courier des Etats Unis*, has just opened, in New York, and, by his agents, in almost every place of the Union, a subscription for the relief of the numerous victims of the late flood in France, who have lost some 30,000,000 of francs worth of property, thus reducing them to the most miserable condition; their homes, their all having been swept off, in the course of a few hours, and at the very beginning of winter.

MEXICO.—The United States papers give details of an attack made by a squadron under Com. Perry on the town of Tobasco, which was nearly destroyed, and several vessels were carried away. The American ships in the Pacific have also bombarded a Mexican town. The invading army under Gen. Taylor have made no further movement.

LOWER PROVINCES.—The Nova Scotia Legislature is summoned to meet on the 21st of January. The Mail-steamers Unicorn arrived at Halifax on the 15th ult., in three days from St. John's (N.B.). Buildings were going up fast, and the town was again lit by gas. Merchants were getting high wages; carpenters and masons receiving \$8. 6d. to 10s. per day. 15,000 sovereigns, being the second instalment of the grant of the British Parliament in aid of the sufferers by the fire, were received by the Unicorn.

MURDER AND ROBBERY.—The Village of Markham, twenty-two miles from Toronto, which has obtained an unenviable celebrity in connection with the depredations of the notorious "Markham Gang," was, on Friday night, the 20th ult., the scene of a horrible atrocity. A young man, named William M'Phillips, in the employ of Francis Lagan, Esq., of Toronto, and who had under his charge a store in the Village of Markham, belonging to that gentleman, was, in the course of the night, brutally murdered, and the store rifled of what cash it contained. From the evidence given at the Coroner's inquest it appears that five or six men were seen in the store on that evening; and it is supposed that they went in, ostensibly for the purpose of purchasing liquor, and perpetrated the murder while the unfortunate young man was engaged in attending to them. The store was found flooded with liquor, and poor M'Phillips was discovered lying behind the counter quite dead, with several deep cuts on his head, as if inflicted by some blunt instrument, and other wounds which had the appearance of having been produced by a hammer. On one end of the counter was found a jug with a funnel in it, containing two pints of brandy; the vessel used to measure the liquor, was lying on the floor near a barrel; deceased's cap was also lying on the floor; and the body of the deceased, when found, lay inside the counter, about two yards from the end. The skull exhibited three cuts, each an inch and a half in depth. About one hundred dollars in money, and the watch of the murdered man were carried away; no clue had yet been obtained with regard to the guilty parties.

The Montreal Journals mention the arrival, on Tuesday, the 24th ult., of Lieut. Col. the Hon. R. Bruce, brother of the Earl of Elgin; who is to fill the station of military secretary and principal aid de camp to the Governor-General of Canada.

FIRE AT MONTREAL.—The Lucifer Match Manufactory kept by a person of the name of Parson, in the open space near D'Alouche Street, Griffintown, was burnt down last week, together with Mr. Gordon's smithy adjoining.

The mills of Mr. LaChapelle, at Bord an Plouffe, in the neighbourhood of Montreal, were lately destroyed by fire: loss estimated at £2,000, and no insurance.

Three farmers coming in a canoe from the mill at Lavaltrie to Contrecoeur last week were drowned by the upsetting of the canoe in a squall. Two of them were fathers of families.

The Montreal Gazette states that a series of breaches occurred in the Welland Canal on the 19th ult., in consequence of the heavy rains about that period; and the damage is so extensive that it cannot be repaired for eight days or more. The break took place at Ramsay's Mills, below St. Catharines, where a new waste weir has been lately built of dimension too small for the body of water there entering; the canal from the Twelve Mile creek, which is subject to sudden freshets. More than 40 vessels bound downwards of a large class are detained above, and fears are expressed that they may be unable to get through this season; though great efforts were being made to repair the damage so as to allow the navigation to be resumed.

EXPORTS OF ALBANY.—From a table in the Quebec Gazette, we condense the exports from Montreal to different ports in the mother country, and the lower ports, from the opening of the navigation to the 25th Nov. 1846, as follows:—

Table with 2 columns: Commodity and Quantity. Includes Flour (705,351 barrels), Wheat (482,145 barrels), Pot and Pearl Ashes (15,051 barrels), Butter (10,295 do. and kegs), Beef and Pork (2,930 do.), Pease (153,139 minots), Beans, Peas, and Lamb-pieces (36,531 pieces).

LIBRARY ASSOCIATION.—The President, J. C. Fisher, Esq., L.L.D., has consented to deliver the first Lecture for the season on Wednesday next, to commence at 8 o'clock in the evening; subject: The Anglo Saxons.

A Special Meeting of the Relief Committee, held on Friday last, the Treasurer's statement was exhibited, showing a balance on hand, in the different Banks, of \$19,992 78c. 6d.

It was Resolved, That the President of this meeting, (Hon. L. Masson) and Messrs. W. Phillips and T. Lee, Esquires, be authorized to treat with the several Banks of this city, to keep the balance of the moneys in the hands of the different Treasurers, with a debit and credit interest account, until all the moneys shall be spent.

That the Secretary do call upon the Brick Committee to report at the next meeting of this Committee, viz: on Monday, the 6th Dec.

The unwieldy conduct of three persons of the name of Forrest, Colerton, and Kelly, in saving the lives of Mr. Alchem and family, who were upset in a boat last Thursday while attempting to cross to Pointe Levy, during a strong wind and a heavy sea, has been acknowledged by a number of merchants and other individuals who raised a sum sufficient to present each of them with a silver watch and chain, with the name of the receiver inscribed on each, and the words: "for his heroic conduct in the harbour of Quebec, on the 25th Novr. 1846."

THE WEATHER, since the snow-storm mentioned in the last Berean, has been clear and fine; and the river so free of ice that the steamers have been able until yesterday, to continue their trips to Montreal; but the mail is carried by land. Tuesday night and Wednesday were very cold, and a good deal of heating ice was to be seen yesterday in the river: the thermometer having fallen to 15° above zero.

P. S.—Rain and snow during last night and this morning.

MARITIME EXTRACTS.

The new steamer J. Mann, of the People's Line, was towed to her winter quarters at Black's Cove, last Friday.

The Quebec Forwarding Company's steamer Harmon, with three deeply laden barges in tow, arrived here last Thursday, from Kingston. She left the next day for her winter quarters with nothing in tow.

The steamer Canada arrived on Saturday afternoon, from Montreal, with four deeply laden barges in tow. We understand that the 4 barges contained, together with her own cargo, about 1000 bbls. of flour, beside a variety of other articles. The whole has been landed, and the Canada left on Sunday with the barges for her winter quarters at Sorel.

The steamers Montreal and Quebec came in on Sunday from Montreal; the former boat, and the Rowland Hill left on Monday for Montreal. The only vessel that remained in port to clear (brig Minna, Capt. Toboy,) and which commenced to load last Thursday night, completed her cargo on Friday afternoon, and sailed at 9 o'clock the same evening for Newfoundland. The repairs required by the brig Marquis of Normandy were all completed on Monday afternoon, and she left for sea.

The Steamship St. George returned here on Friday night, from taking up the buoys in the Traverse, &c. She brought up Captain Julian and the party of Police who had gone down to the ship Calcutta, whose crew had refused to proceed in her. They report that the crew had returned to their duty, and they left her off Kamouaska, at anchor, last Wednesday, all well. The Capt. of the St. George reports having seen on Thursday, a vessel ashore at L'Islet, which proves to be the Harland for Bristol.

The St. George proceeded down again on Saturday for the Traverse, to take up the remainder of the buoys, not having been able to take them all up before, on account of the tempestuous state of the weather. She returned on Monday morning at 4 o'clock, and reports having seen but one vessel, a brig, at anchor off Crane Island.

Letters from below report three vessels ashore near Matane: the ships Morsey, Reliance, and Empire. They went ashore during an easterly gale, and fears are entertained that many others have shared the same fate.

The bark Faughy-Balagh, Broughall, from Dublin, for Quebec, put in at St. John, N. B., on the 13th inst., and reports that when off St. Paul's on the 29th Oct., came in contact with the Hero, of Liverpool, which vessel sunk in a few minutes—crew saved, with the exception of the carpenter, and one man killed in the fore-castle; the F. lost bowsprit, cutwater, foretopmast, water ways, covering board, and staunchions tore up on the larboard side;

making 2 feet water per hour. The crew were on an allowance of water, having only 90 gallons.

"Mr. J. E. Muncy, Agent for Lloyd's at the Magdalen Isles, informs us that a boat was picked up on the 10th inst. at the west Point of the Magdalen Isles, belonging to the ship Caroline, Harris, master, of Poole, together with the main-boom, part of cabin fittings, bulwarks, chairs, &c. It is supposed the ship has been cast away on or near the Magdalen Isles or at Anticosti.—The Caroline, Harris, was cleared at Quebec on the 21st Oct. Inst.

During the season of navigation which has just closed, there have arrived at Quebec, from sea, 1439 vessels, forming an aggregate of 573,398 tons; the crews of these vessels average about 15 men each, making 21585 seamen. Of these—including new vessels—1362 have cleared at Quebec, 90 of which were from Montreal, having partly loaded there, and had to have the remainder of their cargoes brought down in lighters owing to the shallowness of Lake St. Peter, and consequently had to re-clear here; thus leaving 1272 that have loaded at Quebec.

There were 20 vessels built at Quebec, during the year ended 1st ultimo, forming an aggregate of 19,754 tons; of these 21 were square rigged, forming 19,209 tons, which added to the tonnage of arrivals this year, 573,398, makes a total of 592,577 of shipping that have loaded in the ports of Quebec and Montreal, this year.

The following is an extract of a letter received by Mr. W. Henry, from Capt. Conway, dated on board the ship Agnes, 27th ult., off the Brandy Point:—

"In consequence of the dreadful state of the weather, and the ship being one solid mass of ice, I was forced to slip my larboard chain at the 60 fathom shackle, as my windlass was broken and I could not weigh my anchor. I leave 12 ships at anchor at this place, the greater part of which, I expect, will have to follow my example—Nothing better could be done for the safety of the ship. It blows a gale, and the pilot will have much trouble to land.—He has been very active and steady.

The Bark Andrian is said to be ashore below Matane. The Mercury and Empire will probably be total wrecks. The Rockshire parted with both her anchors in the Traverse, and was running before a westerly gale when the pilot left her on Friday last. The big Lion with a cargo of flour for Glasgow put back on Tuesday, making six inches of water an hour, and will winter here.

The Steamer N. America arrived on Tuesday night with 3 barges laden with flour: the Princess on Wednesday morning, and the R. Hill yesterday afternoon from Montreal: they have all gone to their winter quarters.

Halifax, Nov. 15.—Schr. Wm. Smith O'Brien, in 11 days, from Quebec. 16.—Schr. Collector, Lavache, 13 days, from do.

BIRTH. At "The Refuge," Sorel, on the 17th ult., Mrs. Antrobus, of a daughter. In Montreal, on Thursday, the 26th ult., Mrs. William Lovell, of a son.

HARDWARE. No. 20, HARDWARE! FABRIQUE STREET.

MORVILLE & BLIGHT,

BEING respectfully to inform their friends and the public, that they have now received their Fall supplies, comprising a very general and well selected assortment, which they will dispose of on the lowest terms for CASH or approved credit.

COOKING STOVES.

THE Subscriber has now on hand a complete assortment of Cooking, Parlour, and other fancy Stoves, from the well known manufactory of Wm. Rudden, Montreal. The superiority of these Stoves is now so generally admitted that they require no puffing. Their strength, beauty, and thickness of metal offer great advantages over the thin American Stoves, which invariably warp when exposed to the heat required in this climate.

HENRY S. SCOTT, Upper Town Market. N. B. A few American Cooking Stoves on hand, will be sold at much reduced prices to close them.

THOMAS ANDREWS.

DEGS to thank the Military and Gentry of Quebec, and the public generally, for the patronage with which he has been favoured since he commenced business; and hopes a continuance of the same. Always on hand a general assortment of Kitchen Utensils; and every description of TIN-WARE made to order.

THE undersigned would invite attention to the following English and American publications:
