IN POINT OF REGULATION NO ENGINE IN THE WORLD EVER EXCELLED THE McEWEN.

IN such service as driving generators for electric lighting and railway service, electric crane or mine haulage, or any service where the variation of load is sudden and intense, the close governing of an engine is especially necessary. For sudden variation of load no high speed engine has ever approached the **McEWEN** in quick and close governing. . . . To show our confidence in its superiority as a close governing engine we offer with every McEwen Engine, the following guarantee:—

"The engine shall not run one revolution slower when fully loaded than when running empty, and a reduction of boiler pressure from the greatest to that necessary to do the work will not reduce the speed of the engine one revolution. Any engine failing to meet this guarantee becomes the property of the purchaser upon the payment of One Dollar."

No engine builder ever before gave such a rigid guarantee. No engine ever equalled the McEwen in rapid and close governing.
