Marketing Profile

General Conveyor Company, founded in 1949, is a leading designer and manufacturer of conveying and material handling equipment. The company specializes in standard and custom designed equipment for food, pharmaceutical, aerosol and injection moulding industries. The continuous Research and Development and Quality Control programs implemented in the designing and manufacturing of machinery have given the company the leading edge in the packaging industry.

General Conveyor has been exporting machinery for more than twenty years. The company has earned a solid reputation in the international market for quality machinery and after sales service. During the last four year period, export sales have doubled.

In the two manufacturing facilities located in Aurora, Ontario, the company designs and manufactures bulk cereal handling systems, meat and meat product handling systems, pharmaceutical conveying and accumulating systems, lane dividing, diverting and converging systems, aerosol can-testing systems etc. Most of the above mentioned systems are manufactured as sanitary and wash-down systems. The Research and Development division of the company designs many other special machinery for customers' specific requirements.

General Conveyor is in the process of setting up an Agency/Distributor network worldwide. The firm has technical staff who are fluent in Japanese, German, French & Spanish. The company is seeking to extend its export market in Europe, Asia, South America & the United States.

Products/Services Available for Export:

Bulk Food Handling Systems
Palletizing Systems
Lane Diverting, Converging Systems (Heavy/Light Duty)
Can Testing Systems
