

APPLICATION PROCEDURE

The attached questionnaire must be completed.

This questionnaire has been developed to enable the applicant to explain:

- a) how the proposed activity would lead to identify, establish or promote one or more joint research and technology development projects with Europe; and
- b) how scientific or technological progress of possible industrial or economic benefit to Canada could derive from these projects.

Your completed questionnaire will provide us with a description of the methodology used in the activity, the names of persons and organizations affected in Canada and Europe, a workplan, timetable and the expected results.

If your application is accepted, an agreement will be proposed for signature by the applicant and Foreign Affairs and International Trade (FAIT). The agreement will ask, among other things, that the applicant at the end of the proposed activity, produce a report on the fulfilment of the objectives and results in terms of joint projects.
