## **40 Business Services**

Canada is good for your bottom line. Businesses looking for better ways to manage their finances, employees and technology need look no further.

## **48 Wind Energy**

The answer is in the wind. Because of its integration into the North American power grid and operating costs significantly lower than in the United States, firms investing in the Canadian wind energy sector will see better margins for their generated power.

## **50 Biomass**

Canada's strong forest products sector naturally fuels its biomass co-generation potential.

## **51 Photonics**

It's no optical illusion—Canada doesn't take its prowess in photonics lightly.

## **52 Plastics and Chemicals**

Nine of the world's largest plastics and chemicals companies have a production or R&D facility in Canada. See how Canada is transforming the global plastics and chemicals industry.
