**EVA BOOTH VISITS TOMBS BELIEVES NAN IS INNOCENT**  
 What Good Women Think of Accused Actress—Dr. O'Hanlon Also Swallows His Testimony Now.

New York, May 6.—Miss Eva Booth, head of the Salvation Army in the United States, called at the Tombs prison today and had a long conference with Nan Patterson.

After the interview had ended, Miss Booth said: "I do not believe that girl is a murderer. She is built from better material than is usually found in persons who commit such crimes. I certainly believe her innocent of the murder of Charles Young."

Margaret E. Sangster, the author, once editor of Harper's Bazaar, and whose books and novels point a moral to a true and noble life, also interviewed Nan, and says:

"She strikes me, indeed, as a creature without much depth of thought, feeling or purpose—whose will would not serve her in an emergency; just one of those inconsequent women who are at the mercy of any impulse. She probably has no deep convictions about virtue or vice, or if she had them, they have gone down under the pressure of her life. But she does not seem one who needs always to be wronged, or who seems so childish that one does not despair of her salvation. Yet, whatever life may be before her, she can never emerge from the obliquity, nor the recollection of the dreary eleven months that the law's hand has compelled her to pass."

"The state might be in better shape than to engage in crushing a butterfly like this beneath the wheels of its great juggernaut. It would never be possible to convict her of the crime of which she has been accused. She is herself the best refutation of the charge against her."

Dr. O'Hanlon, the coroner's physician who testified for the prosecution in all three of the trials, in the presence of clerks and several other persons in the coroner's office today, said: "Now that the trial is over, I feel free to say that all along I believed that the revolver which fired the bullet was in the hands of Young. My reason is from the powder marks I found on one of Young's fingers on the day he was killed."

**CONGRESS IN THE HANDS OF RECIPROCAL LINES**

Altho U.S. is in Immediate Danger of Diminished Trade, According to Governor Cummins.

Chicago, May 6.—Governor Cummins of Iowa, at a luncheon given by the Chicago Commercial Association, in honor of foreign consuls today, discussed at some length the tariff question in several of his phases.

In speaking of the need for better reciprocity treaties between the United States and foreign countries, Governor Cummins pointed out that he considered dangers of a diminished trade for America, if treaties are not effected.

"Canada has been making a big thing out of our doors for years for fair trade, and we have blindly rejected her advances until now, I fear, the door of opportunity is forever closed. A few years ago we were making a big thing out of our doors for years for fair trade, and we have blindly rejected her advances until now, I fear, the door of opportunity is forever closed. A few years ago we were making a big thing out of our doors for years for fair trade, and we have blindly rejected her advances until now, I fear, the door of opportunity is forever closed."

"We are now threatened with entire exclusion from the markets of Germany unless we take the subject of reciprocal trade and make some fair bargain with that nation."

"At this time, Congress is unalterably, inflexibly and indubitably opposed to any change whatsoever. Therefore, if you desire an opportunity to hold a reasonable conference with respect to change in the law, you must substitute men who will do something for men who are determined to do nothing."

**GONE AGAIN.**

Pat Crowe, after visiting newspaper, disappears from Police.

He was just about to be released when he was arrested by police.

As mysteriously as his open return to Chicago, Crowe left the World-Herald he remarked that he was going to Omaha, Neb., but he could not be found there today.

Both a sudden disappearance and a kidnapping, father of the boy that was kidnapped, were emphatic in their declarations that Crowe would be tried if found.

**SETTLEMENT OF THE WEST.**

Regina, N.W.T., May 7.—(Special.)—Predictions that this year's immigration would greatly exceed all former years are being rapidly verified. In the last few days, and also all branches of industry are busy in Regina, there is no place that can compare in the West with the Dominion lands office. A large staff of officials and clerks is kept constantly busy and over-time work is necessary.

Homeless entries for the last month totaled 1311, which means that no less than 177,660 acres of land were taken up by actual settlers in the Regina land registration district.

In April of last year entries only numbered 578.

The pre-eminent position of the in the estimation of our best musicians and music-lovers has been attained and is maintained by an unswerving adherence to the principle of **NOTHING BUT THE BEST.**

Beyond even this we have the disposition never to be content with "well enough"—we are the severest critics of our own product, assuring the purchaser the highest degree of permanent satisfaction.

188 Yonge Street, Toronto.  
 "It affords me a great deal of pleasure to add my word of appreciation of your Gourlay Piano. Having had two of them in use for nearly two years, I have had abundant opportunity of proving their excellent qualities. Without attempting to enumerate them in detail, I would simply say that in your piano I feel that you have been particularly happy in combining those mechanical and artistic qualities which go to make up the ideal instrument. I wish you every possible success."

Yours very truly, G. D. ATKINSON.

**HOSPITAL JAIL FOR DRUNKS.**

New York to Have New Place of Detention for "Habitués."

New York, May 6.—Magistrate Pool received a message from Albany last night informing him that the legislature had passed the bill he had caused to be introduced providing for the establishment of a hospital in this city to which a city magistrate or supreme court justice may commit for treatment of males or females who are habitually intoxicated or who are made incompetent or dangerous from the use of opium, chloral, cocaine or other narcotics.

Commitment may be for a term less than a year on complaint of a father, mother, sister or brother, or of a child against its parent, or a guardian. The hospital is to be under a staff of three physicians, one of whom shall be the chief physician and will receive a salary of \$6000 a year. The other two will be \$3000 a year each. The building and its site will be paid for from excise money.

The new institution will be a novelty in New York and will meet the needs of the city in a way that there is no place to which a magistrate can send habitual drunkards and dope fiends.

It was declared positively, until the grand jury completes its work.

**REGULATING RAILWAY RATES GOVERNMENT ABLE TO DO IT**

Attorney General of United States Says Privilege is Constitutional—Courts However Can Arbitrate.

Washington, May 6.—In a long opinion on the question of railroad charges, given in response to a request by Senator Stephen B. Ekins, chairman of the senate committee on interstate commerce, Attorney-General Moody considers the governmental power to regulate the operation of railroads, especially in the respect of fixing rates for transportation, by whom that power, so far as its extent in the national government may be exercised constitutionally, and what limits to the power, if any, are prescribed by the constitution. The opinion, which is exhaustive, cites many cases dealing with railroad regulation from the time the matter was first tested, and quotes at length from the decisions of state and federal courts. Summing up, the attorney-general arrives at the following conclusions:

1. There is a governmental power to fix maximum future charges of carriers by railroad, vested in the legislature of the States with regard to transportation exclusively within the States, and vested in congress with regard to all other transportation.

2. Aikto legislative power, properly speaking, cannot be delegated, the law-making body having enacted into law the standard of charges which shall control, may intrust to an administrative body not exercising in the true sense judicial power the duty to fix rates in conformity with that standard.

3. The rate-making power is not a judicial function and cannot be conferred constitutionally upon the courts of the United States, either by way of original or appellate jurisdiction.

4. The courts, however, have the power to investigate any rate or rates fixed by legislative authority and to determine whether they are such as would be confiscatory of the property of the carrier, and if they are judicially found to be confiscatory in their effect, to restrain their enforcement.

5. Any law which attempts to deprive the courts of this power is unconstitutional.

6. Any regulation of land transportation, however derived, would seem to be so indirect in its effect upon the ports that it could not constitute a commerce within the meaning of article 1, section 9, paragraph 6 of the constitution, even though the result in a way charge on tonnage per mile would from the ports of the different states.

7. Reasonable, just and impartial rates determined by legislative authority, within the prohibition of article 1, section 9, paragraph 6 of the constitution, even though the result in a way charge on tonnage per mile would from the ports of the different states.

**PROUD FATHER'S REWARD.**

Paris, May 7.—After many years' effort, Senator Plot, apostle of the reform of France, has scored a diplomatic success. He has just obtained the tobacco license for a road between the city of Paris and the city of Lyons. The license was given by M. Rouvier, the premier and minister of finance.

The step is important in view of the fact that such licenses constitute government patronage, and the number of applications from officers and widows and others is enormous.

**Russian Spy is Fined \$250.**

Singapore, Straits Settlements, May 6.—Vladimir Antonovitch, the alleged Russian spy who carried a passport in his name, was arrested on the island of Brani and arraigned in Singapore April 25 on the charge of being on government property without authority. He was sentenced to-day to three months' imprisonment for trespassing and was fined \$250 for being found in possession of sketching materials in a fortified place. Antonovitch has given notice of an appeal.

**Paris Shivers in May.**

Paris, May 7.—The merry month of May sadly bides its name in Paris this year. Rain, gales and storms make it more like November. The sun is bright enough when it deigns to shine, but this has been at rare intervals. Damp weather and low temperature have given no inducement for a display of light dresses, and furs are again to be seen. Outdoor functions, naturally, have suffered, but the two fine art salons have been well patronized. In the country farmers complain of crops and vines jeopardized unless dry, warm weather soon returns.

**Value of French Art Treasures.**

London, May 7.—The French prefects have received instructions to take inventories of the art treasures of all the prefectures. The exact value of these is unknown, but it is immense, and has been computed at \$400,000,000, reckoning only the reliquaries, pictures, tapestries and things of like kind. If the statues, altars, stained glass windows, etc., are included, it is estimated that the figure will reach \$1,200,000,000.

**THE LATE J. C. CONNORS.**

New York, May 6.—There will, in all probability, be no more performances at the Belasco Theatre this season. Last night the theatre was dark. It was stated that on Thursday night, as Mrs. Carter was stepping from his carriage to the sidewalk, to enter the theatre, the horses started, so that her foot descended heavily, and she wrenched three tendons in her left ankle. She went thru the performance suffering great pain, and fainting once, but refused to give up. Yesterday she could not move without crutches, and the theatre had to be closed.

Ellis Ashmead Bartlett, the famous naturalist and lecturer, if thirty or forty years of age, arrived in Toronto this morning. Tomorrow evening he delivers his notable lecture on "The Great Conflict at Massey Hall." Mr. Bartlett is a fluent and easy speaker, and his lecture is illustrated by some one hundred photographs, most of which were taken by himself.

The lecture begins with observations on the feeling in Japan about Port Arthur, and the renewal of attacks in September and October. Then follows November, a month of terrible fighting, and a very vivid description of the terrible conflict for the possession of the 203 Metre Hill. The midnight struggles in December are next touched upon, and then the final advance of the Japanese and the capitulation.

Adele Ritchie is going into vaudeville and will make her first appearance at Hornerstein's Victoria Theatre on May 15.

As all cities between Denver and San Francisco are closed to Mrs. Fiske and her company, who are now on the road, she has accepted an invitation to deliver a lecture on the theatrical situation in Salt Lake City on May 23. Mrs. Fiske's representative says the lecture is to be given in a church.
