In due course of time I received your March 21st letter. As you doubtless have well imagined, I have been too busy to answer, nor did I wish to do so until I could give you settled or fixed information. Since I wrote last I have been all over the island; in every Prov-The Site Consists of 640 area ince, and a great deal on horseback, and at an expense to me of a great hundred dollars; well invested, I think, however, as the future will show. I have looked into and studied, with the light of my well as location and am well Mexican experience, every industry as well as location, and am well satisfied with what I accomplished. I will not take time to tell you It is situated on a slight elevation, sloping from the centre on either side to-

wards the sea, chosen very be who studied it with an understanding eye.

And I have secured what will just suit you and any of your friends carefully by the members who are located in the same manner you outline in your March 21st

Santiago Province I find most tropical, most mouniainous, least view toward insuring per-fect drainage. The loca-for an American of small or average means, and only large entertion is well suited to the prises undertaken in mining, sugar, timber lands and cattle, but nodevelopment of a thriving thing that interested men of our limited capital at the present time. The very best opportunities, however, for large enterprises. Conditions in every way more nearly approached Mexico than any other

Puerto Principe Province is par excellence the cattle Province; ed by many avenues and a grand boulevard. The arrangement is effective, and me enough for suggesting he locate in Cuba. was at Batavia, is delighted with his cattle ranch, and can't thank

Mrs. Kummel has now been visiting them some three weeks, and I spent a few days on their plantation at Hatuey.

Much timber is being taken out of Puerto Principe Province by royal palms, there will be American companies, and some large fruit farms are being put in by what I consider misguided American companies. Some large American colonies have also located here, because the promoters bought land cheap and the colonists mostly were suckers. What many colonists have gone through would make angels weep, and I where otherwise surveyed, None of that in mine, thank you; and for big enterprises I am blocked

at present through lack of funds or backing.

Santa Clara Province and Matanzas Province are the great sugar producing sections, and, while beautiful in their way, proved unattractive, as I am unable yet to take up a sugar proposition, although

your choice. Only a limit to \$75 an acre, and good locations hard to get. Generally speaking, ed number will be sold at one can consider land has advanced 300 per cent. in the three years

Trips to lands and American colonies in Pinar del Rio Province families have purchased plantations from our Company and are going to canized and most congenial to northern settlers, and sooner or later, I felt I would there find what I wanted. And fortune has favored me. The same quality of lands can't be bought in Cuba for less than \$50 per acre any less than \$50 per acr three weeks, and as they have been investing in Cuba the past five years, I deemed myself in great good luck to have such assisttial lots will be sold rapid-ly, so don't let this oppor-tunity pass; it is a chance in a life time. The same

have already located for

a bay at the western end of Pinar del Rio Province, and town (La Fe).

Name of the bay is Guadiana. We are located six miles from this town and on this bay. This is all the Vuelta Abajo country, the nesses an American can get into in Cuba who has money enough to richest tobacco country in the world. A company has bought 70,000 develop a 20-acre grove. acres on this bay and expects to build a town site and colonize Americans. I predict it will be the most successful and pleasantest colony on the island, and we all three not only located in the neighborhood, but each one of us bought four town lots at \$1.00 a foot on the beautiful beach. This beach of pure white sand, slopes gradually out in the bay, making an ideal spot for women and children to bathe, as fully a block extends before one can get over their depth. Furthermore, there are no coral rocks, stingarees nor sharks. The town is to be located on a tongue of the land extending into the bay, and peopled entirely by Americans. Now a sandy beach in Cuba is a very difficult thing to find. Usually the shore is marshy and muddy and covered with mangrove growth, extending far out, or rocky and precipitous. When the forty miles of railroad is completed to the bay, I predict a great winter bathing resort for Americans and a summer one for

Cubans, as the Cubans only sea bathe in the summer time So absolutely lacking are bathing beaches in Cuba in general, and Havana especially, that I felt warranted in writing the company as follows, on their request as to my opinions of their town site and

"Needless to say, with the advantage of a previous inspection of Cuba and my past experience in Mexico, coupled with the present careful investigation of the entire island, I think I know a good thing

"My judgment tells me you have all the conditions favorable for making this the banner colony of Cuba. You have here a town site and a sandy bathing beach for women and children, coupled with present, as well as future, transportation facilities that will make this a paradise for the colonist, the tourist, the yachtsman, the fisherman and the invalid. I have seen nothing like it anywhere else in Cuba. Your beautiful bay and bathing beach compares favorably with the finest of our northern resorts."

When the town site company is ready to put the thing on the market, which they will do shortly, and people get on to the facts in the matter, there will be a great sale. At present only the surveyors producer, and a man with a family can be well supported. I can concord that your land and planting the matter, there will be a great sale. At present only the surveyors producer, and a man with a family can be well supported. I can concord that your land and planting the matter, there will be a great sale. At present only the surveyors producer, and a man with a family can be well supported. I can concord the surveyors producer, and a man with a family can be well supported. I can concord the surveyors producer, and a man with a family can be well supported. I can concord the surveyors producer, and a man with a family can be well supported. are at work, outsiders are discouraged from coming, no preparations being yet made to receive them. Our lots were not yet staked out; we indicated the places on their drawing in connection with the lay some day expecting to do so, as time develops and my roots have of the land. Great big pine trees grow all over the town site, and as and trips to the north when desired. By the way, C taken deeper growth on my adopted Cuban soil.

The company is going to build a hotel, well, wharf, church, amuse the insectable in Mexico. taken deeper growth on my adopted Cuban soil.

Havana and Pinar del Rio Provinces remained, with a multitude of enterprises and opportunities to investigate. Vegetable raising for the northern markets, while this year very profitable, due to the northern markets, while this year very profitable, due to the pricese in the south, never has interested me. Pineapples a splendid business, but lands have so advanced I hated like sixty to pay the prices prevailing, knowing what I could have bought them for three years ago, when here last; \$20 an acre land then, now commands \$45 years ago, when here last; \$20 an acre land then, now commands \$45 through an open forest of his pine trees through which you can drive commence as soon as I have arranged for my practical in an American community, all raising kindred products, there would be no trouble nor danger of the work stopping. I have arranged for my practical at the present price of \$1 a front fcot, was too good a bargain to let slip. My property lies inland, distant about six miles, through and impassable, the ride being men, and are used they build the hotel of pine logs.

In case of my death, the plantation being located in an American community, all raising kindred products, there would be no trouble nor danger of the work stopping. I have arranged for my practical at the present price of \$1 a front fcot, was too good a bargain to let slip. My property lies inland, distant about six miles, through sandy curable, budded on sour orange stock, and Cuban-grown by Florida men, and are used they bear from my northern friends. through an open forest of big pine trees, through which you can drive in any direction with horse and buggy. It lies along a fresh water,

estate.

On the first day of June we shall issue ten thousand acres at \$20.00 per acre; after that amount is sold a further issue of ten thousand acres will be issued at solong ten thousand acres at \$20.00 per acre; after that amount is sold a further issue of ten thousand acres will be issued at solong ten thousand acres at \$20.00 per acre; after that amount is sold a further issue of ten thousand acres will be issued at solong ten thousand acres at \$20.00 per acre; after that amount is sold a further issue of ten thousand acres at \$20.00 per acre; after that amount is sold a further issue of ten thousand acres at \$20.00 per acre; after the winth the fall is the best time to plant the steamers take the course inside the coral reefs, which break what I wanted. And I ortule has take the course inside the coral reefs, which break what I wanted has the course inside the coral reefs, which break what I wanted in the steamers take the course inside the coral reefs, which break what I wanted has on the steamers take the course inside the coral reefs, which break what I wanted has on the steamers and labor.

The plantation can be incorporated, or not, as the five or not, to Guane on horseback over a flat country, presenting no railroad difficulties, and over a road over which I could have driven in an automobile without much difficulty, and from Guane to San Juan y Martinez we rode in a Cuban volante, or carriage. We met and had a long talk with the surveyor at work on the railroad. The whole country is the famous tobacco country, and as Cuba increases in population and wealth, will blossom like the rose, as this is a rapidly developing five years, I deemed myself in great good luck to have such assistance. One thing we wanted was land so situated as to be independent of any one railroad, a difficult matter in hunting for fruit lands. We wanted no railroad dictation in ours, if we could possibly avoid the experience of Florida and California growers in that respect. Then we had a certain Cuban soil in view, as five years of experience has taught the Americans that what raises excellent cane, etc., etc., or oranges in carload lots is 90 cents on oranges. American duty is see I neglected to mention these colony propositions throughout the safety of his investment and points, hence you see the duty does not affect us much. To Canadian are selling their lands as a rule at from \$30.00 to \$70.00 and acre. I saw one advertised at \$18.00 which failed and another at the famous tobacco country, and as Cuba increases in population and wealth, will blossom like the rose, as this is a rapidly developing island. The steamship company gave us a rate of 7 cents a box on oranges and pineapples to Havana, and from Havana to New York steamer, his month of vacation exposition below the "frost points, hence you see the duty does not affect us much. To Canadian are selling their lands as a rule at from \$30.00 to \$70.00 and acre. I saw one advertised at \$18.00 which failed and another at the famous tobacco country, and as Cuba increases in population and wealth, will blossom like the rose, as this is a rapidly developing island. The steamship company gave us a rate of 7 cents a box on oranges or and pineapples to Havana, and from Havana to New York steamer, his month of vacation to variety or and this morning saw Mr.

The famous tobacco country, and as Cuba increases in population.

We reached town night befo So rich is the soil of Cultivating the rich soils far offsetting the richness of the soil, which is another illustration that lands should be purchased taking into consideration the crop desired. Then again, we wished to consider the fruit and vegetables that a family can consume.

I have seen all kinds men are coming there fast, as past winter's freezes have again med them disgusted. Mr. — having lost his entire fortune by a formed consideration the crop desired. Then again, we wished to consider them disgusted. Mr. — having lost his entire fortune by a formed freeze in Florida. Mr. — who, as I mentioned before, is a pastor of the Presbyterian church at — Canada, tells me he carries no life insurance, as he has always found oranges a better in the consideration that a family can consume.

Finally, in order to not make this letter a manuscript, we found and, after five years of Cuban investments of orange grovwhat pleased each of us to such an extent we all three bought individually of the very best orange and fruit locations in the Island of Cuba. If you will turn to your Cuban map, you will perhaps notice a bay at the western end of Piner del Piner

Mr. —, of Cincinnati, who has a large pineapple and orange plantation at Arroyo Boyeros, has been selling his pineapples this year up to date at \$4.00 a crate, and from 200 to 300 crates to the acre. His oranges have brought \$2.50 to \$4.50 a hox and his grange. acre. His oranges have brought \$3.50 to \$4.50 a box and his grapefruit \$4.50 to \$8.00. It is the belief of all practical orangemen on the gives it agricultural advanisland that Pinar del Rio Province will become as famous for its oranges as it has for its tobacco, the Vuelta Abajo. I want you and your friends and my friends to join me in de-

veloping 100 acres so that each of us will own a 10 or 20-acre grove.

There are several large orange plantations at present, in size from 1,000 to 3,000 acres, and they are selling and developing groves at from \$100 to \$150 an acre a year for the five years it is necessary.

Every acre of tillable land I can do it, and have an expert orangeman in charge for \$70.00 an acre, besides giving it my own attention much of the time, as I shall locate in Havana, handling city real estate, farm lands and insurance. The land will cost us \$30.00 an acre for the purchase, and then \$70.00 an acre each for five years, after which our oranges will be selling instance), it is worth \$1000. and no more payments will be required. I agreed to thereafter man age the plantation, paying all expenses, taxes and otherwise, employ ing capable orangemen, harvesting and marketing the crop, distributing annually the net proceeds thereof to the members of the company for 10 per cent, of the net profits arising therefrom for a period of fifteen years. After that period each holder would have to manage his own 10 or 20 acres, unless new arrangements were made. Should there he any lenger or withdrawale response to the company of the company are applied to the company of there be any lapses or withdrawals, so that no money was forthcom ing, the holder to surrender all payments and ownership in land to the general fund, which would then be divided among the paid-up members. You, as a lawyer, could doubtless put this in a better legal have TWENTY-FIVE PER form than I have stated it. That you get the sense of it is the main thing. I want no member to hold less than 10 acres of land, as less than that would not make him a living, and would much prefer that VALUATION — that is of we all hold 20 acres, which means \$600 individually for the land and \$1,400 a year for cultivation. A 20-acre orange grove is a fine income

ceive of nothing more attractive than a 20-acre orange grove, located as above described, and a home at this town site, with all the advantages there offered of society, bathing, hunting, fishing, sailing and trips to the north when desired. By the way, Cuba does not have

commence as soon as I hear from my northern friends. My heart is pies, Lemons and Limes, grow in this, as this means my start on Cuban soil, the goal of my ambi-In any direction with horse and buggy. It lies along a fresh water, navigable stream, only two miles from the bay. Hence, I shall be able to haul to town or ship by boat. The land itself is very deep, sandy loam, and reminds me much of the tobacco lands of Santa Rosa, in Mexico, which land you will recall as the best you saw there. It has many royal palms on it at present and no pine trees.

The Havana steamers will put on as rapidly as the country develops additional steamship service. They make the trip, 130 miles, at present four times a month, and the trip is a pleasant one always, and the steamers take the course inside the course register which break.

The plantation can be fruit per tree, and \$2.50 to \$3.00 is a good price as an average; 100 trees to the acre, and \$2.50 to \$3.00 is a good price as an average; 100 trees to 5 boxes x \$2.50—\$1,250 Freight and duty, carry vegetables —Potatoes, Beans, Peas, Tomatoes, Cu-\$500, cost of cultivation \$70.00, cost of boxes, packing, etc., \$110.00, leaving a net profit of \$570.00 an acre. When it becomes necessary to fertilize the land, this net profit would be reduced by cost of fertilize and labor.

The plantation can be good of my ambition, and I see success in big letters for all of us.

A producing grove will give five to ten boxes of fruit per tree, beans, Peas, Tomatoes, Cu-\$500, cost of cultivation \$70.00, cost of boxes, packing, etc., \$110.00, leaving a net profit of \$570.00 an acre. When it becomes necessary to fertilize the land, this net profit would be reduced by cost of fertilize and labor.

The plantation can be good of my ambition, and I see success in big letters for all of us.

A producing grove will give five to ten boxes of fruit per tree, a producing grove will give five to ten boxes of fruit per tree, a producing grove will give five to ten boxes of fruit per tree, a producing grove will give five to ten boxes of fruit per tree, a producing grove will give five to ten boxes of fruit per tree, a producing grove will give five to ten boxes of fru

want to get the land cleared, tools and mules purchased and nouse built, and, therefore, have little time to lose.

You may show this letter to whomsoever you wish, and any of your friends I would welcome to join us I am submitting this to my relatives and friends, and do not anticipate any delay or trouble in putting it through at once, and can procure more land adjoining if I

has taught the Americans that what raises excellent cane, etc., etc., or oranges in carload lots is 50 cents to New 1018 and all eastern does not always serve for fruit.

The tendency now is to avoid the heavy, rich, sticky soils and secure sandy, friable lands for fruit culture. The heavy expense of cultivating the rich soils far offsetting the richness of the soil, which cultivating the richness of the soil, which also failed, and proved to have nothing but swamp land. In the secure sandy, friable lands for fruit culture. The heavy expense of cultivating the richness of the soil, which also failed, and proved to have nothing but swamp land. In the secure sandy, friable lands for fruit culture. The heavy expense of cultivating the richness of the soil, which also failed, and proved to have nothing but swamp land. In the secure sandy, friable lands for fruit culture. The heavy expense of cultivating the richness of the soil, which are coming here fast, as past winter's freezes have again made to receive the secure sandy.
