### RUSSIA LOST IF ABANDONED BY THE ALLIES

Captain Stairs of Nova Scotia, Just Returned, Speaks of Conditions

#### THE ALTERNATIVES

Go in and Make Good Job of it or Let Country be Given up to Slaughter—Condition of Prisoners Reported Desperate

Victoria, B. C., March 13.—"When I left Siberia, the situation in that country was frightfully complicated," said Captain Stairs, a Canadian officer who for the last three months has been attached to the British intelligence staff at Vladivostok yesterday.

Captain Stairs, who saw considerable service in Flanders with the 29th (Hull-fax) battalion before going to Siberia, is accompanied by Captain Martini, a Polish officer who graduated from a military school under the supervision of Captain Stairs near Vladivostok.

"If the Allies withdraw," he said, "all hope will be gone. The Bolsheviks are in the minority, but the army, while ruthless, is well trained and fairly well equipped. You must get away from the idea that it is an armed rabble.

"There is only one thing to do," he added, "and that is to make a good job of it or let them alone and give up the country to slaughter. If the Russian Red Cross would assume charge of the prisoners in Siberia, the situation would be different. Five carloads of supplies have already been shipped for the prisoners, and the Red Cross is necessary to relieve 200,000 enemy prisoners and 800,000 returning Russians.

The British Red Cross staff in Siberia has been demobilized and the Canadians are carrying on the work.

(By W. E. Pepler, Canadian Press correspondent)—The desperate condition of enemy prisoners and returned Russian soldiers in Siberia has been the subject of the attention of the British and Canadian authorities and proposals are now under consideration by the Canadian Red Cross would assume charge of the situation. Five carloads of supplies have already been shipped for the prisoners, and the Red Cross is necessary to relieve 200,000 enemy prisoners and 800,000 returning Russians.

#### HARDWARE AND METAL PRICES

(Hardware and Metal, March 8.)  
A further readjustment of prices on black steel sheets has been made this week, and jobbers now indicate they are down to rock bottom in relation to today's cost. Dealers should be able to work up small business to advantage now, though heavy buying is not advised until conditions at the mills seem a bit more settled.

There is a feeling among the big buyers particularly that lower prices should prevail on sheets, and the first of April, ending the first quarter of the year, is looking forward to as date when a further decline may be expected. If a lower price schedule is arrived at it seems likely many jobs now being held back will be given out, and wheels of industry start humming again.

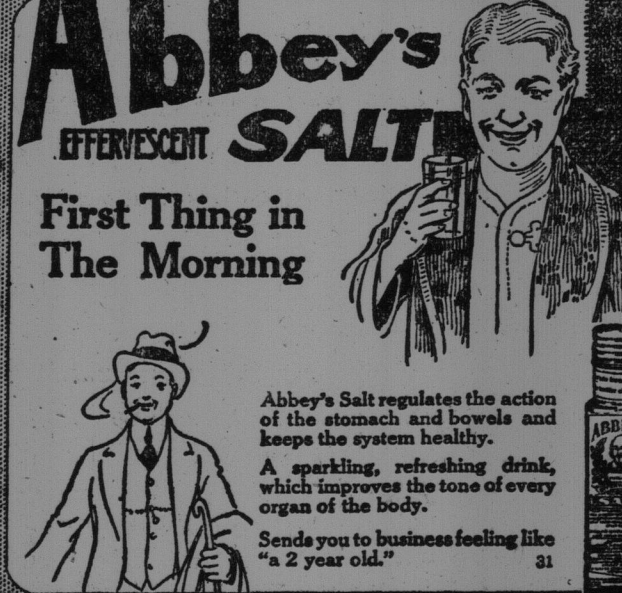

In line with declines recorded in other wire products, such as nails, smooth wire and galvanized wire, a lowering of the price of wire fence staples has been made. Today's prices on both are slightly firmer. The next two or three months are active ones for the wire products, and it does not seem as though any appreciable change is a prospect before summer.

Grindstone fixtures, the savers, wall paper cleaner, door springs, are lines to register advances this week. Brass and copper sheets, rods and tubes have gone to lower levels, and waxing brushes are also slightly firmer. Argentine steel is still withheld from the United States markets, and crushers there are facing a situation with regard to supplies which means a shortage of flux seed. The Canadian steel market is working in sympathy with United States markets, and the higher prices have been reflected in the quotations on Inland oil, which moves up from 5c. to 6c. per gallon.

EIGHT HOUR DAY FOR SOME WORKERS IN SPAIN.  
Madrid, March 13.—The Spanish cabinet yesterday decided to grant an eight-hour working day to the building trades throughout Spain, wages to be fixed by committees of employers and workmen in each district. The cabinet also approved a bill to remove machine operators from unemployment.

### Abbey's EFFERVESCENT SALT

First Thing in The Morning

Abbey's Salt regulates the action of the stomach and bowels and keeps the system in healthy. A sparkling, refreshing drink, which improves the tone of every organ of the body. Send you to business feeling like a 2 year old.

### THE GROCERY MARKET

The following comment on the market situation as regards food stuffs appeared in Canadian Grocer last week. There is no getting away from the fact that there is quite a nice export business going on all the time from Canada. It has been shown in canned goods, vegetables, fruits and fish, and another line to join those outward bound is poultry, three carloads having moved from Toronto alone this week. A report is current that the United States government has purchased 50 per cent of the dry bean crop in their country, and is now feeding out the market in Canada with a view to getting further supplies. That they have actually purchased within the last week 500 cars in the States of Michigan and California is known, but whether this is just the initial step in the bigger purchase is still to be determined. At any rate there is a slightly better feeling in the trade as a result of the actual buying known to have been undertaken.

Montreal—There are many advances this week in various lines. Metal polish of one variety is advanced 25c. per dozen. Split peas are firmer in price, too, and feed oats and barley are quite a little firmer in price. There has been no advance for hay, and the farmers are running things in before the roads break up. Lettuce, papery and oyster plant are all marked up, and oranges, due to scarcity, are quoted up \$1 to \$1.50 per case. Bananas, too, are firmer, and are selling at \$5 to \$6 per bunch.

Among the declines this week are lower prices for culinary starches and a lower basis for one line of pickles and chow-chow. Raw Demarara sugar was reduced in one quarter, the change being in the way of a readjustment. Liquid ammonia, kidney beans, tallies, shelled walnuts and potatoes are all lower in price.

The flour movement is better, and cereals a bit quiet and uncertain. Molasses is slow and stocks of this reasonably large. It is not possible to say that there will be any change of price. Coffee and tea are held firm, particularly for best grades.

Toronto—Lower prices have been named in some quarters this week on rolled oats, quotations being down 25c. per 90-lb. bag. Corn cereals show a somewhat firmer tendency, and it is anticipated some factors have advanced prices slightly, whereas others again still hold at unchanged levels.

Culinary starch has declined from 1/4c. to 1/2c. per pound this week, but no change in laundry starch is noted over recent decline.

Nut markets generally are quite firm, although peanuts show some weakness, and new Brazil nuts on way to American and Canadian markets should be available at prices below those on stocks now in hand.

Business shows a better tone, and manufacturers note that inquiries are now coming to hand. Wholesalers are starting in to buy—not in large volume but this week in oranges and grapefruit. Prices are high, 1 1/2c. the demand is very good and outlook bright for continued good business.

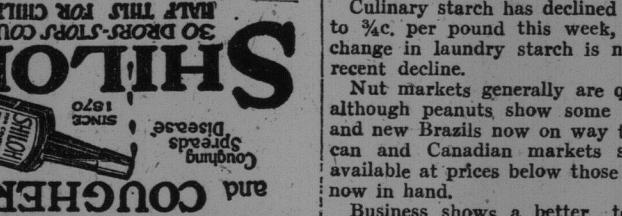

Onions show much strength locally and supplies are scarce. Cauliflower is starting in to buy—not in large volume but this week in oranges and grapefruit. Prices are high, 1 1/2c. the demand is very good and outlook bright for continued good business.

Coffee is rolling with a firm undertone, and this is reflected locally. The situation in tea is unchanged though there seems to be a much better feeling in the trade generally and more activity in sales.

### HOOTHS

AND COUGHERS

CURED HIS RUPTURE

It was badly ruptured while lifting a trunk several years ago. Doctors said my only hope of cure was an operation. Trusses did me no good. Finally I got hold of something that quickly and completely cured me. Years have passed and the rupture has never returned, although I am doing hard work as a carpenter. There was no operation, no loss of time, no trouble. I have nothing to sell, but will give full information about how you may find a complete cure without operation, if you write to me, Eugene M. Pullen, Carpenter, 42 E. Marcellus Avenue, Manhattan, N. Y. Better cut out this notice and show it to any other who are ruptured—you may save a life or at least stop the misery of rupture and the worry and danger of an operation.

### SMOKE MACDONALD'S INDEX

It is reported that the St. John river is free from ice as far as Westfield. There is a narrow stretch for two miles at Oak Point.

### DEPENDABLE OPERATION

It is right lubrication that puts most service in a motor. Polarine fulfills every function of a good lubricant—keeps the engine in smooth running order, the year round. Polarine lubricates perfectly at zero, and holds its body at high engine heat. Polarine runs to the thinnest film in flowing between closely connecting, hard rubbing parts, yet never breaks or gums. It keeps compression tight—maintains the piston ring seal—covers friction surfaces with a wear-resisting, heat-reducing insulation.

There's no acid in Polarine to pit cylinders or eat valves. Neither does it carbonize piston heads or foul spark plugs. Polarine comes in one-half, one and four-gallon sealed cans—in two grades—Polarine and Polarine heavy. Special Polarine Oils and Greases for transmission and differentials. Buy at the Red Bull Sign—where you get Premier Gasoline.
