

Heavy Steel Stack  
 Short and Direct Steam Pipe  
 Steam Gauge in plain view  
 Safety Valve  
 Whistle  
 Reversing Gears  
 Geared Pump  
 Large Oil Pump  
 Water Glass located here indicates true level and out of danger in case of breakage  
 Runboard  
 Reverse Lever  
 Friction Clutch Lever  
 Throttle Lever  
 Ejector Valve (For tank filler)  
 Cylinder Cock Handle  
 Blower Valve  
 Injector Valve  
 Steering Wheel  
 Pump Regulating Valve  
 All these handy to the operator  
 Steel Gear Covers  
 Drop Forged Steel Greasers  
 Convenient Seats and Tool Boxes  
 Gear Oiler  
 Traction Wheel - Strong, neat, and set close to Boiler  
 Bunkers hold sufficient fuel for about one-half days run  
 Running Platform  
 Rear Step  
 Spring Draw Bar  
 Large Water Tank

A TYPICAL CASE STEAM ENGINE

*If You Want Steam, Case Has It.*

Many farmers and threshermen insist that steam is a most reliable power. The thousands of Case steam tractors in actual operation today prove that this statement is based on fact. While some makers have neglected steam, Case has added new features after severe tests have proved such features practical. Today they represent the pinnacle of power, simplicity, economy and durability. Case steamers have always been leaders. They lead today.

Laboratory tested materials insure quality - Case workmanship - a factory with unexcelled facilities - backed by steam engine experience covering over forty years - these factors have made the Case steam engine universally famous.

Case builds eight sizes - a size for any acreage; 30 - 40 - 50 - 60 - 65 - 75 - 80 and 110 H. P. Your neighbor probably has a Case steam tractor. Ask him what he thinks of it. Or write for a detailed description which will be sent gladly on request.
