Dear Sir,

I am returning herewith application to register a trap-line submitted in favour of the m/n trapper because the sketch received with the application does not correspond with the area on the maps in this Office.

Please note that when applications to register traplines are submitted the sketch accompanying them must be exactly the same as the map used for registration, otherwise it is impossible to locate the area desired and enter it on the maps.

I am enclosing a copy of application and sketch now on file at this Office.

Yours very truly.

Signed, E. Martin Martin
