Clipped Horses Are Worth More

Horse doctors and authorities recommend that horses be clipped in the spring. This applies particularly to farm horses. They work better, sleep better, and keep in better condition if they are without a long, heavy, sweaty coat of hair. They are less liable to catch cold and can be cleaned in one-fourth the usual time. Long hair saps a horse's energy. No man can work in a heavy fur overcoat all the time, neither can a horse work under similar conditions. This is especially true in the spring when a horse is soft.

Clipping is Easy The Stewart machine is so simple that anybody can clip horses by guiding the knife while the crank is turned. We have made it so durable that it will last a life-time, giving good service all the time; this wonderful durability is obtained because working parts are enclosed from dust and dirt and run in oil, and because all gears are cut from the solid steel bar and are made file hard.

The Stewart No. 1 Bearing Horse Clipping Machine is a better machine than others—for the reasons above stated—but it COSTS LESS than most others. This is because there are FEW PARTS and no DELICATE MECHANISM. It's as simply made as it is operated. YOU CAN GET IT FROM YOUR DEALER FOR ONLY \$9.75
