

IT IS A GOOD MOVE

A Movement for a Sunday Mail From the South.

PETITION FOR IT IS OUT

Postal Inspector McLeod Has Been Seen by Postmaster Waddis and the Former Favors the Plan—A Few Believers of the Holidays.

Postmaster William Waddis is at work to secure a Sunday mail service for the city. At present the mail from Spokane stays at Northport, Wash., all Sunday, and is not brought to the city until the following day.

The recent Christmas rush is all over in the postoffice, but as relics of it Mr. Waddis has about a bushel basket of miscellaneous Christmas presents, which are awaiting the arrival of the proper owners.

THE OFFICIAL CIRCULAR.

Where the Two-Cent Rate Actually Applies.

The Canadian Gazette of December 31st, 1898, contains the following notice from Deputy Postmaster-General Coulter giving the following information with regard to the new two-cent rate of postage.

The rate of postage on letters transmitted by mail within Canada has been reduced, dating from the first day of January, 1899, from three cents per ounce to two cents per ounce or fraction of an ounce, the same to be prepaid by postage stamp.

The following is a complete list of the countries included in the British Empire with which the reduced rate of two cents per half ounce is now in force, namely: The United Kingdom of Great Britain and Ireland, Aden, Ascension, Bahamas and Barbadoes, Bermuda, British Central Africa, British East Africa, British Guiana, British Honduras, British India, Ceylon, Cyprus, Falkland Islands, Fiji, Gambia, Gibraltar, Gold Coast Colony, Hong Kong, Jamaica, Lagos, Leeward Islands, Malaya States, Natal, Newfoundland, Niger Coast Protectorate, Niger Company's Territories, Sarawak, Seychelles, Sierra Leone, Straits Settlements, St. Helena, Tobago, Trinidad, Turks' Islands, Uganda, Windward Islands.

WILL SNIFFLE IN NELSON.

Jailer Billy Mitchell Took Him There Last Night.

William McCormick, the sniffer, who sniffed before Police Magistrate Jordan on Tuesday last, when charged with sniffing money from Rev. Father Rivers and the good sisters of St. Joseph on false pretences, came up sniffing for sentence Friday.

When called upon to state what he had to say in mitigation of his sentence he sniffed so as to almost break the heart of good Father Rivers, who interceded for him and obtained mercy for him in the shape of a four months' instead of six months' sentence.

Fred Grant was the only other culprit before Magistrate Jordan. He is a young man of good connections and is charged with gambling. His case was continued till Tuesday and in the meantime he will meditate in the city jail.

Represents Many Companies.

Thomas S. Gilmour, the secretary of the Homestake Gold Mines, has secured the entire office once occupied by D. M. Linnard and the Roseland syndicate.

THE MINING REVIEW

Le Roi Smelter May Be Increased in Size to 1,000 Tons Daily.

THE SUNSET NO. 2 VEIN

The Importance of the Find Not Yet Determined—Ore Getting Ore in the Lower Tunnel—Work Suspended for the Winter on the Grand Prize.

The new year started in with unusual activity all over the camp. The Le Roi is being pushed to place it soon among the list of regular shippers again. The Centre Star is in a similar position, and the War Eagle will be sending out from 250 to 300 tons of ore daily after the first of next month, when the new electrical machinery will be in operation.

SUNSET NO. 2.—In the past three days the cold weather has interfered considerably with the development of the property, as the other veins could be kept from working the pumps. As a consequence the compressor plant was shut down, but it will probably be running again today.

COXEY.—The Coxeys have continued to improve during the past week. Work is under way in the lower tunnel, where a drift is being run on the vein. The tunnel originally met the ledge at a point of fracture, and the ledge was accordingly filled with only low grade mineral.

GRAND PRIZE.—The main shaft on the Grand Prize, which was being sunk on the east end of the claim, is down 48 feet. The showing includes about 2 1/2 feet of ledge matter, from which assays returned good values as follows: Average sample of ledge matter, gold, \$4.40; copper, 1 1/2 per cent, equal to \$2.36; sample No. 2, showing much quartz and copper, gold, \$10.80; copper, 4.9 per cent, equal to a copper value of \$10.78.

LE ROI.—Development work is steadily continuing, with the view of increasing the output of the property at the rate of 400 tons daily. The present plans call for the increase in the size of the Le Roi company's smelter at Northport to 1,000 tons daily, when the ore not only from the Le Roi, but of the other veins in the 300-foot level will be treated there.

IRON HORSE.—The double compartment shaft of the Iron Horse has reached a depth of 92 feet and excellent progress is being made. The shaft that close to the extension of this shaft. It is one of the largest shafts in the camp and with two machines and three shifts of men at work, rapid progress is being made.

WAR EAGLE.—The new compressor is in place, and the motors to operate it are now being installed. The power from the motors will be carried to the big fly wheel of the compressor by a series of manila ropes set side by side in grooves on the circumference of the wheel. The shaft is also in place, and the motors to operate it are likewise being installed.

IRON MASK.—The station at the 250-foot level in the winze has been completed and drifting to the east has been commenced. As soon as the drift gets well under way work will be pushed to the west of the station as well as to the east, and the presently sinking vein at the 250-level continues very gratifying, and exceptionally good values are met.

GERTRUDE.—Excellent progress continues to be made in the sinking of the Gertrude shaft, and during the past 30 feet. It is now down to the 150-foot level. Within the next six weeks the 200-foot level should be reached when crosscutting in both directions will be commenced. It is expected that the shaft will be completed in about a month.

THE BRITISH.—The three-compartment shaft is down a little more than 200 feet, and although good ore is being met, yet in future the shaft must be driven somewhat more slowly than in the past, when it was pushed both by sinking from the surface and by raising from the tunnel. The north drive still shows two or three feet of ore, and the raise from the north drive looks well.

SILVERBELL.—The crosscut towards the foot wall shows more ore than had been expected at any time since work was resumed. Within the week the foot wall should be reached, when crosscutting for the roof will be undertaken. It is uncertain whether the company will carry out operations itself when the present contract is ended.

JUNCO.—The lower tunnel is about 100 feet, but the ledge has not yet been met. In the upper tunnel the drift on the ore body is being continued. The examination of the property by Messrs. Hastings, Ferrier and Freeburn was completed during the week.

NICKEL PLATE.—Work is continuing at the 200-foot level. In the Great West, the other property of the East Le Roi company, all work is confined to the sinking of the main shaft to the 300-foot level.

JOSE.—At the 300-foot level, where a good ore body was recently met, a raise is under way to connect with the 100-foot level, and it shows satisfactory ore. The showing in the Jose is excellent.

MARCOZ.—The new electrical compressor plant is in operation, and three drills are at work—on the upper

tunnel, one in the winze and one in the lower tunnel. No. 1.—The tunnel is being continued. In the shaft at the 200-foot level a drift to the west is being continued to open the ore chute met in the tunnel.

GIANT.—Work was resumed this week, and two shifts are drilling in the shaft under the management of Foreman Chenoweth.

VIRGINIA.—The shaft is down about 485 feet, and the driving of the crosscuts at the 500-foot level will soon be commenced.

LAKE MAY.—The sinking of the shaft to the 200-foot level is proceeding with one machine operated by two shifts.

EVENING STAR.—The drift, which is being run in the lower tunnel, has met some good ore in the past week.

NOVELTY.—The long crosscut tunnel is being continued. As yet no developments are reported.

DEER PARK.—Work is being continued in the drifts at both the 100- and the 150-foot levels.

HOMEBREAK.—The shaft is down somewhat more than 205 feet. It is still outside of the vein.

COMMANDER.—The sinking of the shaft continues. It is now down about 310 feet.

WHITE BEAR.—The crosscut at the 250-foot level is continued.

COLUMBIA-KOOTENAY.—The lowest or No. 6 tunnel in the Columbia-Kootenay is now running on the ledge, which is filled with a highly mineralized, and will be shortly prospected by crosscuts. The No. 5 tunnel is now in over 700 feet, and it has been running lately on a bunch of ore. A crosscut is being run under the first crosscut in the No. 4 tunnel, and over 18 feet of ore has been raised. The No. 5 and No. 4 tunnels, and the former will be continued to explore the section of the ledge where good shipping ore was met last summer in the No. 4 tunnel.

LE ROI.—Development work is steadily continuing, with the view of increasing the output of the property at the rate of 400 tons daily. The present plans call for the increase in the size of the Le Roi company's smelter at Northport to 1,000 tons daily, when the ore not only from the Le Roi, but of the other veins in the 300-foot level will be treated there.

IRON HORSE.—The double compartment shaft of the Iron Horse has reached a depth of 92 feet and excellent progress is being made. The shaft that close to the extension of this shaft. It is one of the largest shafts in the camp and with two machines and three shifts of men at work, rapid progress is being made.

WAR EAGLE.—The new compressor is in place, and the motors to operate it are now being installed. The power from the motors will be carried to the big fly wheel of the compressor by a series of manila ropes set side by side in grooves on the circumference of the wheel. The shaft is also in place, and the motors to operate it are likewise being installed.

IRON MASK.—The station at the 250-foot level in the winze has been completed and drifting to the east has been commenced. As soon as the drift gets well under way work will be pushed to the west of the station as well as to the east, and the presently sinking vein at the 250-level continues very gratifying, and exceptionally good values are met.

THE GOVERNMENT

At the opening of the eight provincial Lieutenants-Governor from the throne, at Victoria yesterday. There are some excellent policy proposed, but the Government, in its moves carrying out, is able to. The Government of four, which is not of the measures will by the Opposition a short period in which it intends to. It is difficult if the Opposition will be able to carry out its policy. One of the measures is the mortgage tax. The nature of an addition reason that the mortgage is covered by the mortgage so is the mortgage, this tax, it has been kept capital out of the very burdensome on cause in the end he taxes. Under the circumstances as though it would be a good thing.

An important measure is the proposed abolition of that collected from this should go through majority, and should be by the Opposition. Mining sections of British Columbia are in a position to be a good thing. The introduction of a bill for land transfers should be adopted. It cheapens the cost of realty, and, besides, transfer of real estate is defective; in fact, security to purchasers. The prohibition of working underground should be adopted. There are certain interests on Vancouver probably oppose this, but, perhaps, be of fought propositions before the present time. There is already statute books, which ployment of Chinese statute was passed by the Chinese from being enterprise authorized. The Japanese filed a protest against the Government, which requested that it not be. The Government had not been signed. General Aberdeen of England, nor has proved of the measure a year after its passage without his signature. There will double made on the proposal allows prospectors the railway land grants on crown lands. The to which these grants will doubtless oppose character and owing rock on which the present.

Among the present new Government is that alien cannot be. The Minister some time on record as opposed law of this character that it is against an calculated to retard the Province, and opinion, result in considerable extent the mineral resources. Importance of mining greatly lessened if and location of plac confined to British Columbia. Therefore, thinks that this should not be a. There are other Government is pledged which are not so important. These outlying task, and with the Government will be all out at the present.

There are two candidates for Mayor. One is Goodeve and the Mayor H. S. Wall known to the people and in their public and in their. There is no very between these two to the highest office people of this city promises to be the history of Rosland city government. Important that the very occupy the mayor's executive is all-important matters. In the opinion of A. S. Goodeve, the two candidates for One of the reasons Goodeve's position which is a matter of the people of this city. When the question of the plant of the Ros company came before
