SMALLPOX OF MILD TYPE.-No. there are 21 patients. The disease is of an unusually mild type and no serious results are feared. Drs. Samples of City Water Pipes.

There are on exhibition to-day in en from the mains in Cochrane Street and Queen's Street. The pipes are exciting much interest as the space allowed for the water to go through, instead of being six inches, is only one, owing to the amount of rust around the inside of the pipes. These samples were taken by City Engineer Ryan and submitted at last night's meeting of the Citizen's Committee In view of the above is it any wonder that no good water pressure can had when there is a fire.

Thoroughly

for the Blind

Mr. Editor,-Permit me through the olumns of your paper to publicly hank those whose names are given below for their interest and generou apport of the work of the Extension movement in connection with Halifax school for the Blind.

I esteem it a privilege as also a pleasure to have had the opportunity of considering together this matter of such import—the home teaching of the adult blind of Newfoundland. We cannot wage war in this world without ammunition and as the hand-some sum of \$2,750.00 has been mosgenerously subscribed by the public spirited men of St. John's, we have been already able to begin the work

of Home teaching in this colony. Mr. Thomas Davis, a graduate the Halifax School for the Blind and the window of the Board ct Trade, a resident pianoforte tuner of this two sections of pipes which were tak- city has been engaged as the Home

Since my arrival in the colony have found that 308 blind persons reside around its shores; 120 of these 55 years are eligible for home teaching; 39 persons between the ages of and 21 years are eligible for Institutional training at the Halifax school for the blind; the remaining 149 being aged persons, whose sight is impaired because of physical decay, are beyond our help.

I shall be leaving for Halifax tomorrow by the s.s. Florizel and would again repeat my heartfelt thanks and gratitude, not only personally but on behalf of my beloved and worthy superintendent, Dr. C. F. Fraser to banking house in America. The seniwhose heart this movement is near

THE FIRM.

In many a battle of stocks and finance. The victory he loves most to recount is his forcing of Thomas F. Ryan, the king of frenzied finance, to return \$7,000,000 which he had received for some very watery stock of the Metropolitan Life.

So powerful has Schiff become, indeed—so silent and impenetrable his ways and workings-that it has seemed almost as though he were an in personal force governing mysteriously the finances of the country, rather sion he has spoken out straight to the public, with very personal emphasis. Such was his stern attack, several, years ago, on the currency system of the United States. And it was this attack which set going the banking reform movement and brought us our much heralded now currency law.

Those who know Schiff as friend or relative see him not at all as an im personal force, but as a very loveable and human companion, sincerely in terested in philanthropic and social problems and in matters of character

The one maxim of his business life hints much of this kindly straightforward nature of the great financier. It "I never believe a man dishone until he has been proven so!"
