German Reparations
Proposals Preposterous.

Hot Strait Blocked With Ice --- U. S. Aviators Make Successful Coast to Coast Flight.

French and Belgians Unanimous.

PARIS, May 3. — French and Belgian Governments are unanimous in rejecting the German reparations proposals. Reasons given are lack of guarantee of the sufficiency of the sum

Atlantic-Pacific S.S. Service.

MONTREAL, May 3. — Part of a direct freight steamship service between the Canadian and Pacific ports will be inaugurated about the middle of July by the freighter Margaret Coughlin, sailing from Montreal for Vancouver and Victoria via the Panama

Train Wrecked.

SALT LAKE CITY, May 3. — Passengers and two train men killed and twenty-five passengers injured, in a passenger train wrecked late last night on an east-west passenger train near Woodside, Utah. Two engines pulling the train

St. John River Rising.

ST. JOHN, N.B., May 3. — Floods on the river are beginning to assume alarming proportions, the water being fifteen inches higher yesterday.

Coast to Coast Flight.

SAN DIEGO, Calif., May 3. — San Oakley Kelly, and John A. Cabot, United States Army aviators, completed the first non-stop coast flight from Hempstead, N.Y. to here to-day, in little less than twenty-four hours.

Ice Barrier Tightens.

NORTH SYDNEY, N.S., May 3. — The ice barrier across the Cabot Strait appears to have tightened, according to analysis of the reports today, and hope for an early permit navigation into the Lawrence, is considered as remote as ever. The pressure of ice

around the Kyle, fifteen miles northeast Flat Point, was increased during the day by a northwester and the ship's engines have not been under working pressure all day. The ice is moving rapidly towards the Cape Breton Coast but the steamer is well in the field and present surroundings will benefit rather than endanger her safety. It is thought probable she will be several days in the ice yet.

Getting Insulin from Fish.

HALIFAX, N.S., May 3. — The National Fish Company of Halifax announced to-night that the Biological Board at Toronto had advised that the extraction of insulin, recently discovered for diabetes treatment, from deep sea fish, had been highly satisfactory. Arthur Boultiller, President of the Company, said that Captain Righty, of the Dominion Biological Station at St. Andrew's, N.B., made a trip on one of their trawlers and selected suitable fish from the ship's catch and those were forwarded to Toronto. Insulin was taken from two kinds of fish, he said, the monk and skate. Comparatively a tiny part of these fish was saved for the purpose.

Epitaph on a Vagabond.

Careless I lived, accepting day by day
The lavish benison of sun and rain,
Watching the changing seasons pass
And come again.

Now the great Harvester has stilled
My breath,
In this cold house I neither hear
Nor see
Though in my life I never thought
Of death.

For morning wear on the street the smart tailored suit, with a straight jacket, and straight wrap over skirt, is good.

Square Inch

HOLDS SIX MILLION DUST PARTICLES.

CHICAGO, May 2—(A.P.)—It requires more than 6,000,000 tiny dust particles to cover a glass plate one inch square, according to investigators at the Structural Materials Research Laboratory of the Lewis Institute here.

Although it would seem a hopeless task to count these millions of dust particles and measure their exact size, these Lewis Institute investigators have carried out a series of tests in which these operations were performed.

The tests were conducted to determine the fineness of portland cement, and it was discovered that if average sized cement particles were laid in closely fitting rows it would require 6,000,000 to cover the same area.

Seeing to Taste.

What we know as taste is a somewhat more complicated sense than is commonly supposed. As a matter of fact with the sense of taste alone it is only possible to detect our flavors, which are sweet, bitter, sour and salt. All the more delicate flavors are discerned with the aid of the sense of smell. This is easily proved by holding the nostrils when eating any kind of jam, for instance. In such conditions it is quite impossible to detect the special flavor of the fruit. A yet more curious point is to be found in the fact that the ability to taste is to an extent, at any rate, dependent upon sight. Few people can detect the difference between beer and stout if they drink with their eyes closed. There is also a certain number of persons about who cannot tell tea from coffee if they shut their eyes when drinking. Most of the men blinded during the war lost all pleasure in smoking; they said the tobacco had no flavor to them. In many cases by using a stronger tobacco the lost pleasure in smoking has been regained. An interesting test for ordinary people is to close the eyes while smoking a pipe or cigarette. It is amazing the differ-

Our Dumb Animals.
REPORT OF THE CHIEF AGENT FOR WEEK ENDING, MAY 3RD, 1923.
Attended to the landing of forty-seven head of cattle and twelve horses from the S.S. Canadian Sapper. Had them all landed and carefully taken away; had one moved on a sloop as the animal had its hip hurt. Another had a large abscess, but this did not hinder it from going with the others. Also called to W. Tessier's Farm, on Waterford Bridge Road, to humanely put to death a colt which had its leg broken in some unaccountable manner. Spoke to several teamsters and told them to be more careful driving. Visited the Southside and saw the improvement made in Morey & Co's gateway; this is a great benefit to horses hauling coal. All horses on this job hauling coal to the gas house are in good condition and well cared for. Mr. Lester is keeping 2 or 3 extra horses on the job to make it lighter for the other horses. Attended a sale at Campbell & Mackay's premises, and found everything satisfactory. Attended to the landing of forty-seven head of cattle and one horse from S.S. Sable I. One cow was very sick and I had it moved on a sloop. I would like to have this arranged so that sick cattle could be taken away immediately after being landed. This cow was on the wharf four hours before it could be taken away. Several minor matters were attended to. We understand that many horses in the lumber woods have been badly treated the past season. Lumber Companies usually loan the horses to contractors who overload and overwork them. I am watching all trains for evidence of cruelty in order to continue investigations as to these lumber companies' animals. I have one case already in hand to be prosecuted. All complaints may be phoned to 653.
JONAS BARTER,
Chief Agent.

Toronto Beset by Drug Traffic.
MAYOR MAGUIRE URGES IMMEDIATE DRASTIC MEASURES TO BREAK RING.
TORONTO, April 19—(Canadian Press)—Mayor Maguire has received alarming information in regard to the operation of the drug traffic in Toronto and he proposed to the police commission this afternoon that measures be taken to curb it.
"If there is a drug ring in Toronto," said the Mayor, "it will be broken up. I have heard some of the most alarming reports, and it would appear that there is a ring headed by well-to-do men who are making money out of this business."
"I have heard of young persons, respectably connected, who have lost their position owing to their addiction to drugs," continued the Mayor.
"Every effort is made to prevent the authorities from getting the persons who are responsible. All kinds of ways are employed to carry on the traffic in secret. Prisoners have even been brought into the jail with it on their persons, the drugs concealed in the heels of their boots."
The afternoon tallour may consist of the tier skirt worn with the new bolero, or a draped or plaited skirt with a tie-on jacket.

PROTECTION
Many avoid coughs, colds, bronchitis, or other winter ills, by protecting the body with the consistent use of
Scott's Emulsion
It is a food and tonic rich in health-building vitamins, and is a source of warmth and energy. The regular use of Scott's Emulsion conserves strength.

Try this economical way to make your cooking richer

When you want to make food especially rich and fine flavoured, you use plenty of cream or butter, don't you? An expensive way, but they contain much butter fat which is the great enriching substance.

But here is an economical way to get this quality of richness and fine flavour—the way thousands of splendid home cooks do it. They use Libby's Milk; a richer milk, very high in butter fat. Each 16 oz. can contains 7½ teaspoons of this precious substance!

Try Libby's Milk in one of your special recipes: when you find the delightful richness it gives you will use it in all your cooking. Get a can with your groceries to-day.

Write for free recipe folder.
Write us to-day for new recipe folder telling how good cooks everywhere are getting fine cooking results—and saving money—by using Libby's Milk.

7½ teaspoons of butter fat in every 16-oz. can!
