The School Question.

A section of the Conservative press is raising the old cry of French domination in connection with the school clause of the Northwest autonomy bill. Says the Toronto World:

"Yesterday in the House of Commons probably saw a new cleavage in Canadian politics. There never was so far-reaching an effort made to put the whole of the Dominion under the domination of the Prov-

Every line of this is contradicted by the Montreal correspondent of the sam journal, who writes:

"It must be evident to all those who have visited this province that it is a difficult undertaking to get up an anti-separate school agitation amongst English-speaking citizens, consequently Sir Wilfrid's proposed legislation has been received here with indifference. To find anti-separate school champions one must seek them amongst French-Cana-

No one can truthfully speak of the domination of Quebec in the matter of separate schools if he recalls the events of 1896. When the Conservative Government sought to impose separate schools on Manitoba and appealed to the country on that issue, was it a case of French domination? The majority of the English-speaking provinces-even Manitoba itself-sustained the Conservative party in that policy. It was Quebec-the reviled French-Canadians-that stood between Manitoba and separate schools. The result of that election by provinces is highly

It is evident that the separate school policy of the Tupper Government was no handicap to it in the English provinces. There was some mutiny in the Conservative ranks in a few Orange centers, but not sufficient to affect the general result in the country.

Some time ago the organ of the Orange Order commented on the absence of any organized or official protest against the perpetuation of separate schools in the Territories. The west appears to be much more concerned about the land legislation than the school question. There is reliable information that the people of the Territories, Catholic and Protestant, are fairly well satisfied with the present educational system under which separate schools are identical with the public schools in the course of instruction, excepting one half hour of a lifetime, and leaves office a the day, during which religious teach- comparatively poor man. The minority will protest if Parliament revokes the guarantee it gave in 1875 that this policy would be maintained, but so far there is no evidence that the majority demand that Parliament do this. Seemingly the majority is quite willing that the school legislation of 1875 should be confirmed by the present Parliament and made binding upon them in their new provincial status. Judging by his brief remarks in following Sir Wilfrid Laurier, the leader of the Conservative party takes this view of the question, and unless the Protestant majority of the Terripronounce unmistakably against the educational clauses of the bill, the measure will make no great stir in the country, and will not become a political issue. In any event, the attempt to raise a race cry, because the Premier happens to be a Quebec in 1896 and Sir Wilfrid Laurier's whole record. These tactics

The Legislature.

will get no encouragement from the

leader of the Opposition.

The Ontario Legislature has been called to meet on March 22. It would be unreasonable to expect any important legislation from the new Government during its first session. The Ministers have been busy familiarizing themselves with the routine of their departments, and have had no time to develop new measures. It is necessary to summon the Legislature to grant supplies, and if public business is not in a forward state, the Opposition should make allowances and should not be too censorious. There is no reason why the session should be a long one, unless the Government furnishes some surprises. The granting of supplies and the regular grist of private bill legislation are all that need occupy the House. The Government will then have a year in which to mature its plans, and it can claim no indulgence

The Drawback Policy.

in the session of 1906.

Some time ago we called attention to the significance of the new drawback ruling by the United States Secretary of the Treasury, allowing American millers a drawback of the duty on Canadian wheat imported by them and ground for export. Strong opposition developed among the wheat growers of Dakota and Minnesota, who claimed that the price of wheat in the United States would be depressed by the free admission of the cheaper Canadian grain. Senator Hansborough, of North Dakota, brought the matter before the United States Senate, which passed an amendment nullifying the drawback ruling.

right to amend a tariff bill. The result is that the drawback ruling holds good and the treasury department is work day and night, with the palace at liberty to extend it to all raw materials imported by American manufacturers and elaborated into finished products for their export trade. In 1894 it was decided by the Attorney-General of the United States that the law prohibited a drawback on imported material except in cases where the article manufactured or produced can be so separated, chemically or mechanically, into its component materials that the relative proportions of each material may be ascertained without reference to past books or accounts. It is plain that under this ruling, the Minneapolis millers could not get a drawback or rebate, because it would be impossible to identify Canadian wheat in flour made from a mixture of Canadian and American wheat. The law has been construed in a broader sense by the present Attorney-General, who holds that after the imported raw materials have been identified the customs officers may satisfy themselves in any way they see fit that these materials have been used in making the exported commodities upon which the drawback

s demanded. As the law now stands, every American manufacturer may import materials free of duty if these are used in finished articles for export. The producers of these raw materials in the United States are thus exposed to foreign competition, while the producers of finished articles have unimpaired tariff protection. The former class will rebel at this inequality and their rebellion will mark the beginning of the end of a high tariff system.

Mr. Whitney will be asked today by a temperance deputation to "abolish the bar." His answer will be interesting chiefly as an exercise in diplomacy.

His opponents have been charging Mr. Sifton with running away from the Northwest autonomy bill. He answered the charge yesterday by appearing in the House.

Edison on Electrocution.

[Chicago Cronicle.]

Thomas A.Edison was recently asked if he had invented the apparatus used for the electrocution of murderers in New York and Ohio. "I did not," he said, "and I am sorry that electricity has been put to such a use. Of course, that is the most painless method of putting anyone to death. There is a sensation of a moment only—as quick as the bat of an eye. But in that second there is pain indescribable. The flash comes and the shock; it is ten times more excruciating than the feeling that results from one's placing his hands on live coals. It is a burning, devilish, harrowing feeling. Imagine the quick thrusting of 10,000 needle points into the body at one time and you may have a faint idea of the shock when the current is turned on." Mr. Edison is opposed to capital punishment, holding that murderers should be locked up and put to work for life. Indeed, he thinks that this would be greater punishment than killing them.

Poor Little Czar!

[T. P. O'Connor, M. P.] It is said that at this very moment the Czar constantly finds in the poc-kets of his coat, nay, even under his pillow, letters threatening assassina-Of course, it is said by Liberals that these letters are placed there by the police, and just with a view of frightening him into further reaction. That may or may not be; whether it be a fact or not, the Czar cannot well tell. It is sufficient for him that thus in his very bedroom — the room in which he has to try and get his sleep -there stands the ghostly specter of assassination.

Dowager Empress Wearies of Palace Prison and Would Take a Chance.

St. Petersburg, Feb. 24, 2 a.m. - All of the members of the imperial family who attended the requiem for Grand Duke Sergius at Tsarskoe-Selo yesterday remained to a family council in the evening. The Dowager Empress, Liverpool Merchant Says We Are Too who has been at Tsarskoe-Selo since the eventful "Red Sunday," Jan. 22, becoming impatient at the restraints which were advised by the police for her safety, rebelled against the alleged necessity of remaining at Tsarskoe-Selo, declaring that she is not afraid that the sands of her life have almost run out, and that if assassins want her family and authorities implored her not

to return to St. Petersburg, and she firally yielded. General satisfaction is expressed even among Liberals that the funeral day of Grand Duke Sergius passed off been getting from Canada, but with no untoward incident. Even the extreme Radicals respected the day of grief of the imperial family. The police precautions, both here and at Moscow, though extensive, apparently were not needed. The public is discussing with astonishment the sweeping statement of the Metropolitan of Moscow, attributing the guilt of the assassination to the entire Russian society, critics saying that if this is true it justifies the contention of reforms that all Russia is at odds with present system. The wisdom of such statements at this crisis is generally questioned.
