National Progressive Party Is Planning An Active Campaign.

TORONTO, Sept. 7.—Despite tariff issues the whole of the Ontario cabinet is expected to take the stump in Ontario on behalf of Hon. T. A. Crerar's Progressive party when the general election campaign opens. A minister in the Government stated today that undoubtedly they would be day that undoubtedly they would be called upon to take ppart, and he believed the Labor ministers—Hon. Walter Rollo and Hon. Harry Mills—would take up the cudgels on behalf of

the Progressives.

Because of tariff issues some doubt was entertained as to whether the minister of labor would have the sanc-ion of the Labor party in boosting for floor of the Labor parts and to en-the Progressives, who are said to en-tertain free trade convictions. While labor generally has been credited with belief in a high tariff, that view is labor generally has been credited with belief in a high tariff, that view is not generally entertained among mem-bers of the Drury cabinet, one of whom took the position that the ma-jority of laborites view high customs mposts as unwarranted taxation upor the consumers least able to pay.

A Hamilton dispatch tonight Premier Drury has called aucus of the Labor members of the

Scenes of the utmost confusion are vailed as scores of persons carried furniture and movable property through the smoke-filled streets, while others hauled salt water from the Annapolis River and tried to prevent the spread of the conflagration by blowing up the houses in its path with dynamit. A heavy fog settling on the town shortly after nightfall quelled the ferocity of the flames after they had burned over an area roughly bounded on the west by St. George street, on the north by Victoria street, and St. James street on the east by the old Domlnion Atlantic Railway tracks, and on the south by St. Like's Church.

No Unemployment or Shortage of Food and Shelter On Farms

TORONTO, Sept. 7.—Speaking at the Exhibition directors' luncheon today, Premier E. C. Drury, expressed the opinion that the rush to the cities was possibly being overdone. Appeals, he said, were being made to the Government to start work to provide employment in the cities, but to the Government to start work to provide employment in the cities, but he added: "Out in the country next winter there will be no lack of food and shelter and there will be plenty of fuel. There is no unemployment on the farms; in fact, my neighbors tell me they have not been able to get enough help this summer. I would suggest as a partial remedy a revival of the village industry idea as far as it can be practiced. Some day we will cease to think that centralization and big things constitute success."

The premier credited farming with being the only industry that has kept going full blast through the period of falling prices.

Mr. Drury made brief reference to hydro radials. Radials, he said, were needed to carry the young people to and from the cities and towns, and hydro-electric energy was needed to ease the labor of the farm women. These were two prime needs in Ontario to keep a good class of people on the farms. "We need better transportation," he said, "and that means better roads and also hydro-electric roads." These sentiments were greeted with applause.
