- abalienalis*—14th June ; common ; at rest and at sugar.
- Hypena subrufalis*—29th June ; not common , at rest.
- Platyhypena scabra*—23rd July to October ; common ; at rest.

---

THE *Cossus* of the Greeks and Romans, which, at the time of the greatest luxury among the latter, was introduced at the tables of the rich, was the larva, or grub, of a large beetle that lives in the stems of trees, particularly the oak ; and was, most probably, the larva of the Stag beetle, *Lucanus cervus*.—*Curious History of Insects*.
