

EXECUTORS' SALE

OF THE

"Norris" Roller Mills, St. Catharines,
"Fyfe" Mills, Thorold, and the
Steamer "Persia."

To liquidate the estate of the late James Norris, the executors have decided to sell the following properties:

MILLS "A and B," on the Welland Canal, St. Catharines, Ont. Capacity mill "A" 400 barrels; mill "B" 325 barrels. These mills are on the direct line of water communication between Chicago, Duluth or Fort William and Montreal, and enjoy the benefit of water rates on all grain inward, and flour outward. Both mills have ship elevators capable of handling 1600 to 2000 bushels an hour. Grain storage capacity, 60,000 bushels; large flour and feed storage. Steamers can load for Montreal and way ports direct from the flour warehouses at mere nominal cost. Brick cooper shops and ample storage for cooperage stock and barrels. These mills are full roller process, thoroughly modern in all their appointments, and are running daily. The brands manufactured are registered, and are well known throughout Canada and Great Britain, and are standard wherever used. The mills enjoy a large and profitable local business. Never failing water power, costing only \$200 per annum. There is 400 feet dock frontage on the Welland Canal. On the property is a large two-storey stone warehouse now used for the storage of merchandise in connection with the steamer "Persia." Could be utilized for other purposes, or extra flour and grain storage. Entire premises electric light by a modern Thomson-Houston incandescent plant belonging to the property, and at a very small expense over cost of lamps.

STEAMER PERSIA—This boat is in excellent condition, and has always done a large freight and passenger business between St. Catharines, Toronto and Montreal. The "Persia" is a valuable auxiliary to mills "A and B," enabling them to deliver flour at seaboard at a very low rate of freight.

FYFE MILLS, on the Welland Canal, Thorold, Ont. Capacity, 160 barrels daily. Full roller process. Never failing water power, summer and winter. Water and railway communication. This mill will be sold cheap, and offers a capital opportunity for any practical miller.

METALS AND HARDWARE.—We hear of no recent transactions in pig iron, though domestic makers would shade quotations to effect sales: we believe Siemens' No. 1 has been offered at \$16.75. No import orders for Scotch iron, of any importance, have yet been placed for spring importation. Warrants last cabled at 43s. In other lines there is a moderate jobbing movement. Tin is a little harder in Britain, the cable quotation being advance, £1 10s.; local price as before; lead also a little firmer. Copper still easy, and has been sold at 10gc. in ton lots. Spelter and antimony slack. Some moderate lots of Canada plates have moved at quotations. Offers of cheap coke tins have been cabled here, and we hear of a 1,000 box order being placed by a local firm. We quote:—Coltess pig iron, \$20; Calder, No. 1, \$19.00; Calder, No. 3, \$18.00; Summerlee, \$19.50; Eglington, \$18.25; Garnsherrrie, \$19.00; Langloan, \$20; Carnbroe, \$18.00; Shotts, none here; Middlesboro,

LOOK TO

EDMONTON, ALBERTA.

The chief town and trading centre of Northern Alberta. The terminus of the Calgary and Edmonton Railway, surrounded by the richest wheat and grazing lands in the world. The most favorable opportunity in Canada for the establishment of a roller grist mill and woollen factory.

The ever increasing herd of sheep demand the immediate establishment of woollen manufactories.

The annually increasing wheat production in the district surrounding Edmonton insures a permanent and paying investment for a No. 1 roller flour mill.

Assistance by the town as well as the country may be offered to competent persons desirous of supplying the long felt want.

Address all communications to

A. G. RANDALL, Town Clerk,
Edmonton, Alberta.

TORONTO MARKETS.

TORONTO, March 15th, 1894.

DRUGS.—A fair amount of business is doing, but without special features. Dealers are looking forward to the arrival of heavy chemicals, when prices will in all probability weaken somewhat. Opium is, if anything, easier, but values have not been affected. Quotations of camphor at 60 to 65c. are lower.

New Company Organizing

The directors of one of the most successful corporations in the city of Toronto are desirous of increasing their business in Canada and the United States. They manufacture a patented hardware specialty of recognized and undisputed merit.

No competition.
No possible depreciation in value of stock on hand.

All accounts necessarily gilt edge.
Not affected by condition of crops, weather or times.

Eminently respectable, and the projectors believe it will pay 60 per cent. dividend.

This is an opportunity seldom offered to get in on the "ground floor."

There are also some salaried positions open to the proper persons.

Send full particulars as to how much stock you could take, previous business experience, &c.
