

It is understood that you are at once to apply on behalf of Dr. Collip and this University for a United States patent, and that you will file a caveat and take all necessary or advisable steps to protect our mutual interests. We also agree that if you are entirely prevented from manufacture and sale by other parties having prior rights, our contract will cease to be binding.

We should welcome a visit from representatives of your organisation, and would be willing at that time to enter into a more formal contract superseding these letters.

Ever yours faithfully,

Principal.
