[OZAMA, one of the largest rivers of the island of St. Domingo in the W. Indies, and on which the city of St. Domingo is situated. It is navigable nine or 10 leagues from *s.* to *n.* One may judge of the enormous volume of water which the confluent stream of Isabella and Ozama sends to the sea, by the red colour it gives it in the time of the floods, and which is perceivable as far as the eye can distinguish. There is a rock at the mouth which prevents the entrance of vessels drawing more than 18 or 20 feet of water. The river for a league is 24 feet deep; and its banks are 20 feet perpendicular; but *n.* of the city this height is reduced to four feet. This real natural bason has a bottom of mud or soft sand, with a number of careening places. It seldom overflows its banks, except in very extraordinary inundations. The road before the mouth of the Ozama is very indifferent, and lies exposed from *w. s. w.* to *e.* It is impossible to anchor in it in the time of the *s.* winds; and the *n.* winds drive the vessels from their moorings out into the sea, which here runs extremely high. See DOMINGO CITY. The mouth of the river is in lat. 18° 18' *n.* and long. 72° 38' *w.* from Paris.]
