credit, not only to his farm, but to himself as a breeder. There is a matter that the breeders' association should take up at their next annual meeting, i.e., the publicity of the breeders; see that good publicity is engaged to give publicity to the different breeds, in an intelligent manner, giving the breeding the good and the bad points (if any) of the different breeds shown. In any business publicity is what makes success.

National Exhibition Association, the biggest annual event in the world, and the best in everything is shown, should be a factor in determination of the president to maintain the present price for the 1919 crop.

"In giving a guaranteed price for what one year in advance (the only industry guaranteed by the government) there is involved a considerable national risk," the president said. If there should be peace or increased shipping available before the middle of 1920 Europe will naturally supply itself from the large stores of wheat now in the southern hemisphere, and therefore the government is undertaking a risk which in national loss as much as \$500,000,000 through an unobtainable surplus; or in any event in maintaining a high level price for our own people for a long period subsequent to freedom in the world's markets.

The proclamation fixes as reasonable guaranteed prices for No. 1 northern spring wheat and its equivalents at the principal primary markets the following: New York, \$2.39; Philadelphia, \$2.39; Baltimore and Newport News, \$2.38; Duluth, \$2.22; Minneapolis, \$2.21; Chicago, \$2.25; St. Louis, \$2.21; Kansas City and Omaha, \$2.18; New Orleans and Galveston, \$2.28; Tacoma, Seattle, Portland, Astoria, San Francisco and Los Angeles, \$2.20; Salt Lake City, Great Falls, Pocatello and Spokane, \$2.
