manager, in his report yesterday, stated:

"The ere bodies on the 6th level, with those of the 5th level, have been prepared for stoping. This, with remnants in the upper levels, including the small ore body of the cross-vein, make an estimated ore reserve of about 35,000 tons, averaging \$14 per ton." As the cost of mining and smelting under present conditions is about \$10.50, this \$14 ore would not upper ton. This would not go far towards paying off the debt. But this is, of course, taking the worst view of the case, and accepting it for granted that no further high values will be found at greater depth.
