As I am continually adding to my Stock all new improvements, in Carpenter's and Machinist's Tools, and all other Goods, and for the want of space, I find it quite impossible to enumerate more than a few lines, and strickes that I keep on sale. But call for inspection will satisfy the most experienced in the Hardware trade, that my steck is complete. The variety comprises every article the country requires. I have given my strictest attention to the business, and allow nothing to be out of Stock there may be a call for, together with all new improvements. My business having increased so that I can now afford to sell at a small advance on cost, purchasers will find that they can buy to better advantage here than sending alroad for what they require.

A California inventor has devised a process for pressing and drying potatoes Eve," with the usual amount of poetry. so that they will keep for years, without loss of flavor. According to Sir J. H. Lefroy, the

frozen 280 feet deep. A disease of salmon, caused by a fun-

gus, prevails extensively in England and Scotland. Scientists have been investigating the matter, but have been un able to find a remedy, although the chief agents in the development of the disease are believed to be the pollution of waters and overcrowding.

tance, 13,398 miles. 75 PIECES GREY & WHITE COTTONS, At the August meeting of the American Association Prof. Bell showed the startling fact that light may be made to produce sound. M. Treve now claims that he has succeeded in reversing this result, and has described to the French Academy an experiment by which he believes a transformation of sound into light is produced.

dered and mixed with the purest clay that can be obtained from the beds of the rivers-this kind being preferred, as it takes up a larger quantity of the ash, and thus produces a stronger kind served in the Valley of the Rhone, in France. A very voilent wind often pre Shaves and Hair Cuts vails in the neighborhood of Uzes, which forcibly drives large quantities of sand

> latter so smooth and regular that they might readly be regarded as specimens of men's handiwork. A very successful experiment with a ompressed air locomotive was lately made at Woolwich, England. The engine was provided with a reservoir of 100 cubic feet capacity. With air filling this chamber at 1000 pounds pressure on starting, a run of 16 miles was easily made at a fair rate of speed. So great are the advantages of the "bottled air" for street railways, tunnels, etc., that an early adoption of this class of motors in many localities is sanguinely

expected. The compression of the air engines. Ocean soundings show that along the 1.500 fathoms or more is reached with in a distance of from twenty to seventy | Musical Albums and Boxes, miles westward from the shores, the greater part of this sudden fall occurring in the last ten to fifty miles. At one hundred miles west of San Francisco, the bottom is found to be over 2,500 fathoms deep. The bed of the ocean continues of a uniform depth greater than 1,500 fathoms until the Sandwitch Islands are reached, the greatest depth being 3,000 fathoms

miles of that place. The eruption of Mount Etna in 1669. according to a French journal, was the most formidable of historic times. The side of the mountain opened for a length of about four miles, and there issued the from it a torrent of lava four miles broad, which, after destroying several flowed into the sea and formed a promotory two miles long by half a mile montory two miles long by half a mile SOAP, time the scoria and sand thrown out by the craters formed a mountain with Meal, Molasses, etc. a double crest to which the name Monti Rossi has been given. The higher of the two crests is about 800 feet above Etna, and 3,000 above the sea. The cone of Monti Rossi contains two immense extinct craters, and, descending one of them in 1823, an explorer found at the end of a series of gaileries a vast rectangular room exactly in the center of the mountain. This remarkable grotto has since been opened to travel-

ers, and is illuminated by magnesium light. An Amusing Incident An incident which occurred during the

lovernor-General's visit to Hamilton is

thus described in the Mail: " An amusing

incident in connection with his Excellency's drive to Dundurn was the conduct

of the driver of a wagon upon which

were pasted gigantic invitations to the

public to invest their surplus funds in

Vegetine wagon took up a place behind his carriage, and kept that position, to the annoyance of the drivers of carriages which formed part of the corteye, for some distance. After repeated efforts the sec-ond carriage succeeded in passing the Vegetine wagon, and from that moment the Vegetine man's tactics seemed to fail him. After his Excellency had viewed the fireman, the carriage in which he rode R.FLANAGAN. took up a place at the rear of the procession, but not without a struggle with the Vegetine man for the precedence. The Vegetine wagon, it seems, followed the procession closely during the entire march 1000 Qtls. COD FISH.
