

CONTENTS.

	Page.
Introductory, by Eugene Haanel, Ph. D.	5
<i>Steel Furnaces</i>	5
Present Status of Electric Steel Industry.	6
List of electric steel furnaces in Europe, etc.	6
<i>Iron Ore Smelting Furnaces</i>	12
Historical comparisons.	12
Grönwall on recent practice at Domnarfvet, Sweden.	12
Discussion in Swedish Parliament.	13
Swedish government enterprise.	14
Private enterprise in Norway.	14
India to have electric smelting, and steel plant.	14
<i>Electric Furnaces for the Reduction of Spelter and Zinc Oxide</i>	15
Côte-Pierron process.	16
De Laval process, 1909.	17
Appendix (I)—	
Translation of Mr. Lars Yngstrom's Official Report on Experiments conducted at Domnarfvet, Sweden, (May-July, 1909), in the smelting of Iron Ores by the Electro-Thermic process.	19
Appendix (II)—	
'Frick' Electric Reduction Furnace.	45
Appendix (III)—	
'Frick' Electric Steel Furnaces.	57

ILLUSTRATIONS.

Photograph.

Plate I. 'Frick' Electric Steel Furnace.	57
--	----

Drawings.

Fig. 1. Côte-Pierron electric zinc furnace and condenser.	15
Domnarfvet furnace:—	
2. Diagram: carbon and electric energy required in smelting magnetite.	22
3. Diagram: volumetric percentage of CO ₂ in the gas.	22
4. Diagram: carbon and electric energy required in smelting hematite.	23
5. Diagram: volumetric percentage of CO ₂ in the gas.	23
6. Plan of Domnarfvet furnace plant.	24
7. Arrangement of switchboard connexions.	25
8. " " " " furnace electrical connexions.	26
9. Experimental furnace No. 1.	27
10. " " " " No. 2.	28
11. " " " " No. 3.	29
12. " " " " No. 4.	30
13. Final design of electric shaft furnace.	31
14. 'Frick' electric reduction furnace.	45
15. " " steel furnace, types I and II.	59
16. " " refining furnace, type III.	59
17. " " " " rotation of steel-bath.	65
