

PATENT TUBULAR FURNACE

OF
BENJAMIN HUOT,

at Lawrence Foundry, of is,

TO WARM
CHURCHES,

FOR
OR PRIVATE HOUSES,

CERTIFICATES.

MONTREAL, March 1874.
We, the undersigned, certify that the Patented Tubular Furnace of BENJAMIN HUOT at ST. LAURENT has given the most satisfactory results, since the *Dominion Theatre*, in the City of Montreal. It has been till then impossible to warm a vast building in a sufficient manner and all the systems were defective, but since then, last fall, in the *Theatre*, of the Patented Tubular Furnace of Mr. HUOT, the change has been taken place, and the temperature in the building is always constant, whatever the outside temperature may be.

We have tested, it after twenty minutes of fire in it, the Thermometer showed two hundred and twenty (220) degrees of heat.

(Signed) J. P. V.
E. H. S.
Proprietors of the *Dominion Theatre*.

MONTREAL, March 1874.
In answer to yours of the 17th April, I beg to say that I do not act unfairly towards you in not paying you the tribute which you so justly demand in not acknowledging the importance and value of your new furnace called *Four tubulaire*. It has been experimented in my presence and the success of the experiment has proved all my hopes. The little quantity of fuel we have used and the great quantity of heat given by the furnace have clearly shown to me that this heating apparatus is the best in use to-day to heat large buildings, such as churches, colleges, theatres, &c.

— Allow me, dear sir, to congratulate you upon such a splendid achievement, and please believe how happy I would be in learning that this furnace is expected by proprietors of large buildings, for the benefit of the public and also because it is a reward paid to your merit.

I remain with consideration,
Yours, etc.,

O. ROUILLON
Inspector of the Education, the City of Montreal.
