hours. he would find that most of them would germinate. The germination of beet seed is much accelerated and rendered more certain by the application of water nearly at the scalding heat, and allowing them to remain in it for twelve hours.

CHEMISTRY—When butter is to be made, if a little old butter be put into the cream, the butter will come from much less churning. When soap is to be made, if a little old soap be put into the ley and grease, the soap will be made with considerable less boiling.
