

PRESTON Implement SHED

Built in A DAY—to last FOREVER

This is the everlasting kind of building that shrewd farmers like to put on their farms. Fire-proof, weather-proof, lightning-proof, permanent, staunch structures of metal.

A handy man can take our plans and get the building together before you could saw up the framework of an ordinary building. The hard labor is done before the materials reach you. Every part is cut to fit. The windows are mounted in large sheets of metal. The fire-proof doors are fitted with hard-ware and bird-proof track.

Factory-made parts and huge output go to reduce the cost of Preston Implement Sheds. They are stocked in many sizes and styles. Our catalogue shows sheds with sliding door at end, or three doors on side running on separate tracks, or two sliding doors with through drive-way. Any number of windows as required.

Before cutting timbers or hauling material for that new shed. Get our catalogue and full information about these low-cost Preston Implement Sheds. Write to-day.

Increase Your Yields and Profits

Why envy others who reap larger crop yields than your land produces? Commercial fertilizers, properly selected, are increasing the war-time profits of growers everywhere. Is it not well worth your while to look into this great opportunity? Even if your land is producing big crops, you can get bigger and better yields and make more money by using

Harab- Davies FERTILIZERS

These natural fertilizers stimulate the plant, without impoverishing the soil. They nourish both land and crop. They are made from blood, bones, etc., and have no unnecessary filler in them. Every ingredient has proven fertilizer value. Everyone of our twenty-five different fertilizers is a proven success.

Write for bulletins and booklet. We will promptly mail them to you free of charge.

Fencing? Yes, but what kind?

The farmer who thoroughly examines the relative merits of the various brands of wire fences offered to him will not have any difficulty about deciding upon the one he ought to have. Let him decide by that most unerring of all tests—weight. Why judge by weight? Because weight means strength, and strength means durability and long life. Of the different makes of wire fences, there must naturally be one that will weigh heavier than the rest.

**The heavy-weight among fences
is the "Ideal"**

The reason is that all the wires are full gauge No. 9 hard steel wire; every wire is full of life and strength, and heavily galvanized to properly protect and preserve that strength. You therefore get longer service from "Ideal"—most for your money in strength, durability and all-round satisfaction.

Ideal Fence

It is to your interest before buying fencing to get a copy of our catalogue; a postal will bring it.
