RICHES-PIVER PATENT

LEAD ARSENATE

Paste and Powdered

Carefully examine a can or barrel of paste lead arsenate when opened. A layer of water on top indicates a coarse, poor product that settles down—because it cannot hold the requisite amount of water.

J. C. paste is very fine, smooth and even, with no water on top.

J. C. dry powdered lead arsenate is a very fine, bulky product, which sprays easily, sticks strongly and leaves no sediment in the tank.

All J. C. products are subjected to frequent tests in manufacturing them. Every package carries guaranteed analysis.

Write for Spray Booklet.

Other J. C. Sprays:

- CAL-ARSENATE
- BORDO ARSENATE
- BORDEAUX MIXTURE
- BORDEAUX DUST
