

The Sharp-Tailed Grouse

—this is the Prairie Chicken of the West. It is a typical resident of the treeless plains, the bunch grass and sage brush hills of the prairies and the interior of British Columbia, but to the northeast it may be found in almost continuous forest as long as it is not too dense and there is a good admixture of poplar and willow.

* The range of the Sharp-Tailed Grouse extends to the barrens of Northern Mackenzie, Keewatin and Ungava. There are three sub-species of this bird—the Sharp-Tail, which is found from Central Alaska to Western Ungava and south to Parry Sound, the darkest colored of the species; the Columbian Sharp-Tailed Grouse of the interior of British Columbia, and the Sharp-Tailed Grouse or Prairie Chicken of Alberta, Saskatchewan and Manitoba. This last is the palest in color.

The Prairie Chicken lies well to a dog and flies strong, and the hunter should insist on dependable ammunition for this bird, such as
