## MY LUCKY DAY

Mr. Thomas Wylie (Box 384), Galt, says:—"It was the luckiest day of my life when I struck PSYCHINE, for I truly believe I shouldn't be alive now but for that."

"A neglected cold was the beginning of my trouble, and what seemed to be a simple ailment, soon developed into a serious and dangerous condition. I got so low that it was scarcely possible for me to walk around, and I lost so much flesh that I looked like a skeleton. I was just about ready to 'hand in my checks,' although only 20 years of age. The medicine the doctor gave me made me worse and I got disgusted. Then I struck PSYCHINE."

"PSYCHINE did miracles for me. The first bottle gave me new life and courage, and in less than no time I began to put on flesh rapidly, and I felt I was on the high road to recovery. My appetite returned, and I 'ate like a hunter,' as the saying goes. My friends were surprised, and hardly knew me. In three months I was as strong and well as ever, and returned to work in the mill. I have not had a day's illness since. Nobody could wish for better health than I enjoy, and it is all owing to PSYCHINE. It should be in everybody's hands."

**PSYCHINE**  
PRONOUNCED SEE-KEEN  
THE GREATEST OF TONICS FOR HEALTH AND ENERGY

It was in the hotel of a Western mining town that the New England guest, registered in the office, heard a succession of loud yells.

"What in the world is that?—a murder going on up-stairs?" he demanded.

"No," said the clerk, as he slammed the books and lounged towards the stairs. "It's the spring bed up in Number Five. That tenderfoot up there don't get the hang of it, and every few days he gets one of the spiral springs screwed into him like a shirt stud. I guess I'll have to go up, if the e ain't anything I can do for you for a few minutes."

## Questions & Answers

### CHRONIC COUGH

Saddle pony caught cold in May from being kept in a stable that leaked whenever it rained. He had a cough for which I gave him blood root in his grain for two weeks. This seemed to do no good, so I got a package of heave powders and put him out to grass in day time. He still has the cough, and seems to breathe a little faster than he should. The last week or two I have noticed a little hard white stuff come through his nose. He is in good condition, eats well and feels good.

H. L.

Ans.—The cough has become sub-acute or chronic. It may take some time to overcome it. We would advise you to blister the throat with a liniment composed of olive oil, 2 ounces; turpentine, 1 ounce; strong liquor of ammonia, 1 ounce. Mix, and shake well. Well rub in one-half of the liniment at the first rubbing, repeat in twelve hours if the first application does not blister. When the skin is blistered, smear the parts with vaseline. Also make a paste of the following ingredients, and smear with a piece of lath (smoothed off on one end so that it will not irritate the tongue) well back on the tongue: About two teaspoonfuls of the paste every three hours. Chlorate of potash, 3 ounces; salicylate of soda, 2 ounces; fluid extract of belladonna, ½ ounce; powdered camphora, 1 ounce; powdered liquorice root, 2 ounces. Make into a stiff paste with molasses. Well stir in the ingredients.

### SURFEIT

Mare was all right in the morning. In half an hour her body was covered with lumps of different sizes. These disappeared in less than 24 hours, but she is again affected.

### SUBSCRIBER.

Ans.—This is called surfeit, or net-the rash. Give her a purgative of 8 drams of aloes and 1 dram ginger and follow up with 1½ ozs. of Fowler's Solution of Arsenic twice daily for a week.

### RHUBARB GONE TO SEED

How can I prevent rhubarb from going to seed? I have a patch of rhubarb about 50 feet by 200 feet, and it is all going to seed this year. I have tried cutting the tops or heads off, but it only grows into a sort of hollow tube and shoots out again, and it is as bad as ever.

W. W. P.

Ans.—Rhubarb, when down for a number of years, runs largely to seed stems in a favorable growing season. The only remedy we know is to cut off or pull up the seed stem. No doubt you did not cut off close enough to the crown. We would advise that you set out a new patch this fall or next spring.

### OVER-DISTENTION OF STOMACH

Cow due to calve in three weeks was bloated for a week. She became so bad that she had to be taken in and dosed with medicine. Finally, I was obliged to relieve her by tapping. Instead of gas, about four pailfuls of hot water was ejected with more or less force. The cow now appears to be getting better,

## Here Is Strength

With strength and health as the sole foundation, many a man has built fame and fortune. For lack of it, many a budding genius has passed into oblivion, many high hopes have been shattered, many hours of misery spent. The world is full of half-sick, half-well, half-successful men, any one of whom could become a power in life with vigorous strength as a fundamental asset—could find happiness where he now sees nothing but gloom.

### I CAN RESTORE YOUR STRENGTH

There is no medicine, no mystery, no magic in my treatment. It is founded on the great basic truth that electricity is the motive power of the human body, and that effort causes an expenditure of this power.

Success is possible in this world to any man who has the energy to strive for what he wants. A man without strength has no inclination to work. The vital energy of the human body is electricity. This has been proven. The way to become strong, to keep strong, and to stimulate ambition is to give your body a charge of electricity every day giving you a good reserve fund of vitality to draw on.

The newest device for electrifying the human body is the Dr. Sanden Hercules Body Battery, composed of series of cells arranged in the form of a girdle, to be worn comfortably about the body at night while you sleep. It is the most convenient, most comfortable, and most effective means of applying galvanic electricity for curative purposes.
