

CHINESE DECLARED MAN OF FUTURE

UNIVERSITY OF CHICAGO SAYS HE WILL DOMINATE BECAUSE HE EATS LITTLE.

CHICAGO, August 21.—Professor Herbert Joseph Davenport, assistant professor of political economy at the University of Chicago, had a few things to say to his class in political economy today about Chinamen. He holds that there will be a time in the near economic future when the Chinese race will be the dominant factor in all human affairs. There are two things to do, midway students who heard him say, in order to stave off the yellow peril. Eat less and raise fewer children. He said, in no other way can the American people combat the forces of Chinese citizenship which will eventually encroach on the American people. "The Chinaman is inevitably destined to be the ruler of the world," he declared. After his class had stated his surprise he continued, "By and by the world's supply of food will be so lessened by increase of population that the survivors of so conditions will be the man who exist on the least. This is presently the Chinaman. In the future it is fair to presume that the country's population will be so large that we shall have to raise families—fact, we won't dare to raise them because there will be an immense food supply for their sustenance. Even the people who are grown up will have to curtail their food supply. Then the Chinaman will come in. He will not only subsist on less, but he can raise families—large ones—and these can live on the available food supply. The country may later govern with Chinese, and then the future of the white race will be dim."

COTTON MILL STRIKE

All Chances of Arbitration at End—Company Withdraws Offer. VALLEYFIELD, Aug. 21.—All expectations of settlement of the strike by arbitration were dispensed with when Acland of the labor department announced that the company had withdrawn its offer of \$100,000 to grant a ten per cent increase. There is nothing apparently ahead but a long strike. The company paid off the strike today. At a meeting in the evening President Galt accused the company of breaking faith with their employees, and there was no use of going to arbitration.

PRECASTING THE CABINET

DEFINITE ANNOUNCEMENTS OF NEW MINISTERS WILL BE MADE ON MONDAY

OTTAWA, Aug. 22.—It is expected here by those in close touch with the government that the new cabinet ministers will be Hon. Geo. Graham, leader of the opposition in the Ontario legislature, and ex-President Pugsley of New Brunswick. A definite announcement will probably be made by Sir Wilfrid Laurier on Monday next. The names of Mr. Harbord, M.P. for Lambton, and Hon. Speaker Sutherland are also mentioned for the Ontario portfolio, and Mr. Carvell, M.P. for Carleton, for the New Brunswick vacancy.

To Oppose Pugsley

Mayner Sears, will oppose Hon. Wm. Pugsley, in St. John, N. B., election as an independent Liberal, but not if the Conservatives make nomination. Sam Hughes as Proprietor. Col. Sam Hughes has been prophesying again. He predicts a season in November, elections in June, and a good crop for the West, after all, this year. Let us hope the two latter will be fulfilled as certainly as the first is likely to be.

Mooney's Perfection Cream Sodas advertisement with image of a soda bottle and a woman.

GOLD REPORTED NEAR CALGARY

HOMESTEADER UNCOVERS WHAT LOOKS LIKE GOLD QUARTZ. GONE TO ASSAYER

CALGARY, Aug. 21.—What may develop into a valuable ore deposit has been unearthed about sixty miles north-east of Calgary, and if the assay turns out as expected, at least one homesteader will soon be able to quit farming. One day recently while strolling in the field the homesteader was attracted by a hill which had some peculiar marks on it. He dug down and found a quartz vein. The man's curiosity was aroused and after digging around the stone a chain was fastened to it with the aid of a team it was pulled aside. After digging down about seven feet a bed of ore was struck which is certainly rich in pyrites. Seldom indeed is so much pyrites seen in the same amount of ore. Whether it is a gold or copper deposit cannot be known until the report of the assayer is received. The homesteader lost no time in securing mineral rights and is ready for further exploration should the assay prove valuable. The find certainly looks good. From a sample of ore seen in Calgary it looks like free-milling gold quartz.

MAN SHOT AT WHARTON

During a Raid in the Suburbs of Voganville. WHARTON, Aug. 21.—All the summer there has been located in a suburb known as Voganville, one or two houses of ill-fame, to which the residents objected strenuously, and the places were closed. Last week Mrs. Thomas, known as "Aggie" returned and located in a tent. She was accompanied by a friend. The residents of the section objected to that, and Tuesday, P. Gilbert, an old and respected citizen, organized the boys to make a raid on the place. The work was accomplished, the tent pulled down, and the women were rotten. Gilbert unfortunately paid for his indignation with his life. He struck Mrs. Thomas, and while lying on the ground she pulled a revolver and fired three bullets into his body, causing instant death. The woman is under arrest. Inquest is being held.

To Accompany Borden.

ST. JOHN, N.B., Aug. 21.—Hon. Geo. Foster in city today said he would accompany L. Borden through Nova Scotia, but beyond that his plans were uncertain.

R. L. BORDEN AT GLACE BAY

GLACE BAY, Aug. 22.—R. L. Borden, accompanied by J. J. H. Borden and C. E. Tanser, addressed a good meeting at Glace Bay, N. S., tonight. His speech was largely on the traditions and policy of the Conservatives under Sir John Macdonald. He spoke at length on the charges of corruption and the shutting up of the industry by the Liberal administration at Ottawa; hinted at protecting the miners of Nova Scotia from alien labor; importation, and made promises of a clear election in case of his return to power, which he indicated was more than likely.

Judging Western Wheat

WINNIPEG, August 21.—The judging of the Dominion prizes for wheat is now in progress. A meeting of the adjudicators was recently held at Indian Head, and certain points to be considered in making the awards were decided on, among the principal being the purity of the seed and the cleanliness of the farm. S. Bedford, of the firm of A. B. McKenzie Co., seedman, who is judging for Manitoba, along with E. B. Eddy, S.S. of the seed branch of the Dominion department of agriculture, was in the city last night, staying at the Clarendon. He is on his way to Morden, where the judging for the field grain competition in the province will be begun today, that district being furthest advanced as far as the crop is concerned.

A TWENTY FOOT SNAKE

Dakota Farmers Lose Their Sheep and Pigs in Mysterious Manner. ADRIAN, N. D., Aug. 22.—Farmers living along the James river in this vicinity are much excited over the discovery of an immense snake in the dense timber growth in the river and are organizing an expedition to hunt down and exterminate the reptile. Two farmers who last week were walking through the high grass near the edge of the woods south of here saw what they thought was the limb of a tree. They stepped over it when it suddenly gave a hiss and started to move rapidly away, causing through the underbrush to the tall timber. The farmers were much frightened and did not attempt to give chase to the reptile. They say that the snake appeared to be twenty feet in length, and was as big around as a good sized limb of a tree. Since then other farmers also have seen the reptile, which seems to stay close to the wooded strip along the river. The snake is supposed to be a South American python. Last year, while a circus was exhibiting at La Moure, it was reported that one of the pythons escaped from its cage. The circus people, it is stated, searched for the reptile, and it was supposed

FUEL SITUATION GIVES CAUSE FOR ANXIETY

MANY COUNTRY DEALERS COMPLAIN OF NON-DELIVERY OF COAL ORDERED FOUR AND FIVE WEEKS AGO—LOCAL COAL MEN GIVE THEIR VIEWS—HOUSEHOLDERS STILL REFRAIN FROM LAYING IN WINTER SUPPLIES—GOVERNMENT TO SEND REPRESENTATIVE TO MINES.

From Thursday's Morning Leader For some weeks past the question of the fuel supply in the West has been occupying the attention of the government and coal dealers throughout the province, though the general public do not appear up to the present to have given very much thought to the matter. By reason of the coal shortage, despite the repeated assurances of railway officials that no shortage exists, have been given considerable anxiety and a widespread feeling exists that the position is such as to justify a feeling of anxiety. That there is ground for uneasiness is shown by the following dispatch received from The Leader's correspondent at Howard: "The coal question is still an important one, and it is thought that some active campaign should be instituted in order to discover where the blame is to be placed. The C. P. R. claim to have lots of cars to handle the coal or at least as many as the people order here, at this point the Galt agent made a canvass for immediate delivery of coal payable in October. On July 29th an offer went in for 6 October cars and 2 cash cars; a few days later 2 more cars were ordered. Up to the present time no coal has arrived and as yet no notice of further shipments. It has been suggested that The Leader publish weekly reports from as many points in the province as possible, giving the number of cars ordered and the number actually delivered. Government to Send Representatives to the Mines. Upon having his attention called to the above dispatch by J. Ketchum, deputy commissioner of agriculture, stated to The Leader that he had reason to believe that there was ground for the complaint and that a certain shortage of cars did exist. But he did not think that that was the only reason for the state of things mentioned by the Howard correspondent. The Galt Co. he understood, was having such a demand for cash coal that it was unable to supply the orders placed with them for coal on the deferred payment plan arranged for between the government and the operators. In order to ascertain the actual facts regarding the present coal position, the government had decided to send a man to the mining district to thoroughly size up the position and report to the government. The report would deal in detail with the situation—the supply of cars and men, equipment of the mines, stock of coal in hand, etc.—and would afford information as to what the situation is with the orders placed with them for coal on the deferred payment plan arranged for between the government and the operators. ARCOLA, Aug. 21.—Dealers are getting in their coal slowly and are apparently laying in ample supplies. There is no complaint of a shortage as yet. BALCONIE, Sask., Aug. 21.—Local dealers state that the coal situation is all right now, and that they are getting a full supply. But, what they fear is that later conditions may be the same as last winter. They wish to avoid if anything can be done to guarantee a full supply during the winter months. Slow Delivery at Davidson. DAVIDSON, Sask., Aug. 21.—There is no shortage of coal here, although a car is not coming forward promptly. The Canadian Elevator Company have had thirty-two cars on the road for a month, and so far only five have come in. They have erected a new coal shed for 700 tons, and will stock up to that amount if the coal comes forward. Other dealers make the same complaint of non-delivery in reasonable time, but cannot place the blame, although a car shortage is apparent. HANLEY, Aug. 21.—The Canadian Elevator Company says that they have plenty of coal on hand, and that there is no coal shortage at date. Mellicke and Sons say they have sixty tons in stock. Twenty cars ordered a month ago have not yet arrived.

Other Dealers. A. D. Miller and Co., agents for labor coal, stated that they were getting all the coal they wanted. At the present time their shed was filled up with a stock of 600 tons. They believed, though, that sooner or later a blockade was inevitable. The publisher of the Leader, who did not find householders at all anxious to lay in their winter stocks. Their firm had storage capacity of 1,000 tons, mentioned to stock that amount if the opportunity was given to them. Conditions at Outside Points. Enquiries made by The Leader at a number of outside points throughout the province go to show that the condition of affairs existing in Regina is more or less general. While no actual fuel blockade exists, the supplies being received are very much below what, in view of last winter's famine, would be expected. The following are a few of the despatches received from The Leader's correspondents: ARCOLA, Aug. 21.—Dealers are getting in their coal slowly and are apparently laying in ample supplies. There is no complaint of a shortage as yet. BALCONIE, Sask., Aug. 21.—Local dealers state that the coal situation is all right now, and that they are getting a full supply. But, what they fear is that later conditions may be the same as last winter. They wish to avoid if anything can be done to guarantee a full supply during the winter months. Slow Delivery at Davidson. CANADA DRUG & BOOK COMPANY

CANADA IN BRIEF.

INDIAN HEAD, Sask., Aug. 21.—The coal dealers have about seven cars in stock and would get a great deal more were it not for the difficulty they experience in getting customers to lay in their winter supplies. The dealers are not complaining of the shortage of cars, the only complaint your representative could secure in this respect is the shortage of advance customers. HAMILTON, Aug. 21.—The Canadian Elevator Company says that they have plenty of coal on hand, and that there is no coal shortage at date. Mellicke and Sons say they have sixty tons in stock. Twenty cars ordered a month ago have not yet arrived. Householders Want Stock. Twenty cars ordered a month ago have not yet arrived. Householders Want Stock. INDIAN HEAD, Sask., Aug. 21.—The coal dealers have about seven cars in stock and would get a great deal more were it not for the difficulty they experience in getting customers to lay in their winter supplies. The dealers are not complaining of the shortage of cars, the only complaint your representative could secure in this respect is the shortage of advance customers. HAMILTON, Aug. 21.—The Canadian Elevator Company says that they have plenty of coal on hand, and that there is no coal shortage at date. Mellicke and Sons say they have sixty tons in stock.
