

Always Best Be Well on the Safe Side

Always Best Be Well on the Safe Side... SALADA! The Tea with a Quarter of a Century of Unrivalled Public Service.

The Flittin' Craze

My friend the Provost, by Hew Maclean. "I'm flittin' on the Monday, thinkin' a' the hubble wuld be ower by the Sunday, but it wasna till that day we went what a hubble was."

"There's the Mairs thrang at it since the daurkenin' yestreen, and the Mairsons no' a bit better. Auld Kirk or Frae, it's nae odds. When it comes to flittin', relection's clean forgot, and Saturday and Sunday's alike."

"The flittin' day is a great day for the poilsmen. 'Tis the flittin' day is a great day for the poilsmen. 'Tis the flittin' day is a great day for the poilsmen."

"And there's Mistress Matheson, wi' her no' weel man and her fowling weans, watchin' the last rake o' their belangin's leavin' wi' the coal man, wi' his daein' the cairtin' free, thinkin' it's better policy to dae that than keep on supplyin' them wi' coals they never pay for."

"The Murrays are flittin' out to Cambuslang, and I ken what garded them shift. It's the man that's to come. He bocht a book aff an Argyle set barrow that tells ye there toudna be onybody leavin' in toons everybody should hae his ain door and his ain fairlin'—and Murray's wa' for that."

"He says if he had a free haun' he could clear awa' the slums in five years, and I believe he could. Cambuslang is the place for practisin'—there's the locks on the coal cellars."

"But it's a sully game, the flittin'. It's the no' day in the 'ear the wif'll never miss tushin' up the front garden—she says that's whil's she's there for, but I never see muckle difference in the floorer. She can gie me a' the news o' the new corners, the number o' parlor chairs, and can tell frae memory every house near haun' she has an eight-day nock. She can spot the folk that hae new things sent frae the shops to arrive along with their auld odds and ends, so that the nocker'll think they've been well aff in their auld hoose; and she tells mair than 'dair come over."

"Flittin's a sport we never got the notion for, and the wif's no' faur wrang when she says that them that's aw flittin' hae mair weans than wis. 'We've only flitted twice in oor mairrit life, and it's enouch. The first time, bein' young at the game and no' up to a' the jinks, was the worst."

Without a Single Exception The Fertilizers Were Profitably Employed. Fertilizers and manure experiments were carried out at five experimental farm stations, on a three-year rotation of crops.

Fertilizers and manure experiments were carried out at five experimental farm stations, on a three-year rotation of crops. (1) Potatoes of other food crop, (2) Grain and (3) Hay. The average profit for the three years from the plots receiving manure and fertilizers averaged \$30 per acre, and from fertilizers alone slightly over \$15 per acre.

He recognized me at once. Perhaps you believe that the executioner, finding himself suddenly face to face with his victim, straightened up defiantly? Or that he flinched or begged for mercy? Or, at least, that he showed some sense of shame?

There is German psychology in all its nakedness. The German either terrorizes or cringes. He is either ferocious or servile. In Belgium and the invaded districts of France the world saw him in his first mood. Our soldiers and the other allied soldiers in Germany are going to see him in his even more disgusting second mood.

What the German is most loath to think of is reparation. He wants to beg off. But justice and righteousness cannot be served by letting him beg off. The attitude of the British government and the French government towards him is not likely to be affected by his sycophancy and his snivelling. Nor should the attitude of our own government and people be affected.

Germany committed a colossal series of crimes. The first purpose of an adequate penalty. Issues like the freedom of the seas and a league of nations should be superseded at Paris to the primary issue of obtaining full satisfaction from a still unrepentant Germany. It will inevitably work to German advantage if these somewhat abstract and controversial questions distract the peace conference's attention from the concrete and urgent problem of German reparation.

Little each night and thawing in the daytime, and believe they get a better lawn by this method than by sowing the seed on land where it will not be quickly covered. After the lawn has been cleaned and seeded, give it a good rolling as soon as the turf is dry enough so the roller in passing over it, does not sink below the general level.

Glimpsed. Sapphire heat trimming. Quilted silk hooded robes. Point d'esprit in pastel shades.

Catarrhal Deafness Cannot Be Cured by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure catarrhal deafness, and that is by a cathartic remedy. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a running sound or imperfect hearing, and when it is entirely closed, Deafness is the result. Unless the inflammation can be reduced and this tube restored to its normal condition, hearing will be destroyed forever. Many cases of deafness are caused by catarrh, which is an inflamed condition of the mucous surface of the Eustachian Tube. Catarrh is due to the blood on the mucous surface of the system. We will give One Hundred Dollars for any case of Catarrhal Deafness that cannot be cured by Hirst's Cathartic Medicine. Send for full particulars. All Druggists.

Harmonizing Colors. Red and blue. Blue and gold. White and black. Grey and black. Purple and gold. Yellow and black. Yellow and lavender. Light green and black. Lavender and African brown.

Probably. The person who left a bomb on the doorstep of the building that housed a humorous paper must be one of those fellows who are always taking the joy out of life.

Minard's Liniment Cures Diphtheria. THE SAME OLD GERMAN. (New York Tribune.) Correspondents with the American army in Germany state that the population of the occupied districts is becoming exceedingly docile and accommodating in attitude. We quote from a cable dispatch in yesterday's Evening Sun. "The Hun of blood and iron wishes again to become the peaceful German of the beer gardens and Christmas trees and treats the American with civility that is most cringing. His hoose, his barn and anything else he has are at the disposal of the conquerors."

Minard's Liniment Cures Garget in Cows. SNOW IS A PUZZLE. Even the Scientists Know Very Little About It. You know as much about snow as anybody else on earth—which is to say nothing at all. You know that it is white, that it is either granular or composed of little round grains—or flaky. If it is flaky you know that such flake is a six-pointed crystal formation; at least you ought to know it, for it is a fact. But why it is white, why it is always six-pointed, why it was made to come in winter instead of summer—nobody knows that, except that it is part of nature's way, and therefore is the right way. You can go to the library and get books that have been written about the snow. You can read where the scientists tell you about where it is formed in the clouds—and all of

Without a Single Exception The Fertilizers Were Profitably Employed. Fertilizers and manure experiments were carried out at five experimental farm stations, on a three-year rotation of crops. (1) Potatoes of other food crop, (2) Grain and (3) Hay. The average profit for the three years from the plots receiving manure and fertilizers averaged \$30 per acre, and from fertilizers alone slightly over \$15 per acre. These calculations are based on the normal prices of all the commodities. Under present conditions of the market, notwithstanding the increased cost of fertilizers, the profits would appear greater. At all the stations, the combination of manure and fertilizers ranked highly; and took highest place in the averages. Dominion Experimental Farms Report 1918. FERTILIZERS HASTEN RIPENING AND INCREASE CROP YIELDS. Write for Free Bulletin on Crop Production. Soil and Crop Improvement Bureau of the Canadian Fertilizer Association, 1109 TEMPLE BLDG., TORONTO, 24
