Crushed Coffee— what is it?

By a new process of crushing between steel rollers, instead of grinding, the skin, which remains in the eye of the bean after roasting, is separated from the kernel and removed by air suction, while the kernel is broken into small even grains. These grains when steeped, being free of the skin or chaff, settle quickly, leaving the liquid clear and bright, and give the true coffee flavor.

Estabrooks' Red Rose crushed Coffee is as easy to make as Red Rose Tea. Directions are in each tin.

It is strictly pure, not a particle of chicory or any other adulterant being used, and is packed in air-tight tins the same day it is roasted so to retain its full flavor, fragrance and strength.

A good combination is Estabrooks' Coffee for breakfast and Red Rose Tea for other meals.

LUMBER NOTES

The Fredericton Gleaner estimates that 40,000,000 feet of logs are hung up on the upper St. John waters, awaiting rain that may not come.

Donald Fraser states that his Cabano drives are all in. There is no news from his Tobique operations. His son, Donald, is in charge there, and he thinks everything will be all right.

The Marysville saw mill is not running day and night. Four gangs are operated during the day and two at night. This move was necessary on account of the large amount of logs that are to be manufactured. There are 16,000,000 feet all told. Sawing operations at the Blackville mill commenced Friday. There are 3,000,000 of logs to be sawn in that mill.
