PAINT INSURANCE IS WHAT YOU NEED

EVERY wise property owner insures his buildings against possible damage

And yet we find many a man failing to insure his building against the certain deterioration of unprotected wood or iron, exposed to the constant wear and tear of the weather. Keeping your buildings regularly painted is insurance against deterioration. Good paint protects and beautifies the surface to which it is applied—it keeps wood from cracking and checking—it keeps iron and steel surfaces from rusting. We sell and recommend Canada Paint because it is made of pure materials thoroughly mixed and ground. Come and talk to us about your paint problems.
