PYORRHEA.

Pyorrhoea is the most de-
 structive, the most difficult to
 treat, yet one of the common-
 est of all the diseases of the
 teeth. It is present in the
 mouths of countless thousands
 of adults who fondly think their
 teeth are in perfect condition.
 It progresses slowly, and in its
 early stages, painlessly. The
 gums become soft and bleed
 easily, then they grow sore and
 become inflamed. Pus forms at
 the roots of the teeth and they
 loosen in their sockets. When
 the disease reaches this stage it
 affects the general health and
 usually extraction is the only
 remedy.
